

APPENDIX A

**Treasury Management
Strategy Statement
2015/16
And Prudential
Indicators 2015/16 to
2017/18**

TREASURY MANAGEMENT STRATEGY STATEMENT

1. Introduction

- 1.1. This Treasury Management Strategy statement (TMS) has been compiled in accordance with the Chartered Institute of Public Finance and Accountancy's (CIPFA) Code of Practice (the code) on Treasury Management (revised 2011). Accordingly, the Council's TMS will be approved annually by the full Council. In addition the mid-year, outturn and monthly monitoring reports will be reviewed by councillors in scrutiny functions at the Financial Monitoring Panel. These mid-year and outturn reports will also be presented to the Executive together with the Treasury management strategy. The aim of these reporting arrangements is to ensure that those with ultimate responsibility for the treasury management function understand fully the implications of treasury management policies and activities, and that those implementing policies and executing transactions have properly fulfilled their responsibilities with regard to delegation and reporting.
- 1.2. It is a statutory requirement under Section 33 of the Local Government Finance Act 1992, for the Council to produce a balanced budget. In particular, Section 32 requires a local authority to calculate its budget requirement for each financial year to include the revenue costs that flow from capital financing decisions. This, therefore, means that increases in capital expenditure must be limited to a level whereby increases in charges to revenue from: -
1. increases in interest charges caused by increased borrowing to finance additional capital expenditure, and
 2. any increases in running costs from new capital projects are limited to a level which is affordable within the projected income of the Council for the foreseeable future.
- 1.3. This Council has adopted the following reporting arrangements in accordance with the requirements of the revised Code, which is detailed further in paragraph 12.

Area of Responsibility	Council/ Committee/ Officer	Frequency
Treasury Management Strategy and Annual Investment Strategy	Financial Monitoring Panel- Scrutiny Full council -Approval	Annually before the start of the year
Treasury Management–mid-year report	Financial Monitoring Panel – Scrutiny Executive – Approval	Annually by 31 December each year
Annual Treasury Outturn Report - Review	Financial Monitoring Panel – Scrutiny Executive - Approval	Annually by 30 September after the end of the year

Area of Responsibility	Council/ Committee/ Officer	Frequency
Treasury Management Monitoring Reports	Financial Monitoring Panel	Monthly

- 1.4. The Local Government Act 2003 (the Act) and supporting regulations requires the Council to 'have regard to' the CIPFA Prudential Code and the CIPFA Treasury Management Code of Practice to set Prudential and Treasury Indicators for the next three years to ensure that the Council's capital investment plans are affordable, prudent and sustainable.
- 1.5. The Act therefore requires the Council to set out its treasury strategy for investments and borrowing and to prepare an Annual Investment Strategy (as required by Investment Guidance issued subsequent to the Act) included as paragraph 8 of this report; this sets out the Council's policies for managing its investments and for giving priority to the security and liquidity of those investments.
- 1.6. The suggested strategy for 2015/16 in respect of the following aspects of the treasury management function is based upon the treasury officers' views on interest rates, supplemented with leading market forecasts provided by the Council's treasury adviser, Capita Asset Services (Previously known as Sector Treasury Services).

2. Treasury Management Strategy for 2015/16

- 2.1. The strategy for 2015/16 covers two main areas:

Capital

- the capital plans and the prudential indicators;
- the minimum revenue provision (MRP)

Revenue, Policy and Procedures

- the current treasury position;
- treasury indicators which limit the treasury risk and activities of the Council;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- the investment strategy;
- creditworthiness policy; and
- policy on use of external advisors.

These elements cover the requirements of the Local Government Act 2003, the CIPFA Prudential Code, CLG MRP Guidance, the CIPFA Treasury Management Code and CLG Investment Guidance.

3. Training

- 3.1. The CIPFA Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny and training will be provided as necessary.

4. Treasury management advisors

- 4.1. The Council uses Capita Asset Service as its external treasury management expert advice.
- 4.2. The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon our external advisors.
- 4.3. It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources.

5. The Capital Prudential Indicators 2015/16 – 2017/18

- 5.1. The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in prudential indicators, which are designed to assist member's overview and confirm capital expenditure plans.

