- Appendix 2: Housing Starts and Completions
- Appendix 3: Housing Density by Settlement
- Appendix 4: Section 106 and Unilateral Undertakings

1. Headline Results

Housing Development

- Despite difficult market conditions, 225 residential units (gross) were built in 2010/11 with 69 losses giving a net figure of 156 for the monitoring year. This means that 2384(net) new homes have been built since 2001. This figure is still relatively close to the regional plan target.
- 43 affordable housing units were completed during the monitoring period, accounting for 19% of all gross completions. A third of this was family housing (3 and 4 bed units), helping to meet local housing needs.
- 99.68% of all residential completions were on Previously Developed Land and 94% was located in the Borough's main towns.
- Since the last AMR the Council has updated the Strategic Housing Land Availability Assessment (SHLAA) for 2010/11. The SHLAA update provides a review of housing supply over the next 15 years to 2027. This includes supply from committed and allocated sites, together with other sites considered deliverable. The 5-year figure of 1,819 new dwellings identified in the SHLAA update represents 7.6 years supply. When compared to the East of England Plan target of 250 new dwellings a year, this figure represents 7.3 years supply, this includes a number of unimplemented permissions.
- The average sale price of a semi detached property across the Borough increased from £332,007 (as at the fourth quartile) in 2010/11 to £337,462 during this monitoring period. The gap between local incomes and house prices is one of the highest in Hertfordshire and the eastern region.

Employment/Commercial Development

- Current economic conditions have had a marked impact on employment and commercial development activity, which continues to be limited in 2010/11. However, Morrison's Supermarket opened in January 2011 creating a number of new jobs in the borough.
- No allocated employment land was lost in the monitoring year but there remains significant pressure on vacant sites for redevelopment to housing or retail use.
- The rate of unemployment in Hertsmere has fallen slightly from 2.6 to 2.5 at the end of 2010/11.

LDF Timetable

- Since March 2010, the main policy priorities have been to undertake additional consultation to facilitate resubmission of the Core Strategy, and any necessary supporting studies.
- The Council continues to publish new and adopted guidance so that adopted policies remain relevant and effective.

Effectiveness of Current Policies

- More than two thirds of adopted Local Plan policies were used in Development Management decisions during 2010/11 and there were no material departures to The Plan. This highlights that the Council's saved policies continue to be relevant and effective. With the many changes, which have recently come about as a result of the localism bill, the bill also sets out to reduce the number of performance targets through a process of decentralisation. There is a shared view that a culture of target-setting has progressively undermined the ability of local authorities to meet the diverse needs of local communities. As a result, the council will continue to monitor a number of targets for internal purposes only as many of the national targets will be revised or removed. Only 5 of the 28 targets set in the AMR have not been met. Two of these relate to regional/national policy, which will be changed in any case.
- Over £755,521 was negotiated in planning gain on schemes approved in the monitoring year.

Future AMRs and Priorities for Monitoring

- It remains a statutory requirement to publish an AMR for 2010/2011, and there is a need for the Council to

Annual Monitoring Report 2010-2011

continue to monitor the implementation and impact of planning policies. Data in future AMRs will be driven by local priorities, Core Strategy monitoring and the recently enacted Localism Bill.

2. Executive Summary

- 2.1 This is the seventh Annual Monitoring Report (AMR) produced by the Council. It covers the period from 1st April 2010 to 31st March 2011. It also includes current progress on the LDF programme to November 2011.
- 2.2 Previous AMRs have all been prepared against the background of targets in the East of England Plan. This plan remains in force following a successful legal challenge against the revocation of Regional Spatial Strategies in July 2010. The Council will continue to monitor the progress of the recently enacted Localism Bill and National Planning Policy Framework.
- 2.3 The AMR indicates that 2010/11 was a difficult year for housing development with 225 units (gross) completed despite the difficult market conditions. However, taking into account demolitions, there was only a net addition to the housing stock of 156 units.
- 2.4 As part of the net figure 43 affordable housing units were completed, accounting for 19% of total gross completions. Family housing (3 and 4 bed units) accounted for roughly a third of the affordable supply, though the numbers have been higher in the previous year with only 6 3-bed units and 9 4+ bed units produced in this period.
- 2.5 While the development trends suggest that there has been market confidence to progress existing schemes, the recession has had an impact on development starts. As predicted development activity has fallen again in 2010/11.
- 2.6 Projections of future housing supply in this AMR are drawn from the recently published a revised Strategic Housing Land Availability Assessment (SHLAA). Current national guidance still retains the need to identify a five-year housing land supply and to look forward 15 years from the adoption of a Core Strategy. The SHLAA estimates a potential short-term supply of 1,702 dwellings based on allocations, commitments and deliverable urban sites. This equates to 7.6 years supply based on the development rate in the East of England Plan (250 dwellings per annum).
- 2.7 New commercial and employment related development has been limited in the monitoring year. The AMR highlights that the net supply of employment floorspace (based on outstanding permissions), is under 5,500sqm.
- 2.8 This AMR highlights the impact of changes to the LDF programme resulting from the withdrawal of the Core Strategy and evolving national planning advice. This has had an impact on the target date for re-submission, which has been put back from late 2011 to early 2012. While these changes are not within the Council's control, the technical studies identified by the Planning Inspector have been completed and there has been good progress to bring forward and update supplementary planning documents. The evidence base studies are in place to support re-consultation on the Core Strategy.
- 2.9 The adopted Local Plan (2003) continues to be a key document for Development Management decisions and the revised draft Core Strategy continues to have interim approval for decision making. Updated local planning guidance will continue to be important to ensure the adopted Local Plan remains relevant and responsive to local issues.
- 2.10 Analysis of the use of Local Plan policies in Development Management indicates that the Local Plan remains relevant and effective in Development Management decisions. There have been no formal departures from Local Plan policy referred to the Secretary of State or decisions affecting the permanence of the District's Green Belt. Over £755,521 has been negotiated in planning gain on planning applications decided in the year.
- 2.11 Going forward, there remains an opportunity to review the role, structure and format of the AMR. The format of the AMR has evolved largely to meet the need for reviewing national core planning indicators, comparisons against regional plan targets and to support housing and planning delivery grant allocations. While published evidence of development monitoring will still be needed when the Council is setting its own targets, none of these national and regional drivers remain.

3. Introduction

- 3.1 The Planning and Compulsory Purchase Act 2004 (as amended) (the Act) introduced significant changes in the way local development plans are prepared. This included an increased emphasis on the need for sound evidence to underpin the development and review of planning policy. Under the previous system, Planning Policy Guidance (PPG) 12 required local authorities to publish the results of plan monitoring on a regular basis. It is now a statutory requirement for all Local Planning Authorities to prepare an AMR.
- 3.2 The Act and its associated regulations identify five, interrelated monitoring tasks which authorities are required to include in their AMRs:
- Review progress in plan preparation against the timetable in the Local Development Scheme;
 - Assess the extent to which existing policies are being implemented;
 - If appropriate, explain why policies are not being implemented and set out steps to be taken to ensure implementation of the policy or whether the policy is to be amended or replaced;
 - Identify the significant effects of implementing policies and whether these are as intended; and
 - Set out which policies are to be amended or replaced.
- 3.3 Government guidance¹ highlights a number of different indicator types, which can be used in Annual Monitoring Reports. These are summarised in Table 1 below.

