NPPF	National Planning Policy Framework
PPG	Planning Practice Guidance

1. Introduction

1.1 Project overview and scope

- 1.1.1 AECOM have been commissioned by Hertsmere Borough Council (HBC) to produce a Green Belt Assessment (GBA) using the latest Planning Practice Guidance (PPG) to inform preparation of the emerging Local Plan. The study evaluates the existing Green Belt across the study area and, as required by the National Planning Policy Framework (NPPF), seeks to identify grey belt.
- 1.1.2 The focus of this study is an assessment of the contribution that Green Belt land makes to Green Belt purposes and the identification of land that may fall within the definition of grey belt in national policy.. The PPG on Green Belt (27 February 2025)¹ sets out the following key steps to do this in a Green Belt Assessment:
- Identify the location and appropriate scale of area/s to be assessed
 - Evaluate the contribution each assessment area makes to Green Belt purposes A, B, and D, using the criteria identified below
 - Consider whether applying the policies relating to the areas or assets of particular importance in footnote 7 to the NPPF (other than Green Belt) would potentially provide a strong reason for refusing or restricting development of the assessment area
 - Identify grey belt land
 - Identify if the release or development of the assessment area/s would fundamentally undermine the five Green Belt purposes (taken together) of the remaining Green Belt when considered across the area of the plan
- 1.1.3 This report applies the above steps in order.
- 1.1.4 The study area encompasses the entirety of Hertsmere's designated Green Belt. Green Belt covers the entirety of the borough, with the exception of the inset settlements of Borehamwood, Bushey, part of Elstree, Potters Bar, Radlett and part of Shenley.

1.2 National policy context

- 1.2.1 This GBA is undertaken in line with the Green Belt PPG which sets out advice on the role of the Green Belt in the planning system.
- 1.2.2 In particular, the PPG sets out (emphasis added):
- “the considerations involved in assessing the contribution Green Belt land makes to Green Belt purposes, **where relevant to identifying grey belt.**”*
- 1.2.3 This report has been prepared under the December 2025 NPPF, which defines grey belt as:
- “... land in the Green Belt comprising previously developed land and/or any other land that, in either case, does not strongly contribute to any of purposes (a), (b), or (d) in paragraph 143. ‘Grey belt’ excludes land where the application of the policies relating to the areas or assets in footnote 7 (other than Green Belt) would provide a strong reason for refusing or restricting development.”*
- 1.2.4 Grey belt is covered at paragraphs 148 and 155 of the NPPF, but focusing on paragraph 148 this states:
- “Where it is necessary to release Green Belt land for development, plans should give priority to previously developed land, then consider grey belt which is not previously developed, and then other Green Belt locations.”*
- 1.2.5 This establishes a broad policy preference for previously developed land and grey belt to be considered before other Green Belt locations where Green Belt release is required. However, this is

¹ Available at: <https://www.gov.uk/guidance/green-belt>

not a strict sequential approach, such that grey belt will not always be more appropriate for development than other land in the Green Belt given wider planning and sustainability factors.²

1.2.6 At this point it is important to differentiate between the following terms:

- “assessment” of Green Belt means differentiating between Green Belt in terms of contribution to purposes and identifying grey belt.
- “review” of Green Belt means deciding which areas of Green Belt to release (typically for development) in light of GBA and wider factors.

1.2.7 In this regard, the PPG explains:

“... the review and alteration of Green Belt boundaries should take place, where necessary, as part of the plan making process. In doing so, we expect authorities to identify grey belt land to inform this review...”

1.2.8 Therefore, this report will be used to inform decisions in the new local plan about which land that is currently in the Green Belt might be allocated for development.

1.2.9 It is important to re-emphasise that being identified as grey belt or provisional grey belt does not necessarily mean that the land should be developed or allocated for development. Paragraph 155 of the NPPF sets out the criteria for development in the Green Belt not to be regarded as inappropriate. Amongst others, these include being on grey belt land that would not fundamentally undermine the purposes (taken together) of the remaining Green Belt across the area of the plan, and being in a sustainable location. It is expected that much grey belt land may not meet these criteria.

² The PPG explains: *“Where grey belt is identified, it does not automatically follow that it should be allocated for development, released from the Green Belt or for development proposals to be approved in all circumstances. The contribution Green Belt land makes to Green Belt purposes is one consideration in making decisions about Green Belt land. Such decisions should also be informed by an overall application of the relevant policies in the National Planning Policy Framework (NPPF).”*

Also, the PPG explains: *“Where land is identified as grey belt land, any proposed development of that land should be considered against paragraph 155 of the NPPF, which sets out the conditions in which development would not be inappropriate on grey belt land.”*

2. Methodology

2.1 Overview

2.1.1 As noted above, this report faithfully applies the Planning Practice Guidance. Whilst the overall process in the PPG is clear, some elements are open to interpretation. With that in mind, this chapter sets out the approach taken and the methodological assumptions made.