5.2. Capital expenditure

- 5.2.1. This prudential indicator is a summary of the Council's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle. Members are asked to approve the capital expenditure forecasts:

Capital expenditure £'000	2014/15 Original Budget	2014/15 Revised Budget	2015/16 Estimate	2016/17 Estimate	2016/18 Estimate
Central Services	288	316	449	0	0
Cultural, Social & Related Services	872	604	713	1,068	48
Environmental Services	561	407	866	0	0
Highways, Roads & Transport Services	1,074	330	754	0	0
Housing Services	1,821	1,119	1,583	0	0
Planning & development Services	171	81	274	0	0
Total	4,787	2,857	4,639	1,068	48

5.2.2. The main variances between the original budget for 2014/15 and revised budget are as a result of delays in capital expenditure which have been carried forward in to 2015/16. The most notable schemes are “Buckingham Road – Houses” (£927k), “Hackney Close Houses (£404k) which are now anticipated to be spent in 2015/16.

5.2.3. The table below summarises the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

Capital expenditure £'000	2014/15 Original Estimate	2014/15 Revised Budget	2015/16 Estimate	2016/17 Estimate	2017/18 Estimate
Financed by:					
Capital receipts	3,566	810	3,384	1,068	48
Capital grants	0	839	0	0	0
Revenue	1,221	1,208	1,255	0	0
Borrowing	0	0	0	0	0
Net financing need for the year	4,787	2,857	4,639	1,068	48

5.3. The Council’s borrowing need (the Capital Financing Requirement)

5.3.1. The second prudential indicator is the Council’s Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources after taking into account adjustment A. It is essentially a measure of the Council’s underlying borrowing need. Any capital expenditure above, which has not immediately been paid for, will increase the CFR.

5.3.2. The CFR does not increase indefinitely, as the minimum revenue provision (MRP) is a statutory annual revenue charge which broadly reduces the borrowing need in line with each assets life.

5.3.3. The Council is asked to approve the CFR projections below:

£m	2014/15 Estimate	2015/16 Estimate	2016/17 Estimate	2017/18 Estimate
Previous Year CFR B/Fwd	0	0	0	0
Movement in CFR in the Year	0	0	0	0
Total CFR	0	0	0	0

5.3.4. Currently the Council has a nil CFR, because all expenditure has been or will be met from capital or revenue reserves. Capital reserves are at a very low level. Therefore, when the second phase of Elstree Film Studio is approved, it likely that we will seek to fund the whole development (including phase 1) from future revenue streams arising from the project. This would result in a future CFR and

resulting Minimum Revenue Provision (paragraph 5.4).

5.4. **Minimum revenue provision (MRP) policy statement**

- 5.4.1. The Council is required to pay off an element of the accumulated General Fund capital spend each year (the CFR) through a revenue charge (the minimum revenue provision - MRP), although it is also allowed to undertake additional voluntary payments if required (voluntary revenue provision - VRP).
- 5.4.2. CLG regulations have been issued which require the full Council to approve an MRP Statement in advance of each year. A variety of options are provided to councils, so long as there is a prudent provision. The Council is recommended to approve the following MRP Statement.
- 5.4.3. For capital expenditure incurred before 1 April 2008 or which in the future will be Supported Capital Expenditure, the MRP policy will be:

- **Option 1 – Regulatory Method** - MRP will follow the existing practice outlined in former CLG regulations (i.e. CFR is calculated after Adjustment A)

From 1 April 2008 for all unsupported borrowing the MRP policy will be

- **Option 3 - Asset life method** – MRP will be based on the estimated life of the assets, in accordance with the proposed regulations (this option must be applied for any expenditure capitalised under a Capitalisation Direction) (option 3);

These options provide for a reduction in the borrowing need over approximately the asset's life.

- 5.4.4. The Council would not be required to make an MRP until the financial year following completion of Phase II of the development of Elstree Studio's.
- 5.4.5. As an authority who participates in LAMS using the cash backed option, the mortgage lenders require a five year deposit from the local authority to match the five year life of the indemnity. The deposit placed with the mortgage lender provides an integral part of the mortgage lending, and is treated as capital expenditure and a loan to a third party. The Capital Financing Requirement (CFR) will increase by the amount of the total indemnity. However, as an Earmarked Reserve (Capital Adjustment Account) will be created to fund this expenditure, the CFR will reduce down again.