Table 1: Indicator Types used in the Annual Monitoring Report

Indicator Type	Description
Process	Process indicators are used to assess implementation of the LDS and the effectiveness of the plan policies that are being used in decision making. These indicators should also help Authorities identify which policies in their plan documents need replacing or updating.
Core output	Core output indicators represent national and regional priorities for monitoring and are defined by Government. The latest guidance was produced in February 2008.
Local output	Local output indicators complement the core output indicators to identify local priorities and to monitor the implementation of (specific) local policies and LDF documents.
Significant effects	Significant effects indicators should specifically assess the direct environmental impact of the plan, and are linked to the Strategic Environmental Assessment / Sustainability Appraisal (SEA/SA) process. This is a statutory part of plan development and implementation.
Contextual	Contextual indicators help to describe the wider social, environmental and economic background in which the planning system operates.

- 3.4 Development Plans are required to have regard to other Council strategies and as such, there should be a degree of commonality in the information gathered to assess their implementation. The indicators in the report have also been selected to assess whether the Local Plan and LDF are helping to deliver key policy commitments contained in 'Hertsmere Together', the Borough's Community Strategy.
- 3.5 In total, 33 core and local indicators and 28 associated targets have been identified in the AMR. Only four of these targets have not been met, relating to regional plan housing requirements, average housing density, loss of shop units and recycling of site materials. However, the policies relating to the first two of these have been changed or proposed for revocation by government since March 2010.

Contextual Indicators	Core Indicators	Local Indicators	Targets set	Targets met	Targets not met
4 ²	12	21	28	23	5

4. Progress on the Local Development Framework

Policy work over the last year

4.1 This section sets out the Council's progress in bringing forward the Local Development Framework and supporting policy documents to November 2011. Since March 2010, the main policy priorities have been to undertake additional consultation to facilitate resubmission of the Core Strategy, finalise the Supplementary Planning Documents already underway and to bring forward additional guidance, where Councillors have highlighted a need.

In terms of the Core Strategy and supporting evidence base, the Council has:

- Produced a revised Strategic Housing Land Availability Assessment (November 2011)
- Redrafted and updated the Core Strategy for public consultation (December 2010)
- Redrafted and updated the Core Strategy for pre submission consultation (November 2011)
- Completed an Open Spaces Study for the Borough
- Progressed a study of Major Developed Sites in the Green Belt.
- Updated the Sustainability Appraisal Scoping Report and Sustainability Appraisal Report
- Completed with partners a study on the potential for renewables and Low carbon Energy in Hertfordshire
- Completed with County partners a Green Infrastructure Study for Hertfordshire and Hertsmere
- Contributed to the Hertfordshire Strategic Employment Sites Study (April 2011)
- Complete Local Strategic Employment Sites report Update (September 2010)
- Progressed an Urban Open Space and Amenity Greens Study

In terms of progress on specific SPDs and other key documents, the Council has:

- Adopted a Wildlife Site, Biodiversity and Landscape SPD (December 2010)
- Adopted a Planning Obligations SPD which superseded the s106 Procedural Note (adopted by December 2010)
- Adopted a Shopfront Design SPD (March 2011)
- Progressed and Consulted on a Streetscene Manual (to be adopted November 2011)
- Adopted revisions to the Parking Standards SPD (to be adopted by December 2010)
- Introduced a Local Development Order and accompanying guidance for Elstree Way
- Published a Planning Brief SPD for Key Locations in Radlett
- Progressed work on a Planning Brief SPD for Bhaktivedanta Manor
- Continued to progress work on a Planning Brief SPD for Rossway Drive, Bushey.
- Led Countywide Joint Commissioning on a CIL viability assessment

The Development Plan for Hertsmere

4.2 The current development plan for Hertsmere (as at November 2011) currently consists of:

- Policies in the East of England Plan;
- Saved policies in the Hertsmere Local Plan (adopted 2003);
- Policies in the submission Core Strategy (adopted for interim Development Control use);
- Hertfordshire County Council policies on minerals and waste and their replacement LDF documents; and
- National Planning Policies and Guidance
- Supported by Supplementary Planning Documents (formally adopted or adopted for interim use);

4.3 The Government has signalled its intention to abolish Regional Strategies through the Localism Bill. However, the Court of Appeal judgement made on 27 May 2011 states that it would be unlawful for a local planning authority preparing, or a Planning Inspector examining, development plan documents to have regard to the proposal to abolish regional strategies. The judgement goes onto confirm that, for so long as the regional strategies continue to exist, any development plan documents must be in general conformity with the relevant regional strategy.

4.4 The Government has also published a consultation draft of the National Planning Policy Framework (NPPF). The NPPF is intended to bring together Planning Policy Statements, Planning Policy Guidance Notes and some Circulars into a single consolidated document. It is a consultation document and, therefore, subject to potential amendment. It is capable of being a material consideration in planning applications, although the

weight to be given is a matter for the decision maker. The current Planning Policy Statements, Guidance notes and Circulars remain in place until cancelled.

4.5 In addition to formal 'Development Plan Documents' and guidance linked to specific saved policies, the Council has also endorsed a number of documents as 'best practice guidance' such as Building Futures (the Hertfordshire sustainable design guidance). Although not formal standards, the Council will highlight these documents at pre-application stage and take into consideration that applicants have followed their contents when considering development proposals. Table 3 sets out the status of Supplementary Planning Documents adopted and in preparation. As noted in section 4.1 a number of SPDs are due to be adopted by the end of 2011. The table also includes a number of planned development briefs and other design guidance.

Progress on the LDF Core Strategy

4.6 The Core Strategy was submitted to the Secretary of State on 6th March 2009 for independent examination. The appointed Inspector held two pre-hearing meetings on 30th April and 10th June 2009. Following these meetings, she recommended the examination should not proceed and adjourned the hearing for 6 months to enable the Council to undertake further technical studies. Given that changes to the Core Strategy would be needed requiring further consultation, the Council chose to withdraw the Plan and this was formally confirmed on 5th January 2010. Since this date, the main technical studies required by the Inspector have been completed.

A revised Core Strategy was published for consultation in early 2011 containing a number of changes from the version which had been withdrawn a year previously. These changes included:

- the target for new housing revised downwards by 15% to 3,200 new homes between 2011 and 2026, in light of the anticipated revocation of the East of England Plan and associated advice from government,
- a reduction in the size of sites where Affordable Housing would be sought from 15 units/0.5 hectares down to 10 units/0.3 hectare - delivered through intermediate rent or shared equity/ownership on sites of 10-14 units,
- amending the timescale, but not the annual requirement, for new Gypsy and Traveller pitches – an additional 8 pitches (the equivalent of 2 per year) by 2015, in addition to the 18 pitches required by 2011,
- the introduction of seven, smaller 'Local Significant Employment Sites', providing a degree of protection from redevelopment for residential

Around 500 comments were received from 58 respondents on the revised draft Core Strategy with the greatest number made by or on behalf of developers. These mostly (1) challenged the Council's proposed reduction in housing numbers, questioning the data which justified this reduction and (2) highlighted a perceived lack of an alternative plan, should the identified sites not come forward.