2.2 Identifying assessment areas

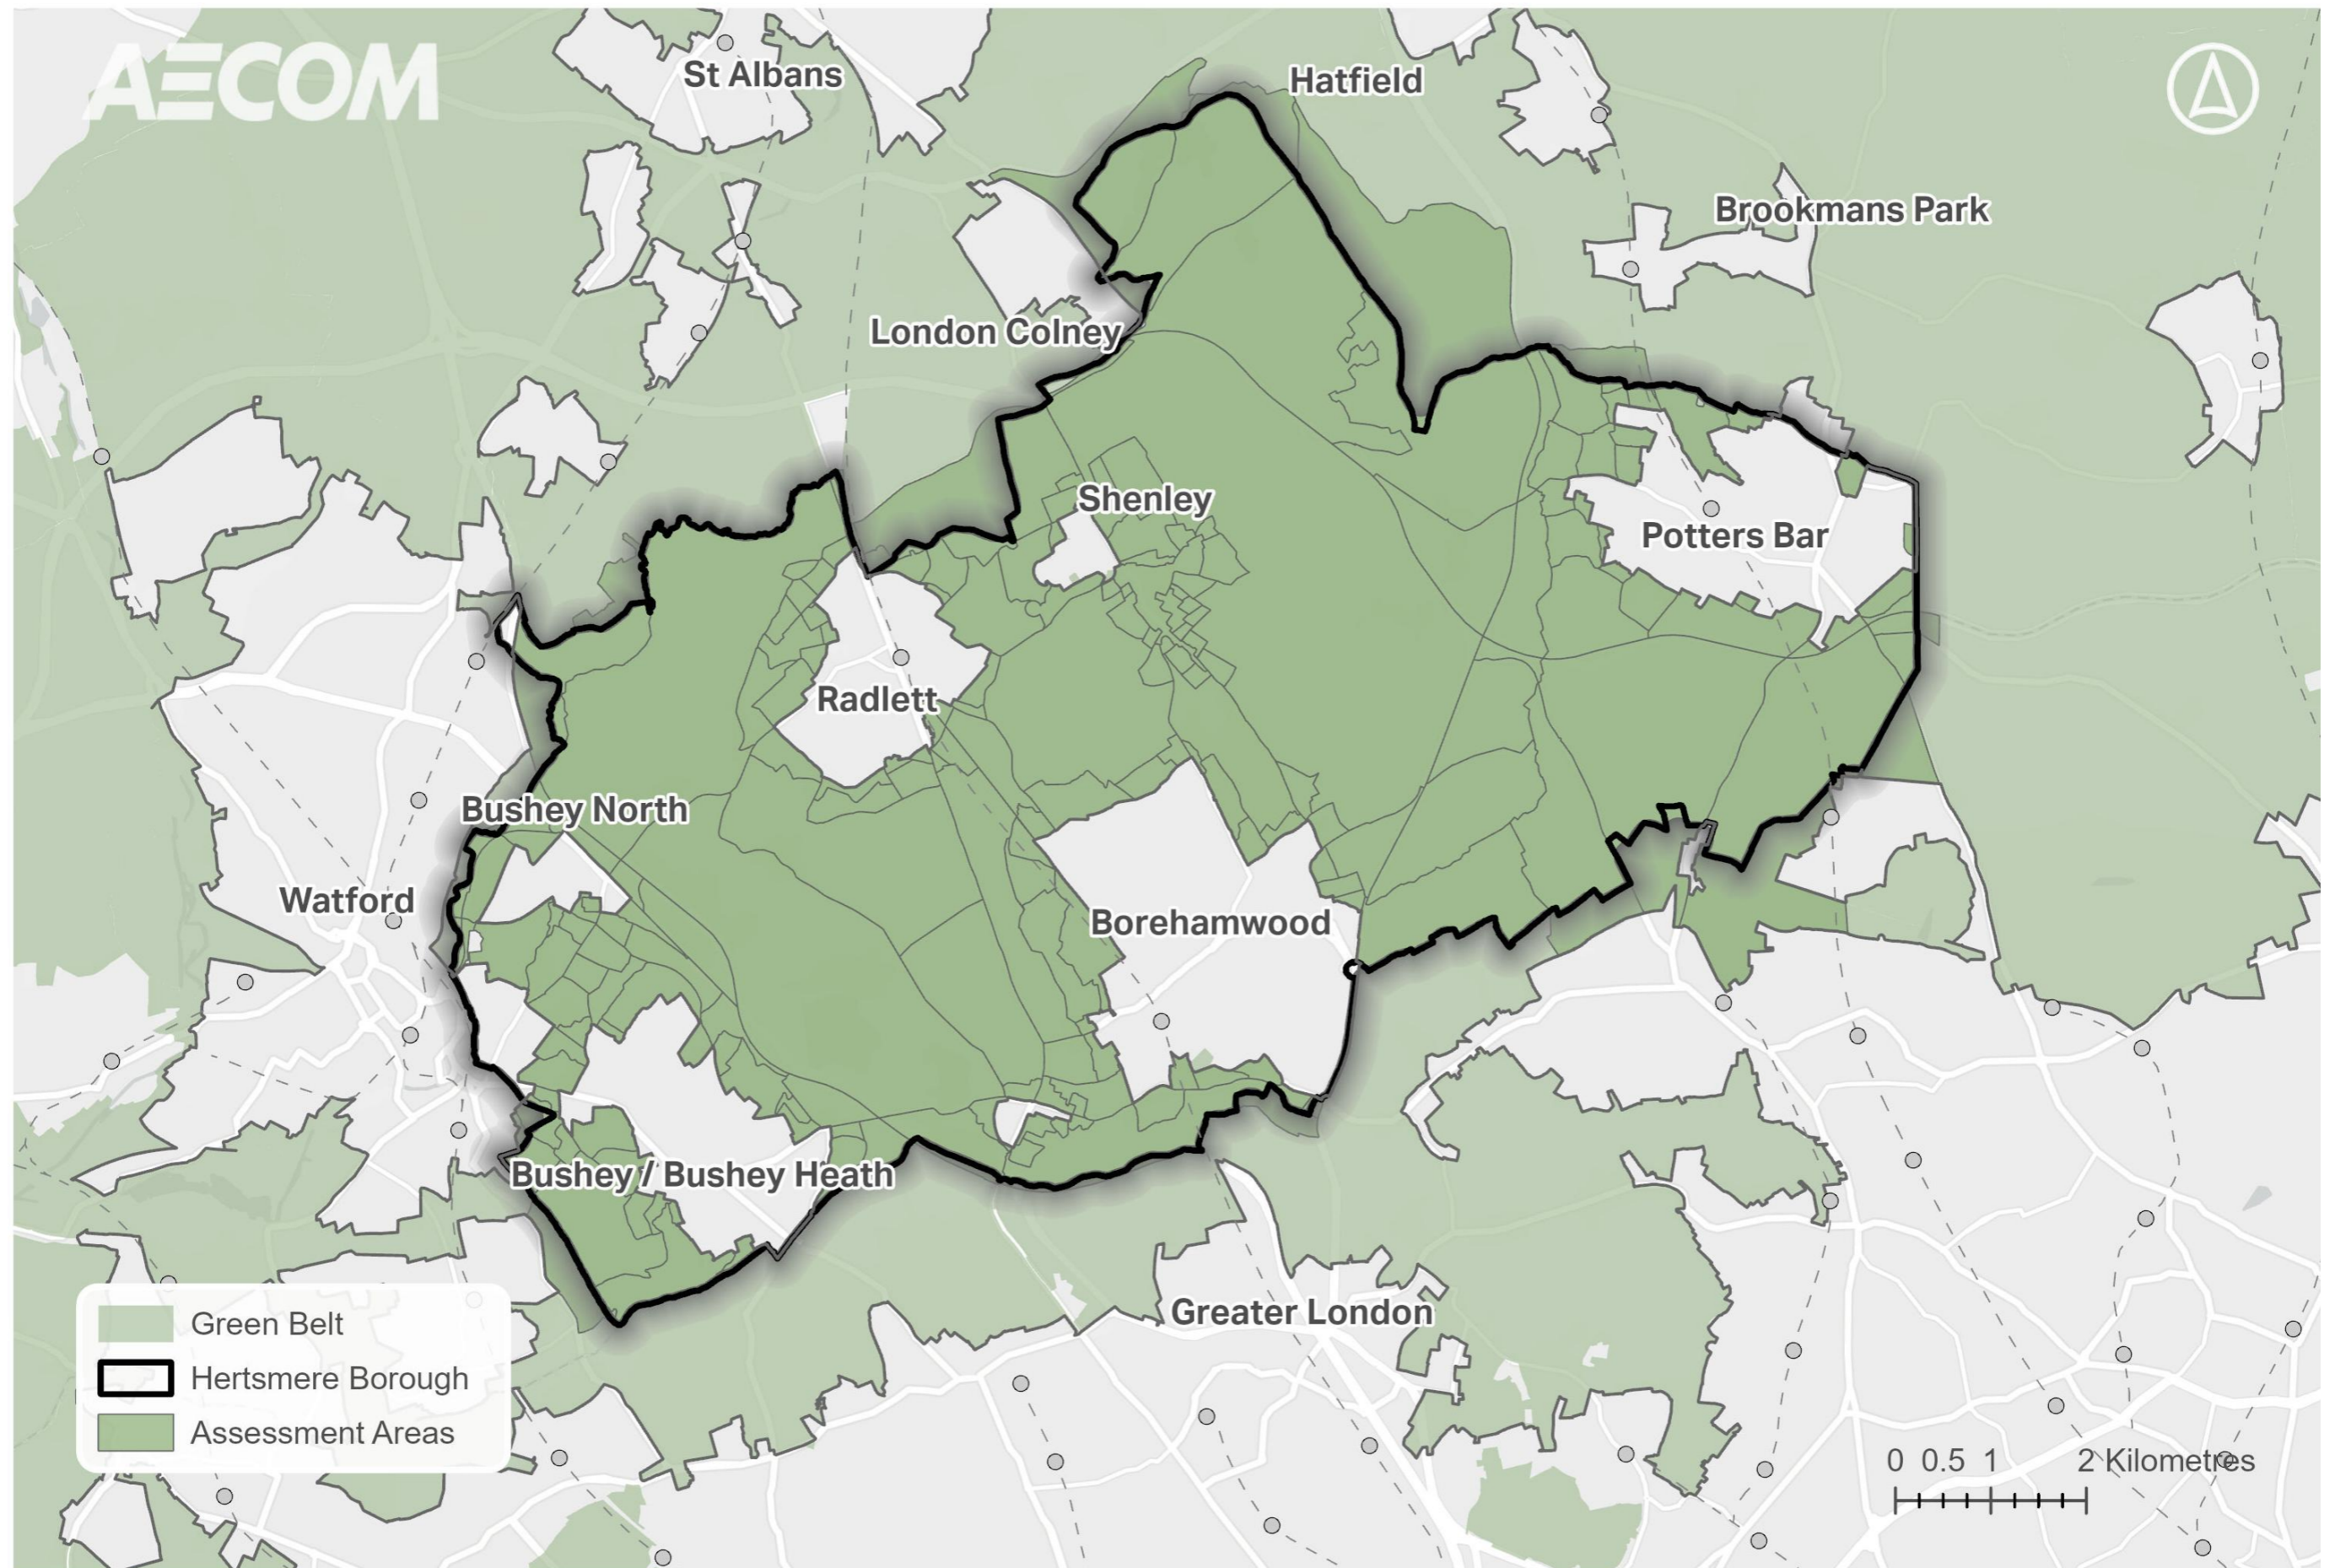

2.2.1 The PPG requires that:

- All Green Belt in the plan area should be considered.
- Assessment areas should be sufficiently granular, such as around existing settlements or public transport hubs or corridors, to enable their variable contribution to the purposes.

2.2.2 The process for identifying assessment areas for this study has involved:

- Using the parcels from previous Hertsmere GBAs as a starting point
- Sub-dividing these parcels into more granular ones around existing settlements and throughout the existing Green Belt, using:
 - Clearly defined, defensible and likely to be permanent boundaries, such as motorways, A and B roads, railway lines, watercourses, existing development and well-established woodland boundaries; and
 - Assets or constraints listed in footnote 7 of the NPPF, such as flood risk, sites of special scientific interest, ancient woodland and conservation areas. This was done to facilitate meaningful footnote 7 assessment (see section 2.5 below).

2.2.3 Using this approach, the existing Green Belt has been divided into 200 assessment areas, as shown in figure 2.1. They are typically smaller around settlements and larger away from them, enabling the full assessment to be undertaken for the whole of Hertsmere.