5.5. **Core funds and expected investment balances**

- 5.5.1. The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an on-going impact on investments unless resources are supplemented each year from new sources (asset sales etc.). Detailed below are estimates of the year end balances for each resource and anticipated day to day cash flow balances.

Year End Resources £m	2014/15 Forecast	2015/16 Estimate	2016/17 Estimate	2017/18 Estimate
Total core funds	11.7	9.9	9.0	9.0
Working capital	8.3	3.4	3.0	3.0
Expected investments	20.0	13.3	12.0	12.0

5.5.2. The current level of working capital is expected to reduce due to revaluations of a number of business rates properties. As the council has made a provision for these anticipated debts the money is classed as working capital as it is expected to be paid in the near future.

5.6. Affordability prudential indicators

5.6.1. The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators:

5.6.2. **Ratio of financing costs to net revenue stream.** This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream. The estimates of financing costs include current commitments and the proposals in this budget report.

5.6.3. **Incremental impact of capital investment decisions on council tax.** This indicator identifies the revenue costs associated with proposed changes to the three year capital programme recommended in this budget report compared to the Council's existing approved commitments and current plans. The assumptions are based on the budget, but will invariably include some estimates, such as the level of Government support, which are not published over a three year period.

	2013/14 Actual	2014/15 Forecast	2015/15 Estimate	2016/17 Estimate	2017/18 Estimate
Ratio of financing costs to net revenue	-1.96%	-1.53%	-1.36%	-1.33%	-1.50%
Incremental impact of capital investment decisions on council tax	£1.24	-£0.54	£1.28	£0.31	£0.18

5.7. **Borrowing**

5.7.1. **Current portfolio position:**

5.7.2. The Council's anticipated Treasury position at 31 March 2015, with forward projections are summarised below.

£m	2014/15 Forecast	2015/16 Estimate	2016/17 Estimate	2017/18 Estimate
Actual gross debt at 31 March	1.0	0.8	0.6	0.4
The Capital Financing Requirement	0	0	0	0

Under / (over) borrowing	(1.0)	(0.8)	(0.6)	(0.4)
---------------------------------	--------------	--------------	--------------	--------------

5.7.3. The £1m loan as per the table above has been borrowed from the Local Enterprise Partnership (LEP) at a rate of 1.30% for 5 years. The loan will be repaid in equal instalments over the five years. The purpose of this loan is to help finance the development of phase 1 of the Elstree Studio's mound site.

5.7.4. The Council needs to ensure that its gross debt does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2014/15 and the following two financial years. Paragraph 5.3.4 indicates that the CFR will increase in the near future, subject the Council approving phase 2 of the Elstree Film Studios project.

5.7.5. On that basis, the Director of Resources reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

5.8. **Treasury Indicators: limits to borrowing activity**

5.9. It is a statutory duty under S.3 of the Local Government Act 2003, and supporting regulations, for the Council to determine and keep under review how much it can afford to borrow. The amount so determined is termed the "Affordable Borrowing Limit". In England and Wales the Authorised limit represents the legislative limit in the Act.

5.10. The Council must have regard to The Prudential Code when setting its Affordable Borrowing Limit, which essentially requires it to ensure that total capital investment remains within sustainable limits and, in particular, that the impact upon its future Council Tax levels is 'acceptable'.

5.11. Whilst termed an "Affordable Borrowing Limit", the capital plans to be considered for inclusion incorporate those planned to be financed by both external borrowing and other forms of liability, such as credit arrangements. The affordable borrowing

limit is to be set, on a rolling basis, for the forthcoming financial year and two successive financial years.

5.12. **The operational boundary.** This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt.

5.13. **The authorised limit for external debt.** A further key prudential indicator represents a control on the maximum level of borrowing. This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

1. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although this power has not yet been exercised.
2. The Council is asked to approve the following authorised limit:

£m	2014/15 Estimate	2015/16 Estimate	2016/17 Estimate	2017/18 Estimate
Operational Boundary	18	18	18	18
Authorised Limit	20	20	20	20

5.14. Borrowing strategy

5.15. The Council is likely to borrow once Phase II of the redevelopment of the Mound project at EFS has been agreed. The exact timing will depend on the project timescales, projected borrowing rates and cashflow requirements.