Progress against the Local Development Scheme

4.7 The Council's development plan timetable is set out in the Local Development Scheme (or LDS), which was formally agreed with the Government Office in August 2006. A number of updates to the LDS have been published to reflect the actual rate of progress on the LDF and changes in national legislation. The most recent update was published in November 2011. This update takes into account the impact of the withdrawal of the submission Core Strategy.

4.8 Table 2 compares the statutory milestones set out in the adopted Local Development Scheme against current estimates. This table has been revised from the previous AMR to reflect the preferred format and information required by the regional Government Office. The table highlights, in common with the majority of Local Planning Authorities, that there has been significant slippage from the timetable submitted to Government. In practice, original estimates of submission dates have proved unrealistic in bringing forward documents that meet the soundness tests as interpreted by the Planning Inspectorate. In Hertsme's case, the Council was the first to submit a Core Strategy in Hertfordshire supported by regional Government Office advice that it had a robust evidence base. However late objections by Government Office to the submitted plan played a significant role in the Core Strategy not proceeding to examination and its eventual withdrawal.

4.9 There still remain uncertainties that could affect the delivery of the LDF programme. While the current

Annual Monitoring Report 2010-2011

Development Plan-led system remains in place, the Government have signalled further planning reforms, which could impact on the current approach to DPD preparation and evidence base requirements. Resources for additional work may also be constrained following the withdrawal of the Housing and Planning Delivery Grant and any changes to priorities implemented as a result of reduced Government funding in the spending review. Given that reforms to the LDF system are under consideration, it is not considered helpful to prepare a revised Local Development Scheme at this stage.

4.10 The Council's website will be kept up to date with any changes to the Local Development Framework timetable.

Table 2: Progress against the Local Development Scheme (as at October 2011)

Development Plan Document	Last stage reached / last consultation (Date and title)	Next stage / next consultation (Date and title)	Commencement		Publication of Submission (Regulation 27)		Submission to SoS (Regulation 30)		Adoption	
	Actual	Planned	"Ineffect" LDS	Actual	"Ineffect" LDS	Planned	"Ineffect" LDS	Planned	"Ineffect" LDS	Planned
Core Strategy (Re-submission)	Revised Core Strategy (regulation 25 reconsultation January 2011)	Regulation 27 Consultation	2005	Sept 2005	June 2007	November 2011	June 2007	March 2012	July 2008	Sept 2012
Site Allocations and Development Management Policies	Issues and Options (2006), Call for sites (November 2008)	Site Allocations (Reg 25 Consultation)	2005	Sept 2005	December 2007	December 2012	Jan 2008	March 2013	March 2009	Sept 2013
Elstree Way Corridor Area Action Plan (Not included in the LDS)		Elstree Way Corridor Area Action Plan (Reg 25 Consultation) July 2012		January 2012		April 2012		May 2012		December 2012

Table 3: Status of current and proposed Supplementary Planning Documents

Document Title	Current Status	Next Stage of Review	Scope and Purpose
Guidance linked to adopted Local Plan and emerging Core Strategy			
Planning Obligations	Adoption - December 2010		Replaces s106 technical note with updated calculations for local planning gain on a variety of topics.
Affordable Housing	Adopted SPD (1st Oct 2008)	December 2011 – Public Consultation on revised draft,	To provide detailed guidance on the application of affordable housing policies
Parking Standards	Adopted SPD (1st Oct 2008)	Revisions(see row below)	Sets out detailed off-street parking standards for residential and non residential development, including provision for disabled spaces and guidance on Green Travel Plans
Parking Standards	SPD amendments Adoption - December 2010		Amended guidance on the discounting of parking provision in accessibility zones
Biodiversity, Trees and Landscape SPD	Adopted SPD December 2010	Adoption - December 2010	Provides advice on potential impacts of development on protected species, habitats, trees and landscape and sets out best practice approaches to mitigate, improve and enhance biodiversity.
Watling Chase Community Forest : A Guide for Developers, Landowners and Users	Adopted SPD 12 June 2003		Sets out overall vision and strategy and links to planning obligations for community forest projects
Planning and Design Guidance			
Part A - Overview and Context	Adopted SPD (1st Nov 2006)		Sets out the Council's standards in relation to development.
Part B - Permitted Development	Adopted SPD (April 2009)		
Part C - Site Appraisal: Design and Access Statements	Adopted SPD (1st Nov 2006)		

Part D - Site Appraisal: Guidelines for Development	Adopted SPD (1st Nov 2006)	Draft review underway. Early 2012	Planned review in light of changes to PPS3 on development density and 'garden land'. May also explore need for guidance on room sizes and back to back distances
Part E - Guidelines for residential extensions and alterations	Adopted SPD (1st Nov 2006)		
Part F - Shopfronts	Adopted SPD March 2011		
Warren Estate, Bushey Heath. Design Guide	Adopted (25th Sept 2003)		Local Design Guidance linked to Conservation area and Article 4 direction
Good Practice Guidance/Advice			
Streetscene Manual	Good Practice Guidance, Adopted 2011		Guidance on hard and soft landscaping and streetscene enhancement
Building Futures (Guide and Website)	Good Practice Guidance Endorsed 12 Nov 2008		Guidance on sustainable development
Elstree Way (LDO area)	Design advice, Adopted February 2011		Design advice published alongside implementation of Local Development Order (LDO)
Area Development Briefs			
Radlett Key Locations	Development Brief with SPD status, Adopted March 2011		Sets out planning policies and assesses development potential of 4 key sites in Radlett centre
Rossway Drive Industrial Estate , Bushey	Development Brief with SPD status	In Preparation	Consultation - early 2012 with adoption by summer 2012
Bhaktidavanta Manor, Letchmore Heath	Development Brief with SPD status	In preparation	Consultation -Early 2012 with adoption by Sept 2012
Elstree Way Corridor Borehamwood Planning and Design Brief	Adopted Development Brief with SPD status (12th June 2003)	Feasibility Study Published, Area Action Plan to Follow	Design-led framework for phased redevelopment of the Elstree Way Corridor

5. Effectiveness of Plan Policies

No.	Title	Target	Information Required	2009/2010	2010/2011	On Target?
1	Effectiveness of Plan Policies	For all policies in the Plan to be up-to date and robust	Total Decisions	1,046	1,254	✓
			Material departures from the Plan called in by the Secretary of State	0	0	
			Plan policies superseded in the last twelve months	0 (please see commentary below)	0 (please see commentary below)	
			Use of plan policies in decision making	136 Policies, 103 (76%) used and 33 (24%) not used (see Appendix 1)	136 Policies, 108 (79%) used and 28 (21%) not used	
2	Planning Agreements	No target set	Agreements Signed	10	23	
			Amount Negotiated	£843,763		
			(on behalf of HBC)	£302,723	£755,521.91	
			(on behalf of HCC)	£541,040		
			Amount Received	£73,898	£148,635	
Amount Spent	£282,032	£81,731				