Figure 2.1 Assessment areas

2.3 Settlement classification

- 2.3.1 For the purposes of a Green Belt Assessment, it is necessary to classify settlements as:
- large built up areas (LBUA), to be assessed against purpose A
 - towns, to be assessed against purpose B
 - historic towns, to be assessed against purpose D
- 2.3.2 The PPG does not provide guidance on the classification apart from to say that none of the purposes should relate to villages.
- 2.3.3 As well as those within Hertsmere, it is necessary to classify settlements in neighbouring plan areas where the development of Green Belt land in Hertsmere would directly relate to them, such as being an extension to a town that abuts the borough boundary.
- 2.3.4 Beyond Greater London's self-evident status as a large built up area, the basis for classifying is the existing **settlement hierarchy**, as defined for settlements within the borough in the Hertsmere Settlement Hierarchy (2019)³ and for those in Hertfordshire but outside Hertsmere in the South West Herts Settlement Hierarchy Study (2023)⁴.
- 2.3.5 Borehamwood is the only tier 1 settlement in the Hertsmere hierarchy and so is considered for this study to be in only large built up area within the borough. The other key settlements (tier 2 and 3) in the Hertsmere hierarchy are Potters Bar, Bushey and Radlett, so these are considered to be towns for this study. All other settlements in Hertsmere are villages.
- 2.3.6 In neighbouring plan areas, the South West Herts Settlement Hierarchy has only Watford as a Category I, Level 1 settlement (regional centre). As such, it is a large built up area. It identifies South Oxhey and London Colney as Category III, Level 5 settlements (small towns and large villages with a rail station), so these are considered to be towns for this study. Outside South West Hertfordshire, Hatfield is considered to be a LBUA, which is consistent with the Welwyn Hatfield Local Plan's⁵ focus on the top two tiers of its settlement hierarchy for growth.
- 2.3.7 The classifications were shared and agreed with the neighbouring authorities.
- 2.3.8 To be considered as a historic town in a GBA, it is necessary for there to be a direct relationship between the historic parts of the town and the Green Belt. This could include a conservation area extending out into the Green Belt or the Green Belt forming a defining element of the town's setting. Having historic core or areas that do not have a direct relationship with the Green Belt does not meet this criterion. Against this definition, for the purposes of this study, there are no historic towns in or adjacent to the Hertsmere Green Belt, meaning that purpose D is not engaged. However, heritage assets throughout the plan area are considered as part of the footnote 7 assessment.
- 2.3.9 The study uses the settlement classification in table 2.1.

Table 2.1 Settlement classification

Hertsmere Borough Council	Neighbouring Authorities
Large Built Up Areas	
Borehamwood	Greater London (Barnet, Enfield, Harrow)
	Hatfield (Welwyn Hatfield)
	Watford (Watford)
Towns	
Bushey	London Colney (St Albans)
Potters Bar	South Oxhey (Three Rivers)
Radlett	

