### Non-recyclable waste

Your black bin is collected every two weeks and is for general household waste that can't be recycled.

If you are in a property that has sack collections, your collection will be weekly.

Please try to use your recycling bins before putting anything in the black bin as the contents only go to landfill or an Energy from Waste plant.

### Items that should not go in your black bin

### Larger black bins

If there are five or more of you in your household and you struggle to fit everything in your bin, you can apply for a larger bin.

Firstly, a larger brown bin will be provided to increase your recycling capacity. If after two months you still feel you need a larger black bin, you can contact us and a waste audit will be carried out to ensure bins are being used effectively.