5.1 One of the key roles of the AMR is to assess the extent to which policies are being successfully implemented in order to identify those which need to be deleted, amended or replaced. Four methods have been identified to assess the effectiveness of existing Plan policies:

- Use of 'Call-in' powers by the Secretary of State (SoS):** The SoS can 'call in' an application to determine whether it represents a material departure from the Plan and is considered to raise issues of more than local importance. All material departures are referred to the Government Office, which decides whether the application is to be called in or to be left to the Local Planning Authority to determine. A high number and/or percentage of call ins could be seen to indicate one of two things:
 - (1) The number of departures from the Plan indicates whether policies should be introduced or amended to help in the determination of further similar applications.
 - (2) The Government Office / SoS do not feel that the Local Planning Authority has sufficiently robust policies in place to determine applications without undermining or prejudicing national policy aims.
- Publication of Government policy, which supersedes existing local policy:** In the course of a given year, central Government will produce a number of Planning Policy Statements, which establish national policy on key issues. This is particularly pertinent at present with the ongoing programme to replace old style Planning Policy Guidance notes with Planning Policy Statements. PPS12 (Local Development Frameworks) states that Development Plan documents should be consistent with national policy and in general conformity with the Regional Spatial Strategy. While national and regional policy is normally considered alongside local adopted policy, it will take precedence if adopted policy is out of date.
- Use of planning policies in the determination of planning applications:** In the current monitoring year, 1,254 applications were determined. By monitoring the frequency with which policies are used in application determination, those that are under utilised can be identified and the reasons for this examined.

- **Negotiation of planning agreements:** The Council actively negotiates for site specific and financial contributions for affordable housing and other community benefits to mitigate the impact of development.

Departures from the adopted Local Plan

- 5.2 In 2010/11 no material departures were called in by the Secretary of State for determination. This would indicate that applications and determinations in the Borough are generally occurring in conformity with the aims of national policy (notably PPG2 on Green Belts in this Borough), notwithstanding that there are known to be a limited number of applications approved which do not strictly conform with adopted policy, such as the development of non-employment uses within designated Employment Areas.

National and Regional Guidance

- 5.3 At national level, PPS3 was revised in June 2010, the main changes were that private residential gardens are now excluded from the definition of previously developed land in Annex B and the national indicative minimum density of 30 dwellings per hectare is deleted from paragraph 47.

Use of Adopted Policies

- 5.5 It has been possible once again to gather comprehensive information on Local Plan policies for the monitoring period and compare it to the previous monitoring period. There are 136 'saved' policies in the Council's Local Plan, following the deletion of 13 policies in September 2007. 108 (79%) of those were used when making decisions, a higher figure to that used in the previous monitoring period.
- 5.6 There has previously been a year on year increase in the number of instances when policies in the Local Plan were used to support decisions made, rising from 2,078 in 2005/06 to 5,554 in 2006/07 to 6,868 in 2007/08. These figures decreased from 4,883 in 2008/09 to 4,322 in 2009/10. However this monitoring period there has been an increase to 4,758. The increase in Local Plan policy usage can, in part, be attributed to the number of applications submitted and also the type of applications that were received. This means that over 82% of the policies have been used in the monitoring year which supports the conclusion that the adopted plan remains relevant and robust.

Use of Planning Agreements

- 5.7 During the monitoring year of 2010/11, ten new Planning Agreements were signed with developers/owners on qualifying applications. £755,521.91 (HBC) was negotiated in total, bringing money into the Borough for improvements to and provision of amenity space, greenways routes, and controlled parking zones.
- 5.8 HCC sustainable transport, education, libraries, childcare. **£302,723** was negotiated for this Council (the rest being payable to Hertfordshire County Council) and this will be spent on projects centred on new and improved Greenways routes, parks and play equipment and controlled parking zones.
- 5.9 A total of **£8,1731.09** has been spent in the monitoring year on projects such as Aberford Park and Café, King George Recreation Ground, Hartspring Meadow, The Moatfield Recreation Ground, Maxwell Park and Shenley Park Bridleway. Full details are shown in Appendix 4.

6. Population and neighbourhoods

No.	Title	Target	Information Required	2009/2010	2010/2011
C1	Resident Satisfaction (2008 survey)	Contextual indicator	% of Hertsmere residents satisfied/dissatisfied with the Borough as a place to live	Very Satisfied 33% Fairly Satisfied /51% Very Dissatisfied 2% Fairly/5% Neither/None 9%	Information not available until early 2012
C2	Population and Age	Contextual indicator	Total population of the Borough within specified age bands	98,900 (mid 2009) 0-14: 18,700 15-29: 17,700 30-44: 21,000 45-59: 19,800 60-74:13,300 75+: 8,400	99,900 (mid 2010) 0-14: 18,900 15-29: 17,700 30-44: 21,100 45-59: 20,200 60-74:13,600 75+: 8,400
C3	Indices of Multiple Deprivation	Contextual indicator	Number / % of Super Output Areas (SOAs) among the 20% most deprived in England	0%	0%
Number / % of SOAs among the 20% most deprived in Hertfordshire			14 (10%)	12 (9%)	

Population and Age Structure

- 6.1 The Borough of Hertsmere covers an area of approximately 38 square miles. Around 80% of the Borough is designated Green Belt, covering the whole Borough outside of the main settlements of Borehamwood, Bushey, Potters Bar and Radlett as well as parts of Elstree.
- 6.2 The most recent Residents Survey was carried out in 2008, which indicated a high level of satisfaction with the District as a place to live (detailed findings of which were reported in the previous 2008/2009 Annual Monitoring Report). Following changes in Government requirements, the Council has no plans to repeat this survey in the near future.
- 6.3 The 2001 Census recorded the population of the Borough at 94,450. This represents an increase of 7.8% since 1991, though this figure is influenced in part by a change to the Borough boundaries in the interim period. The latest available figure is a mid 2010 estimate which puts the population at 99,900.
- 6.4 The Office for National Statistics (ONS) annually produces estimates of the population for all Local Authorities. Since the Census, these figures have seen the population of the Borough revised downwards on two occasions.
- 6.5 ONS have also predicted in 2008 that the borough population would rise to 110,100 by 2021, 116,500 by 2028 and 120,800 by 2033. Based on current trends it would appear that this projection might be a slight underestimate of the actual growth rate.
- 6.6 The age structure of the Borough is broadly comparable to that of Hertfordshire and England (see table 5 below) though Hertsmere has a slightly lower proportion of its total population in the 15-29 age group and a slightly higher percentage of 75 and over age group.