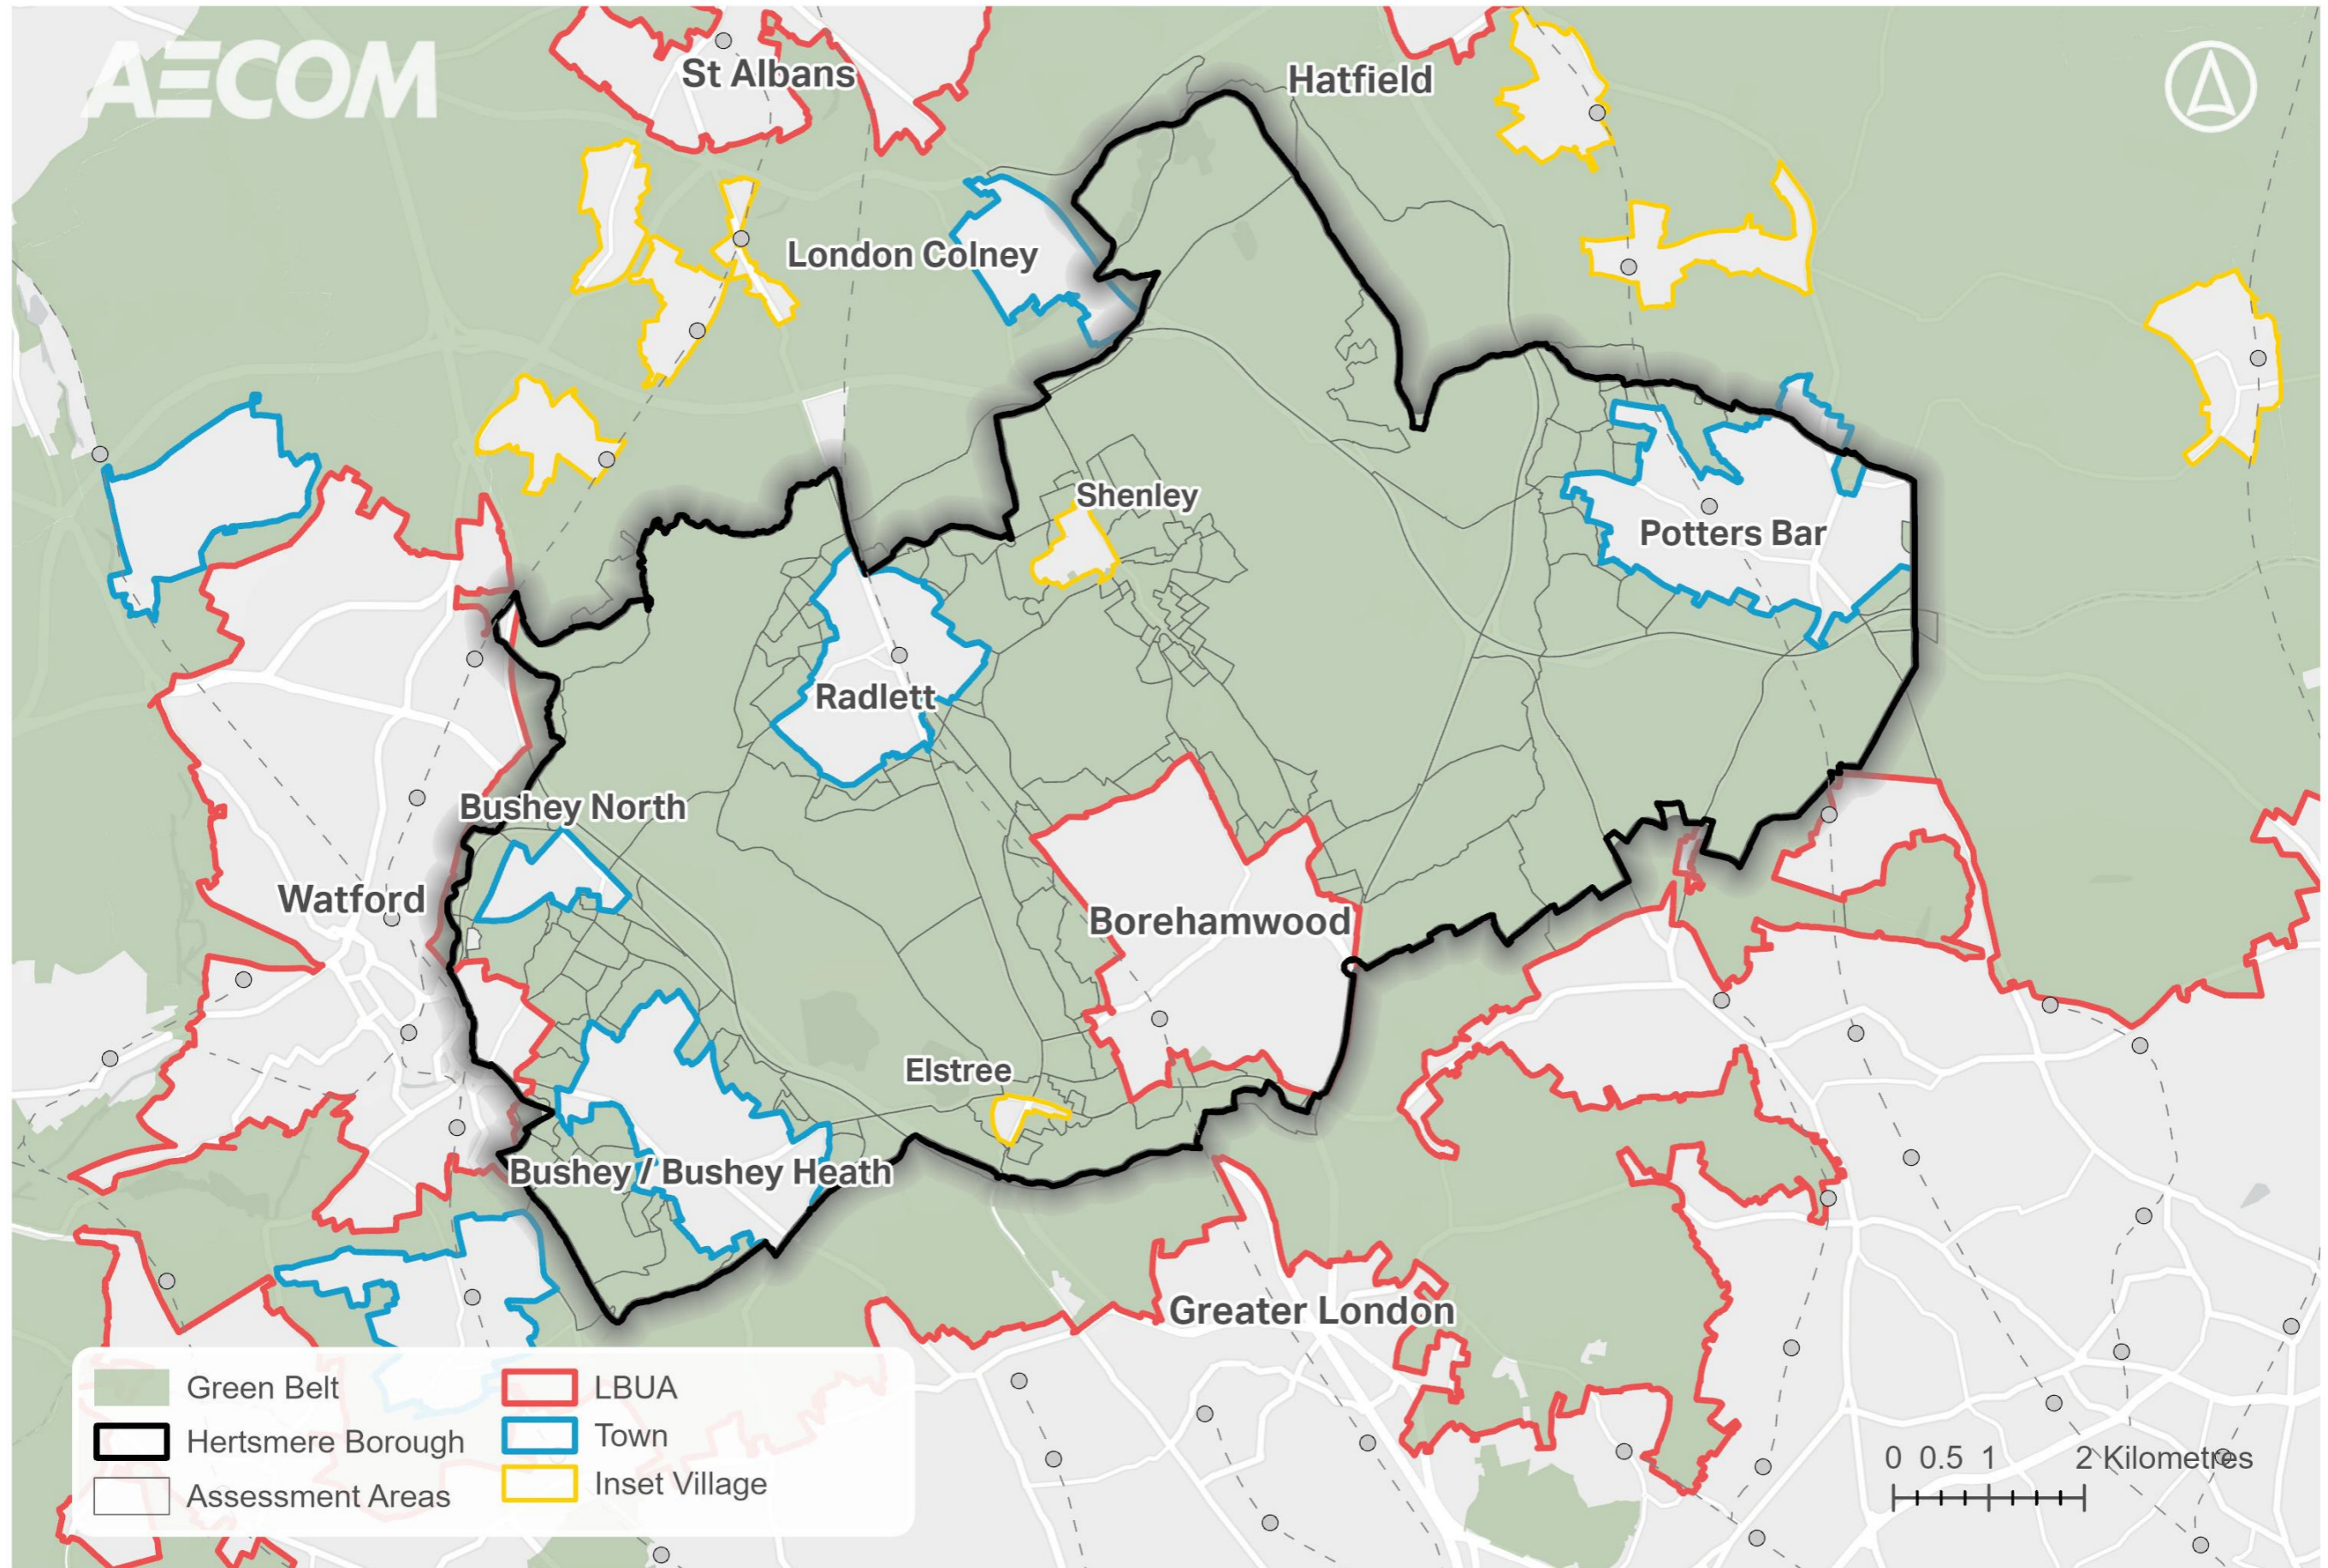

³ Hertsmere Borough Council, Planning for Growth, Settlement Hierarchy and Accessibility Mapping Analysis, Technical Study

