

Off Street Electric car charging points

Last Modified April 15, 2021

[Share this page](#)

We have three car parks equipped with **Twin 7kw Fast Electric Car Charing points**.

Electric vehicles are becoming increasingly common and we need to support those drivers, as well as encourage motorists to swap to ultra-low emission vehicles, which will benefit the environment.

The charging points installed in our council-owned car parks are 'open charge points'. The points don't require membership or RFID cards and can be accessed via the supplier's (Pod Point) intuitive [app](#).

Car park locations and costs

Type - Fast charge (7kw)

Cost £1.50 per hour, using the app for up to a maximum of four hours.

Charging points are at the following locations:

- Two double points in [Civic Offices car park](#) in Borehamwood.
- One double point in [High Road Bushey Heath](#), opposite St Peters car park.
- One double point in [Salisbury Close car park](#) in Potters Bar.

Charging bays

Vehicles in the charging bay must be charging at the time of parking and display a valid parking ticket for the entire duration.

Vehicles parked in a charging bay without using the charging point, even with a valid ticket, will be at risk of being served with a Penalty Charge Notice. Once your vehicle is charged, please move off the charging bay so that others may use it.

Our charging points are supplied and operated by [Pod Point](#).

To report faults email: cpz@hertsmere.gov.uk or phone 0207