	Total Population	0-14	15-29	30-44	45-59	60-74	75+
England	52,234,300	9,151,100	10,461,800	10,775,600	10,099,300	7,627,100	4,119,400
Hertfordshire	1,107,500	207,100	200,800	244,200	221,700	369,500	86,000
Hertsmere	99,900	18,900	17,700	21,100	20,200	13,600	8,400

Neighbourhood Context - Index of Multiple Deprivation

- 6.7 The most recent Indices of Multiple Deprivation (IMD) was published in March 2011, providing comparable information on deprivation for England. Results were produced by Super Output Area (SOA) as the units are of comparable size (unlike wards, which can vary significantly in size and population). Based on the average IMD score of all the SOAs in the Borough, Hertsmere still ranks 268/354 amongst all the Unitary, District and Borough authorities, placing it in the bottom quartile (25% least deprived)
- 6.8 When ranked nationally on their overall score, none of Hertsmere’s SOAs are amongst the most deprived 20%. 24 are amongst the 20% least deprived. When ranked against all the SOAs in Hertfordshire, 12 of Hertsmere’s SOAs are amongst the most deprived 20% and 7 are amongst the 20% least deprived, a reduction from the previous IMD in 2004.
- 6.9 Deprivation is assessed by Super Output Areas, which can be described as Neighbourhoods. There are a total of 32,482 neighbourhoods in England. These neighbourhoods are ranked according to their level of deprivation. The lower the ranking, the higher the rate of deprivation in the neighbourhood: for example, a neighbourhood ranked as number 1 under a deprivation indicator would be the most deprived in England, while a neighbourhood ranked as number 32,482 would be the least deprived in England.
- 6.10 The ranking of the most deprived neighbourhoods for 2007 has been included below to show whether deprivation has decreased or increased between 2007 and 2010. This ranking is based on a compilation of nine indicators.

Most deprived neighbourhoods in Hertsmere (Overall Deprivation)

Neighbourhood Ranking	Ward	Ranking	
		2010	2007
006C	Borehamwood Cowley Hill	5,092	4,306
006E	Borehamwood Cowley Hill	7,820	8,750
007B	Borehamwood Brookmeadow	8,993	8,683
006A	Borehamwood Cowley Hill	9,252	10,917
009D	Borehamwood Kenilworth	9,270	9,160
011E	Borehamwood Hillside	9,578	10,582

The above list shows improvements in three key areas 006C, 007B and 009D respectively. The area 006C, which includes Leeming Road and Aycliffe Road is part of the Cowley Hill ward. This area has benefited greatly from funding provided by EEDA's Investing in Communities Business Plan and saw a number of exciting training opportunities and school projects being delivered. The area was awarded at least £1million of National Lottery funding. The vision has been to implement new and improved security measures and also to provide updated/new visual features such as street furniture and planting, which will help to create an improved quality of life for residents.

Over the same period, three areas have shown a slight decline 006E, 006A and 011E. These areas will continue to be monitored.

6.11 Hertsmere Borough Council, First Capital Connect, Elstree and Borehamwood Town Council, Hertfordshire Highways, Hertfordshire County Tourism and Leisure Partnership and local volunteer group Elstree Screen Heritage are working together on a town centre improvement scheme for Shenley Road, Borehamwood, which aims to enhance the impression visitors get when visiting Borehamwood. The scheme is funded through a countywide grant, with additional contributions from the Borough and Town Councils and First Capital Connect. The total budget for the scheme is approximately £170,000. The First Impressions Project is using film and television as a unifying theme to enhance the area from the train station, along Shenley Road to Elstree Studios. The proposals being implemented include:

- Hollywood-style stars in the pavement outside the train station
- Relocating film plaques along the route to Elstree Studios
- Film-themed artwork and displays on selected streetlights and in empty shop windows.

7. Housing

National core indicators shaded grey

Housing Development

- 7.1 Despite difficult economic conditions, there remained a relatively high level of development activity during the monitoring year 2010/11. The number of completions (gross) during the monitoring year was 225, a reduction from 2009/10 when it stood at 331.
- 7.2 Indicator 5 relates to Policy H1 of the East of England Plan, which set a build rate for the District amounting to a net addition to housing stock of 250 homes per year or 5,000 homes between 2001-2021. Between 2001 and 2011, 2,384 additional homes were built in the Borough, an average of 238 units per year.
- 7.3 The Local Plan (Policy K2: Development Strategy) aims to direct the majority of development into the Borough's existing main towns. During 2010/11, 86% of housing completions were in Borehamwood, Bushey or Potters Bar. This is in line with the target set for Indicator 8 whereby the majority of residential completions are to take place within the Borough's main towns.

Housing Supply

- 7.4 Since the last AMR the Council has updated the Strategic Housing Land Availability Assessment (SHLAA) for 2010/11. The SHLAA update provides a review of housing supply over the next 15 years to 2027. This includes supply from committed and allocated sites, together with other sites considered deliverable.
- 7.5 PPS3 requires that local authorities identify a five-year supply of housing sites. The Council has set itself a target in the Core Strategy of providing 237 new dwellings a year over the next 15 years. This target will enable the Core Strategy to be in general conformity with the East of England Plan and equates to 1,185 dwellings over a five-year period. The 5-year figure of 1,819 new dwellings identified in the SHLAA update represents 7.6 years supply³. When compared to the East of England Plan target of 250 new dwellings a year, this figure represents 7.3 years supply.
- 7.6 Figure 2 shows a Housing Trajectory based on both short- and long-term sources of supply identified in the SHLAA update. For comparison purposes with previous AMRs, it shows completed and potential supply from 2001 to 2027. It indicates that identified sites could deliver around 224 dwellings per annum over the next 15 years. This does not include any strategic release of land from the Green Belt.
- 7.7 The SHLAA, together with the update, gives full details of commitments and other sites making up the Council's identified housing land supply and can be downloaded from the Council's website.

³ The Council has opted not to use Planning Inspectorate advice on the calculation of a five-year supply as this was withdrawn on 8th July 2010.

Figure 2: Housing Trajectory 2001-2027

Source: Hertsmere Strategic Housing Land Availability Assessment (November 2011)

Development on Previously Developed Land

7.8 Prior to 9th June 2010, PPS3: Housing, the Government set a target for 60% of new homes to be provided on previously developed land (PDL). Due to the Borough’s Green Belt boundaries, which are drawn tightly around the main towns, PDL completions in Hertsmere have historically been high, a fact reflected in the figures above. The Council once again exceeded this target with 99.68% of new housing on PDL in 2010/11. PPS3 was revised on the 9th June 2010 removing private garden land from the definition of “Previously Developed Land”.

Housing Density

7.9 At 29 dph this year, the average density of the Borough’s housing completions shows a slight increase over the last monitoring period (28dph). The average dwellings per hectare in the future should continue to increase reflecting planning policies geared towards the intensification and redevelopment of Brownfield sites. Appendix 3 contains a breakdown of density by settlement.

Affordable Housing and Affordability Indicators

7.10 A total of 20 affordable houses were completed at Girten Road, 19 affordable units at Walton Road and 4 affordable units at Land at Bowmans for a total of 43 new affordable units. This means that the proportion of Affordable Housing completions was 19% for this period, falling from 43% in 2009/10.

7.11 During the monitoring period, there were two qualifying sites for Affordable Housing (any site with 10 or more dwellings); these were Studio Plaza, Elstree Way, Borehamwood and Blackwell House, Aldenham Road, Bushey. There were 85 units in total agreed for Studio Plaza with 100% being affordable housing. Blackwell House had 121 units in total agreed and out of those 42 units were affordable. This Council therefore achieved 25% of Affordable Housing on all qualifying sites, which, meets the target of at least 25%.

