On Street Electric Charging Points

Last Modified April 15, 2021

[Share this page](#)

We have declared a climate emergency and committed to net zero carbon emissions before 2050. Sustainable transport will play an important part in reducing our emissions. We would like to encourage residents to use electric vehicles when public and active forms of transport are not feasible.

Electric Vehicle (EV) Charging Point – Registration of Interest

We have installed a number of electric vehicle charging points across the borough and we plan to install more over the coming years. Please complete the form to register your interest in having a EV charger installed on a street near you. The interests will be looked at collectively to help identify areas where there is high demand. This form is for the collection of information to inform our decisions and not an application. We will not be responding to requests directly.

Privacy statement

The data you provide will be used for the sole purpose of planning future charging points and keeping you informed of the roll out. We will keep your personal information that you have supplied to us for the purpose of this survey for five years and then securely destroy it. Further details of how we manage your personal data can be found in our  [privacy policy \(445KB\)](#).