5.16. Treasury management limits on activity

5.16.1. There are three debt related treasury activity limits. The purpose of these are to restrain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest rates. However, if these are set to be too restrictive they will impair the opportunities to reduce costs/improve performance. The indicators are:

- Upper limits on variable interest rate exposure. This identifies a maximum limit for variable interest rates based upon the debt position net of investments;
- Upper limits on fixed interest rate exposure. This is similar to the previous indicator and covers a maximum limit on fixed interest rates;

- Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large fixed rate sums falling due for refinancing, and are required for upper and lower limits. The Council is asked to approve the following treasury indicators and limits:

	2015/16	2016/17	2017/18
Interest rate exposures			
	Upper	Upper	Upper
Borrowing - Variable	30%	30%	30%
Borrowing -Fixed	100%	100%	100%
Investments –Variable	75%	75%	75%
Investments - Fixed	100%	100%	100%
Maturity structure of fixed interest rate borrowing 2015/16			
	Lower	Upper	
Under 12 months	0%	100%	
12 months to 2 years	0%	100%	
2 years to 5 years	0%	100%	
5 years to 10 years	0%	100%	
10 years and above	0%	100%	
Maturity structure of variable interest rate borrowing 2015/16			
	Lower	Upper	
Under 12 months	0%	100%	
12 months to 2 years	0%	100%	
2 years to 5 years	0%	100%	
5 years to 10 years	0%	100%	
10 years and above	0%	100%	

5.17. Policy on borrowing in advance of need

- 5.17.1. The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

5.18. Treasury management: Principal sums invested and maturity

This indicator shows the maximum the Council expects to invest for periods longer than 364 days at any point in time and maturity structure of those investments. It shows the Council's exposure to the possibility of loss that might arise as a result of it having to seek early repayment or redemption of principal sums invested.

Maximum principal sums invested > 364 days			
£m	2014/15	2015/16	2016/17
Principal sums invested > 364 days	£5m	£5m	£5m

6. Current Portfolio Position

6.1. The weighted average investment portfolio from April 2014 to November 2014 is £34.9m. Listed below are the year end investment balances and the rate of return for the financial year 2014/2015 up to 30 November 2014 together with a comparison of the position at 2013/14 year end:

	31 March 2014	30 November 2014
Investment Portfolio Actual As At	£25.5m	£34.8m
	1 April 2013 to 31 March 2014	1 April 2014 to 30 November 2014
Average return core on investments	0.76%	0.68%

6.2. The average return on investments achieved between 01 April 2014 and 30th November 2014 is 0.68%.

7. Annual Investment Strategy

The Council’s investment policy has regard to the CLG’s Guidance on Local Government Investments (“the Guidance”) and the revised CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes (“the CIPFA TM Code”). The Council’s investment priorities will be:

- (a) the Security of capital;
- (b) the Liquidity of its investments; and
- (c) the Yield.

The Council will also aim to achieve the optimum return on its investments commensurate with proper levels of security and liquidity. The risk appetite of this Council is low in order to give priority to security of its investments.

7.1. The risk of default remains a concern; if 10% of the Councils portfolio of £25m as at 31 March 2014 were to default then the potential loss could be £2m – £3m. The Council has managed the risk by only investing in financial institutions with good credit ratings or those part owned by the UK Government.

7.2. **Investment returns expectations.** Bank Rate is forecast to remain unchanged at 0.5% before starting to rise from quarter 2 of 2015. Bank Rate forecasts for financial year ends (March) are:

2014/15	0.50%
2015/16	1.00%
2016/17	1.50%
2017/18	2.50%

7.3. There are downside risks to these forecasts (i.e. start of increases in Bank Rate occurs later) if economic growth weakens. However, should the pace of growth quicken, there could be an upside risk.

7.4. Types of Investments

7.4.1. Investment instruments identified for use in the financial year are listed below under the 'specified' and 'non-specified' investment categories. Preference will be made for specified investment in the current economic climate.

7.4.2. **Specified Investments** - These will have high security and high liquidity, denominated in sterling and not a long term investment i.e. maturity date of no more than 12 months. The investment is not defined as capital expenditure.