- 7.12 It has not been possible to collect house sale price data for the Borough on a month-by-month basis for the monitoring period and so an overall yearly average cannot be provided. However, quarterly information is available and the average cost of a semi detached house in the Borough was at its lowest during the first quartile of 2009/10 at £289,050 and at its highest during the fourth quartile at £332,007. The cost of a detached house in Hertsmere has steadily increased from £856,831 in 2008/09 to £1,449,499 in 2010/11. In 2001/02 the average price of a semi detached house in Hertsmere was £199,123. Since then, there has been a year on year increase in house prices and up to the current monitoring period the price of a semi-detached house is £354,335.
- 7.13 The average annual wage in the Borough during the most recent monitoring period was £31,584. This is a decrease of 1% on 2008/09 when it was recorded at £33,278 and a further decrease of 5% on 2009/10 when the average wage was at £32,919.
- 7.14 A Strategic Housing Market Assessment has been completed in conjunction with other Local Authorities in the London Commuter Belt sub-region. The SHMA brings together population, income and housing market trends to arrive at estimates of future Affordable Housing requirements. However, because of the many uncertainties in modelling future demand, it is considered most relevant as providing an overview of key housing issues rather than target setting in development plan policy.

Gypsy and Traveller Sites

- 7.15 There are 55 authorised gypsy pitches in the Borough of which two are public sites (see below) and 1 unauthorised pitch. Existing provision consists of sites at:

- South Mimms, Hertfordshire County Council owned transit site 15 pitches
- Sandy Lane, Bushey Hertfordshire County Council owned permanent site 27 pitches
- Hillfield Lane, Patchetts Green privately owned temporary site 1 pitch
- Barnet Road, Potters Bar (known as The Pylons), privately owned permanent site 12 pitches
- Shenleybury Cottages 1 unauthorised Pitch

8. Employment

Economic Context

- 8.1 The ONS model-based estimated unemployment rate has been used for Hertsmere (blue trend line). The graph shows figures for April 2010-March 2011. The rate is not significantly different from the historic unemployment rate for April 2006-March 2007. From April 2008-March 2009 to April 2009-March 2010, the unemployment rate for Hertsmere changed by 1.2 percentage points, the largest change during the four-year period of analysis. The largest change in the unemployment rate for Hertfordshire was by 1.9 percentage points from over the same period.
- 8.2 The Borough's employment base is predominantly weighted towards Finance, Transportation and Distribution, Social Work and Restaurants. At the moment roughly 10.87 % of jobs are in manufacturing (see table 5). Analysis of the local economy in a recent Employment Land Study indicates that on the basis of past trends, there are good prospects for a recovery in job growth. However, the on-going recession continues to put a damper on potential job growth.

Figure 3: Unemployment Trends April 2006- March 2011.

Source ONS: Unemployed Claimant Count

Table 5: Employment by Sector (2010)

Hertsmere Employment by Sector	Jobs	%
Agriculture	423	1.13%
Manufacturing	4077	10.87%

Health and Social Work	4270	11.38%
Other	3010	8.03%
Total	37,507	100%

Commercial Development Activity

- 8.3 There was a small increase in new employment and commercial development during 2010/11. The only major employment premises completed in this period were new laboratories for the National Institute of Biological Standards and Controls (2,100sqm). This was to provide a new influenza research centre that opened in October 2010.
- 8.4 The limited amount of development is to be expected given the impact of economic slowdown on developers and businesses. There is also a level of vacant office stock in Borehamwood and Potters Bar, which makes it unlikely that speculative employment development will come forward in the near future.

Employment Land designated in Development Plans

- 8.5 There are 6 designated Employment Areas in the Borough, totalling 104ha, specifically zoned for offices, industrial and warehousing uses. There is a further 100ha in non-designated employment land and commercial premises. The Council is also proposing to identify in the submission Core Strategy a series of *significant local employment sites* to be protected for employment use (see table 6).
- 8.6 The Council has introduced a Local Development Order (LDO) covering the Elstree Way Employment area, The LDO will allow occupiers and landlords to make limited extensions and changes to premises without the need for planning permission
- 8.7 The Council has also identified an important regeneration area in the Elstree Way Corridor, which is the subject of a Masterplanning and Feasibility Study. The Council intends to produce a Area Action Plan for the area, This area is centred on the Civic Offices and land north and south of Elstree Way, including sites owned by Hertsmere Borough Council, the County Council and Affinity Sutton Housing Association. There is considerable potential in this location for the relocation, co-location and consolidation of a number of public service users and the feasibility study has been testing a number of residential-led regeneration options for the area. A separate traffic study is considering the scope for significant highway improvements within and beyond the Elstree Way area.

*Borehamwood Enterprise Centre, Borehamwood Wrotham Business Park – Wrotham Park Theobald Court and adjoining sites, Borehamwood Lismirrane Industrial Park, Elstree Hollies Way Business Park, Potters Bar Beaumont Gate, Radlett Sites around Farm Close, Shenley		

Loss of Employment Land

- 8.8 Only one development during the monitoring year involved the loss of industrial land. This was the redevelopment of the Walton Road Industrial Estate in Bushey (1.3ha), which was not an Allocated Employment Area. However, the Council has been receiving an increasing number of enquiries and pre-applications for redevelopment or changes of use to vacant office and industrial premises to residential development.

Supply of Employment Land

- 8.9 No major employment related schemes (over 1,000sqm) were granted during 2010/11.

Issues for Future Monitoring

- 8.10 Since the introduction of local indicators in the AMR, the key issues regarding allocated employment land have moved away from a potential over-supply of offices to a need to retain, manage and improve the existing stock. Given the shortage of new sites, it will be more important to resist redevelopment for non-employment uses.

9. Retail, Commercial and Leisure Development

National core indicators shaded grey

No.	Title	Target	Information Required	2009/2010	2010/2011	On Target?

Retail Context

- 9.1 Figure 4 illustrates the distribution of retail floorspace across the District based on the location types in National Planning Guidance (PPS4). The submission Core Strategy directs development within designated town, district or neighbourhood centres in Borehamwood, Potters Bar, Bushey and Radlett. There is one small out of centre retail warehouse park at Stirling Corner, Borehamwood, which has recently closed down. This is due to be reopened as a new multi-national supermarket. There are three out of town retail locations that are relatively specialised in their retail offer. These include Costco near Bushey, Battlers Green Farm near Radlett and retail units at the Willows Farm Park family attraction.
- 9.2 In terms of the Core Strategy, the Council is not proposing to allocate any new major retail sites in the District. A retail topic paper was published in August 2009, which draws on retail surveys from surrounding districts to support this position.

Retail and Leisure Development Activity in 2010-11

- 9.3 For the current monitoring period 1st April 2010 to 31st March 2011, the July 2010 Retail Survey remains as the most recent survey undertaken and there has therefore been no change recorded in this area. There has been an overall loss in completed new retail floorspace in the A1 and A4 use classes. This means that overall net losses, for this monitoring period have been greater than overall net additional gains in these two areas. Two of the main reasons for the losses in A1 floorspace are the demolition of retail & residential units at 61-73 Shenley Road, Borehamwood, as well as the change of use from retail to a bank at Unit 3e

Borehamwood Shopping Park. However, there has been a net gain of 513sqm in A5 floorspace (takeaways) and a net gain of 513sqm in A3 (restaurants and cafes).

