

Parking Consultations

Last Modified August 18, 2022

[Share this page](#)

We consider a number of new parking schemes each year in line with guidance from our Parking Management Strategy. You can see what new schemes are currently proposed in this section.

Formal notices of the proposed parking schemes are advertised in local newspapers and on lamp posts in the streets concerned, as well as being available below.

You are welcome to comment on any of the proposals during the dates shown, except for notice of variation for parking charges.

If you have a general enquiry relating to any of the proposals, contact parking.policy@hertsmere.gov.uk or telephone 020 8207 2277.

Bullhead Road parking study and consultation results

Residents of Bullhead Road asked the Council to investigate parking issues. The Council carried out two surveys of parking in January and March followed by a consultation with residents in April/May. The purpose of the consultation was to find out the views of all residents about the nature of parking problems and possible solutions - in particular was there either a desire or a need for a residents controlled parking zone (CPZ).

The Council takes a resident led approach to introducing CPZs and will only implement them if it is clear the majority of residents support them. The Council stated in the consultation that it would need 60% of those households consulted to support a CPZ. The responses to the consultation do not show a majority support for a CPZ. Details of the consultation results can be found [here](#).

The survey results show residents are concerned about traffic and parking at school drop off times. The results will be shared with the County Council. Note the County Council is proposing to introduce a new Zebra crossing by the Primary School in Hillside Road which should improve safety in the location and the Borough will continue

to liaise with County officers about any safety issues.