The investment is to be made with:

- The UK Government
- Debt Management Office Accounts
- UK Local Authorities and Parish Councils
- Institutions or investment schemes with a credit rating that meets the criteria mentioned above such as a money market fund.

7.4.3. **Non-specified Investments** - All other investments not covered above. The Council's policy is to invest in non-specified investments, which meet all the criteria of a specified investment as outlined in the strategy above except for the maturity date which is longer than 12 months. The Council will place deposits in accordance with the Capita Asset Service matrix recommended colour durations, and where possible spread the amounts and dates of maturing investments as evenly as possible over this period. This avoids an excess of investments maturing in any one particular year and helps towards a more stable rate of return.

8. Current Strategy

8.1.1. The Key elements of the current TMS are:

- Creditworthiness policy
- Sovereign ratings
- Counter party Limits
- Group and individual limits

8.2. Creditworthiness policy

8.2.1. This Council uses the creditworthiness service provided by the Treasury consultants; Capita Asset Service. This service has been progressively enhanced over the last year and now uses a sophisticated modelling approach with credit ratings from all three rating agencies - Fitch, Moodys and Standard and Poors, forming the core element. However, it does not rely solely on the current credit ratings of counterparties but also uses the following as overlays: -

- credit watches and credit outlooks from credit rating agencies
- CDS spreads to give early warning of likely changes in credit ratings
- sovereign ratings to select counterparties from only the most creditworthy countries

8.2.2. This modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads for which the end product is a series of colour code bands which indicate the relative creditworthiness of counterparties. These colour codes are also used by the Council to determine the duration for investments and are therefore referred to as durational bands. The Council is satisfied that this service gives a much improved level of security for its investments. It is also a service which the Council would not be able to replicate using in house resources.

8.2.3. The Council will therefore use counterparties within the following durational bands:

- Yellow 2 years*
- Purple 2 years
- Blue 1 year (applies to nationalised or semi nationalised UK Banks)
- Orange 1 year
- Red 6 months
- Green 100 days
- No Colour not to be used

**this category has been added for AAA rated Government debt or its equivalent and includes investments with other local authorities.; Capita's recommended duration is up to 5 years for this category however Hertsmere will only invest up to 2 years.*

- 8.2.4. All credit ratings will be monitored regularly. The Council is alerted to changes to ratings of all three agencies through its use of the Capita Asset Service creditworthiness service.
- if a downgrade results in the counterparty/investment scheme no longer meeting the Council's minimum criteria, its further use as a new investment will be withdrawn immediately. Consideration will also be giving to terminating existing investments where appropriate.
 - in addition to the use of Credit Ratings the Council will be advised of information in movements in Credit Default Swap against the iTraxx benchmark and other market data on a weekly basis. Extreme market movements may result in downgrade of an institution or removal from the Council's lending list.
- 8.2.5. Sole reliance will not be placed on the use of this external service. In addition this Council will also use market data and market information from credible sources such as financial times, information on government support for banks and the credit ratings of that government support.
- 8.2.6. **The Local Authority Mortgage Scheme (LAMS)** – The Council is currently participating in the cash backed mortgage scheme which requires the Council to place a matching five year deposit to the life of the indemnity. This investment is an integral part of the policy initiative and is outside the criteria above.

8.3. Country limits

- 8.3.1. The Council has determined that it will only use approved counterparties from countries with a minimum sovereign credit rating of AAA from Fitch Ratings (or equivalent from other agencies if Fitch does not provide). This list will be added to, or deducted from; by officers should ratings change in accordance with this policy. However this does not extend to the UK which is currently rated AA+ by Fitch.

Current AAA Rated Countries by Fitch:

- Australia
- Canada
- Denmark
- Finland
- Germany
- Luxembourg
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland
- U.S.A.*

* These Countries currently have a sovereign credit rating of AA+ with Standard & Poors rating service.

- 8.3.2. No more than 30% of the total portfolio is to be invested in any one country, except the UK.

8.4. Group Limits

- 8.4.1. As well as using the Capita Asset Service matrix, the Council will limit its exposure to any one particular Institution or group of banks, for example the Lloyds Group and Santander Group. The Council will adopt a tiered exposure using Fitch long term (or equivalent from other agencies if Fitch does not provide) to determine the amount of funds placed with each institution. The DMO account, UK Government and Local Authorities and UK part nationalised banks will have a separate limit of £10m. Money market funds will have a credit limit of £8m per fund.