- 9.4 Recent development works in Stirling Corner have amalgamated four retail units (which had been closed) into one unit with the opening of Morrison’s supermarket at Stirling Park, Borehamwood earlier this year. This development has provided 17,900sqm of additional retail (A1) floorspace, and is located to the west side of the A1 and to the northwest corner of the Stirling Corner junction between Barnet Road and the A1/Stirling Way.

Figure 4: Distribution of Retail Floorspace

Source: District Monitoring/ Valuation Office data

- 9.5 For the same period, there have also been net losses in new B class floor space provided, with the only exception being a net gain of 863sqm in B0 (mixed use class). Most of the losses of B1 floorspace have been at Unit 710 Centennial Park, Elstree (with a proposed loss of 980sqm) as well as a loss resulting from the change of use from B1/B2 to B8 at Units 5 & 6b, Cranborne Industrial Estate, Potters Bar.
- 9.6 There has also been a gain of 1045sqm in D1 floorspace resulting from a change of use at Unit 514 Centennial Avenue, Centennial Park, Elstree from offices to ‘office (B1) and training use (D1)’ as well as a change of use at Orchard House, Mutton Lane, Potters Bar, from ‘retail & social club’ to ‘retail and dentist’. The Assembly and Leisure use class (D2) has gained a small increase in net floorspace (12sqm) resulting from a replacement storage building at the Potters Bar Petanque Club.

Shop Units and Floorspace in Town Centres

- 9.7 The adopted Local Plan identifies a hierarchy of shopping centres ranging from Town Centres, and District Centres to Neighbourhood centres, local parades and individual shops. Borehamwood, Potters Bar and Bushey are identified as the main town centres. The Council’s retail monitoring indicates that these identified centres contain 610 shop units out of a total of 885 across the District. Since the previous survey in February 2009, the proportion of A1 shop units in these town centres has fallen from 57% to 55%.
- 9.8 Saved policy T6 seeks to resist an over-concentration of non-retail units defined as two non-retail uses in a line of six adjacent premises. This has been used as the basis of a local target to retain 66% of units in shop (A1) use. Recent trends show that the proportion of shop uses from this target benchmark continues to decline. The findings of the 2010 survey show no change in this trend declining and this is

likely to reflect the impact of the recession in individual centres. The Core Strategy highlights that consideration is to be given to the identification of primary and secondary frontages in the Site Allocations DPD, which would allow greater control over the loss of shops to other uses.

- 9.9 There has been a rise in vacant shops in the town centres from 15 to 33 units, which is likely to reflect the impact of the current recession. This represents 5.6% of the total number of vacant shop units. Vacancy in all Great Britain shopping centres stood at just around 8.5% at the end of 2009, compared to a national high street average of over 12%⁴. Overall, the level of town centre vacancies suggest that Hertsmere's centres are weathering the recession.

Issues for Future Monitoring

- 9.10 In general, overall changes in the amount of retail floorspace, are less significant than the levels of vacancy and mix of shop/non-shop uses. The Council published a Retail Study in July 2008 as part of the LDF evidence base. The study presents a range of indicators used to assess the vitality and viability of the main retail centres in the Borough. These are based on the current 'health check' indicators published in National Guidance (PPS4). These will continue to be the focus for future monitoring.

25	Greenways	To provide at least one new route or sections of route(s) per year	Number / length of Greenways and crossings implemented	1,500 metres, the Shenley Park Greenway link (new Shenley 038 Bridleway)		✓
C5	Traffic Counts	Contextual Indicator	Counts in key locations	See figure 5	See figure 5	

Sustainable Transport and Accessibility

- 10.1 Policies in the submission Core Strategy seek to reduce car dependency and manage traffic growth. Planning Policy can influence this through the location of new development, policies on parking provision and Green Travel Plans and support for public transport and measures to provide alternatives to the private car.
- 10.2 Monitoring of road traffic flows at congestion hot spots has been included in the AMR to provide contextual information for these indicators. A wide range of factors affects traffic movement across the Borough and it is difficult to make attribution to any single cause. For this reason, traffic count data gives a mixed picture. The chart below shows that traffic flows in three key locations have increased over the last year and three have decreased over the same period. The Watling Street route now shows a decrease, compared to the general incremental increase since this information was first collected in 2004/05. As in the last monitoring period, the most significant increases in traffic volumes have been at Elstree Hill North and Southgate Road. Over the last three years Elstree Hill North continues to record an increase in traffic flow, which will be closely monitored. Although the most significant annual reduction in 2009 was on Southgate Road with a reduction of 9.5%, this route has shown the most significant increase in traffic over that last two periods. Figure 5 illustrates this trend between 2009 and 2011. These counts will always be naturally erratic from year to year but traffic levels in London Road and St Albans Road continue to show a reduction 3% and 4% respectively. However, levels in Theobald Street have recorded a slight increase this period.

Figure 5: Traffic Counts in key locations (2006-2011)

Parking Provision in new Development

- 10.3 Revised Parking Standards were adopted following public consultation in 2010. The SPD established local standards for car and cycle parking in residential and non-residential development and an approach to discounting these standards in more accessible areas and on certain other types of schemes. It also

contains guidance on design and layout of parking. The SPD is intended as guidance to support policy M13 of the Hertsmere Local Plan and policy CS21 in the emerging Core Strategy.

- 10.4 Information from planning applications granted in the monitoring year show that for residential units in town centres, 1.27 spaces per dwelling were approved. The reduction in average parking provision from the previous year can be largely attributed to the Studio Plaza redevelopment in Borehamwood, which resulted in the approval of 85 new dwellings with 95 car parking spaces, at an average of 1.1 spaces per unit. There have been local concerns that recent housing developments built and occupied to this level of off-street parking provision are creating parking issues. Revisions to Supplementary Guidance were published in June 2010 to allow for more flexibility in determining whether a discount should be applied in accessible areas but this occurred after the application for the redevelopment of Studio Plaza was received. The changes, however, give more scope to take into account factors such as design and layout of parking and local pressure on on-street parking.
- 10.5 The Council will continue to monitor through the AMR the outcomes from the adopted SPD and the impact of the revisions.

Figure 6: Parking Provision Approved on Residential Developments

Travel Plans and Greenways

- 10.6 The promotion of Greenways as an increasingly important alternative to the private car will require the continued identification of new links to the proposed Greenways network, as well as to existing or proposed public transport facilities. Saved local plan policy M9 and policy CS23 in the submission Core Strategy supports this process. During the monitoring year, 1500sqm of new route was completed as part of the Shenley Park Bridleway.
- 10.7 Guidance in the Core Strategy indicates that the Council will seek Travel Plans on major non-residential developments and residential schemes over 80 units. There were five Green Travel Plans on major developments approved in the monitoring year. These were for the Cooperscroft, Coopers Lane Road, Potters Bar, Blackwell House, Bushey, Clare Hall Laboratories, South Mimms, 96 Shenley Road, Borhamwood, and Colney Fields, London Colney.

11. Environmental Quality

National core indicators shaded grey

Environmental Quality

- 11.1 During the monitoring period, the Environment Agency was consulted on a total of 36 applications and objections were raised objections on 7. Five applications with initial objections provided further information, which allowed the Environment Agency to withdraw their objections. However, the remaining two applications with EA objections were refused by this Council and then subsequently dismissed on appeal.
- 11.2 At the end of 2010/11, there were 138 sites in Hertsmere designated for their intrinsic environmental value including two Sites of Special Scientific Interest (SSSIs) and 130 local wildlife sites. Since the last AMR, the Herts Biological Records Centre have been revising and refining this dataset to avoid double-counting of statutory reserves and local sites which fall within district boundaries. There has been no change to the areas of biodiversity importance. Data cannot be compared with the previous AMR and the figures now reported reflect the exact numbers and areas of sites within the Borough.
- 11.3 The UK Government has set a national target for 15% of energy requirements to be provided from renewable sources by 2020. Policy CS15 in the submission Core Strategy seeks to ensure that on larger developments, measures are included to offset at least 10% of total predicted carbon emissions. No specific renewable energy installations were recorded during the monitoring year. However, since spring 2009, most domestic solar panels can be installed under permitted development. The Council is currently looking at ways in which information on renewables can be collated.
- 11.4 80% of Hertsmere is designated as Green Belt. Government guidance on Green Belt Land is contained in PPG2, which states that the “essential characteristic of Green Belts is their permanence” and that their

boundaries should be defensible in the long term. No changes to the adopted Green Belt boundary Green Belt or major development contrary to Green Belt policy were established in the monitoring year.

Heritage Assets and Conservation Areas

- 11.5 The 2010 Buildings at Risk East of England Register, contains only one (from last year) listing for Hertsmere -Delrow Cottage, Hillfield Lane, Patchetts Green is still at risk.
- 11.6 Hertsmere maintains a Local List that contains identified buildings of local historic interest. In total, there are 372 entries on the Local List consisting of over 600 structures.
- 11.7 There are fifteen Conservation Areas (CA) in Hertsmere. It is important to ensure that the character of these areas is maintained and, as such, consents for demolition should not be granted without first securing an appropriate replacement scheme. A Conservation Area Appraisal has been completed at Bushey High Street and has resulted in the splitting of the existing Conservation Area into two to create a Bushey High Street CA and a new Melbourne Road CA. An appraisal was also undertaken for the Radlett North CA during the monitoring period, whilst work on an appraisal of the Radlett South CA was commenced. The Shenley Tower CA was de-designated in April 2010.

Recycling of Demolition/Construction Waste

- 11.8 There were 10 major applications on Previously Developed Land in total approved during the monitoring period. Of that 10, only 3 had a condition to ensure the recycling of demolition and/or construction waste. A specific report was set up in 2006 and the Council introduced a standard condition for this indicator, which has allowed the data collection process to be much easier. The latest figure of 30% is a reduction on the previous year once again and whilst the reasons for this are unclear, the change is particularly disappointing. This particular Indicator and its results have been brought to the attention of both the Head of Planning and Building Control and the Development Control Manager. It is therefore anticipated that a much higher figure will be reported in the next Annual Monitoring Report.

Works to Trees

- 11.9 Tree Preservation Orders (TPOs) are used to protect individual or groups of trees which are considered to be of particular value and that make an important contribution to the character of an area. No new Orders were confirmed for this period, however, two new TPOs were served – Scrbbits Wood and Byron Avenue. This period 111 applications were made for works to trees with a Tree Preservation Order, of which 77 were granted consent and 34 were refused.

12. Future Monitoring

- 12.1 The Localism Bill received royal assent on Tuesday, 15 November 2011. Following this announcement by the new coalition Government, there will be an opportunity to review the scope and content of future AMRs. The most significant change is the revocation of the regional level of development plans. From the outset, the structure of AMRs has reflected national and regional priorities through encouraging Local Authorities to collect a set of 'Core Indicators'. The incentive for reporting on these indicators has in turn been linked to the calculation of Housing and Planning Delivery Grants. In other cases, Core Indicators have been used to encourage Local Authorities to resource and collect new data, which was not previously available to Government. This approach has now been largely 'swept away' and will create an opportunity for Local Authorities to refocus data collection on key areas of local concern.
- 12.2 However it should be noted that current planning legislation retains the need to produce AMRs as part of the Local Development Framework process and the monitoring role of the AMR is already written into policies in the draft Core Strategy. PPS3 still retains a need to demonstrate a five-year housing supply. With the introduction of a New Homes Bonus (NHB), monitoring housing completions will remain an important indicator for direct reporting to Government. The latest proposals indicate the Council Tax Base will be used to calculate NHB, but development information will be a guide to estimating future allocations.
- 12.3 The scope of AMRs is now being reviewed to support the monitoring and implementation framework set out in the Council's revised Core Strategy. Instead of monitoring against Regional Plan targets, new targets will be set in the Core Strategy. Aside from housing completions and supply, a number of other key local areas will likely be as follows:
- Retention of employment land
 - The impact of changes in national guidance (e.g. density policy in PPS3)
 - Backland development
 - Sustainability indicators (recycling of land)
 - Indicators linked to health of Town Centres
 - Impact of the Local Development Order
 - Parking provision
 - Evidence on the effectiveness of development management policies.
- 12.4 Improved Monitoring at town and neighbourhood level is likely to become more important as a result of the introduction of the Localism Bill. The Department for Communities and Local Government has announced that the Localism Act will "trigger the biggest transfer of power in a generation".

Improvements to Monitoring Processes

- 12.5 The Council will continue to review procedures and systems in order to fully meet requirements in future years and make the process more efficient. In particular, the Policy Monitoring Officer has created a Monitoring Form for Planning Officers to complete once an application has been granted. The form contains columns for the input of key data, such as approved floorspace, parking spaces, density etc. to be recorded throughout the year. The purpose of this Monitoring Form is to simplify data collection for the indicators in the AMR.
- 12.6 The Council also subscribes to a Countywide Monitoring Database, which is intended to improve the exchange and availability of information to Districts. This system was rolled out across the County during the course of 2010/11 and was used to validate and to compile the 2010/11 Annual Monitoring Report. The new system is capable of monitoring both schemes in the planning system and SHLAA sites and allows district officers to run custom reports from a shared countywide database.

Appendix 3: Average Densities Across the Borough by Town & District Centres and Elsewhere Completions by area 1st April 2010 – 31st March 2011

Area	Units built in year	Pro rata area (ha)	Density
Borehamwood	8	0.13	62
Bushey	175	2.97	59
Elstree	3	0.417	7
Potters Bar (not incl Darkes Ln and High St which form part of the town/district centre)	6	0.15	41
Radlett	29	2.91	10
Shenley	2	1.05	2
Other	2	0.05	39

Total average in **Borough** overall: 225units/9.31ha = 24dph

Total average dph in **town/district centres**: (in red): 189units/3.24dph= 58dph

Total average **elsewhere**: 42units/7.46ha = 5.63dph

Total average **elsewhere**: 16units/2.39ha = 6.69dph

If a particular area is not mentioned above, there were no completed units within the monitoring period to calculate.