Long term	Credit Limit
AAA	£8m
AA+	£8m
AA	£8m
AA-	£8m
A+,A	£4m*
DMO, UK Government and Local Authorities.	£10m
Part Nationalised banks	£10m

- 8.4.2. The council will endeavour to diversify its investment portfolio by country, group and institution. However, the Council may decide to limit the counterparty diversification and invest in Country where there is better understanding about economy and Government intention such as desire to support institutions from defaulting and plan to tackle government deficit.
- 8.4.3. The limit for A+ and A rated banks credit limit is to be increased from £2m to £4M to allow for greater diversification of the portfolio. Currently the Council heavily utilises part nationalised banks such as Lloyds and Natwest with approx. £20M currently invested in these two banks. There is the potential that the government at some point in the next 12 months will reduce some or all of it shares in these banks meaning that the Council may look to reduce the balance held with these counterparties. Increasing these limits would allow more of this to be move to single A rated banks such as Barclays and Nationwide.

8.5. Money Market Funds (MMF)

- 8.5.1. Money market funds are mutual funds that invest in short-term debt instruments. They provide the benefits of pooled investment, as investors can participate in a more diverse and high-quality portfolio than they otherwise could individually. Like other mutual funds, each investor who invests in a money market fund is considered a shareholder of the investment pool, a part owner of the fund. Money market funds are actively managed within rigid and transparent guidelines to offer safety of principal, liquidity and competitive sector-related returns.

8.6. Main Bankers - Barclays

- 8.6.1. Currently the council utilises Money Market funds for short term liquidity purposes, however each payment transaction is subject to a chaps charges (bank charges). It is therefore proposed that in addition to the limits set under the main investment strategy, Barclays as our main banker will be further utilised for liquidity purposes. This will involve having balances of up to £5m held in the council business premium account through the use of the banks sweeping system thus avoiding bank charges. This would bring the potential exposure of Barclays to £7m based on current credit ratings.

8.7. Cash processing risk - Cooperative Bank

- 8.7.1. Currently the Council also utilises the Cooperative bank to process Pay-point transactions. As the Cooperative does not meet the minimum investment criteria balance held in this account will be kept to a minimum and regularly transferred out.

8.8. Municipal Bond Agency

- 8.8.1. It is likely that the Municipal Bond Agency, currently in the process of being set up in conjunction with the Local Government Association (LGA) will be offering loans to local authorities in the near future. It is also hoped that the borrowing rates will be lower than those offered by the Public Works Loan Board (PWLb). This Authority intends to make use of this new source of borrowing as and when appropriate. The Council has committed to placing £20k toward the initial set up of this enterprise through the purchase of shares.

9. Risk Implications

9.1. Monitoring

- 9.1.1. On a monthly basis Officer's will report to Financial Monitoring Panel providing details of new investments, rate of returns and highlighting changes to sovereign rating, group limits and any other relevant treasury issues that may arise.

9.2. Other Issues

- 9.2.1. Investment guidance was issued under the Local Government Act 2003, which requires that the full Council should approve the Council's annual investment strategy. The Capital Finance and Accounting Regulations 2003, which came into force on 1 April 2004, also include provisions relating to local authority investments. From this date investments are classified by the Government into two categories, Specified and Non-Specified.

10. Icelandic bank defaults

- 10.1.1. Following the collapse of the Icelandic bank Landsbanki in early October 2008, its subsidiary Heritable Bank plc (a UK registered bank under Scottish law) entered into administration in 6 October 2008. At this time the Council had £1m invested with maturity due 24 November 2008.

The Council has received the 14th Dividend of £169k from Ernst and Young bringing the total received to £948K. Ernst and Young have indicated that there will be no further distributions until a high court ruling concerning intercompany balance due from Landsbanki, the parent company of Heritable.

11. Treasury Management scheme of delegation

(i) Full Council

- receiving and reviewing reports on Treasury Management strategy and policy
- approval of annual strategy.

(ii) Executive

- approval of/amendments to the organisation's adopted clauses, and treasury management practices