⁴ Technical Note: Establishing a South West Hertfordshire Settlement Hierarchy, August 2023

⁵ Welwyn Hatfield Local Plan 2016-2036

2.3.10 Regarding the extent of the settlements, the study uses the existing Green Belt boundaries where settlements are inset. This means, for example, that, only the part of Bushey that is inset as part of Watford is considered by the study to be part of the Watford LBUA, and South Oxhey is not part of the Greater London or Watford LBUAs.

2.3.11 The settlement classification is shown in figure 2.2.

Figure 2.2 Settlements

2.4 Purposes assessment

- 2.4.1 As no settlements have been identified as ‘historic towns’ for the purposes of Green Belt assessment, Purpose D has not been applied in the purposes scoring. This leaves the identification of grey belt to assessment against purposes A and B, as described in turn in this section, and the NPPF footnote 7 considerations, including heritage, as described in section 2.5 below.
- 2.4.2 In each assessment area, the contribution that the land makes to the relevant purpose is judged to be strong, moderate, or weak or none. The Planning Practice Guidance sets out considerations to inform these judgements.
- 2.4.3 If there are allocations or permitted development in or adjacent to an AA, the assessments treat that as if it was developed although can, in its own right, only lead to a conclusion of ‘not grey belt’ or ‘provisional grey belt’ to reflect any possible delivery uncertainties.
- 2.4.4 Assessments have been undertaken using a combination of desk-based analysis and site visits.

Purpose A – to check the unrestricted sprawl of large built up areas

- 2.4.5 For purpose A, PPG includes the following considerations (presented as “illustrative features”) against each level of contribution:

Table 2.2 Purpose A illustrative features

Contribution	Illustrative features
Strong	<p>Assessment areas that contribute strongly are likely to be free of existing development, and lack physical feature(s) in reasonable proximity that could restrict and contain development. They are also likely to include all of the following features:</p> <ul style="list-style-type: none"> • be adjacent or near to a large built up area • if developed, result in an incongruous pattern of development (such as an extended “finger” of development into the Green Belt)
Moderate	<p>Assessment areas that contribute moderately are likely to be adjacent or near to a large built up area, but include one or more features that weaken the land’s contribution to this purpose a, such as (but not limited to):</p> <ul style="list-style-type: none"> • having physical feature(s) in reasonable proximity that could restrict and contain development • be partially enclosed by existing development, such that new development would not result in an incongruous pattern of development • contain existing development • being subject to other urbanising influences
Weak or none	<p>Assessment areas that make only a weak or no contribution are likely to include those that:</p> <ul style="list-style-type: none"> • are not adjacent to or near to a large built up area • are adjacent to or near to a large built up area, but containing or being largely enclosed by significant existing development

Source: *Green Belt PPG (2025)*

- 2.4.6 As the PPG offers no further definition of the considerations, it is necessary clarify some of them here:
- “Free of existing development” is defined as meaning largely but not necessarily entirely free of development, as it is unlikely an AA to be entirely free of development. In particular, development listed in NPPF paragraph 154 as not being inappropriate in the Green Belt, which includes buildings for agriculture, does not count as being development in this definition.
 - “Adjacent to...a large built up area is defined as meaning sharing a boundary with. “Near to” is assessed on a case by case basis but is generally defined as being close enough that any gap would effectively be closed if the land was developed.
 - “Incongruous pattern of development” is defined as meaning a pattern of development that is notably different from the prevailing pattern in the settlement. Note that an extended finger of development into the Green Belt will not necessarily be incongruous if such fingers already exist, such as along valleys. Development that joins the LBUA with a nearby village that then forms an extended finger could be incongruous.
 - “Physical features...that could restrict and constrain development” can include natural and landscape features, including topography, as well as built features.

- “Partially enclosed by existing development, such that new development would not result in an incongruous pattern of development” is defined as having development (not natural or landscape features) on at least two sides.
- “Largely enclosed by significant existing development” is defined as having development (not natural or landscape features) on at least three sides.

2.4.7 As per the settlement classification above, purpose A is applied to Borehamwood, Watford and Greater London.

Purpose B – to prevent neighbouring towns merging into one another

2.4.8 For purpose B, PPG includes the following considerations (presented as “illustrative features”) against each level of contribution:

Table 2.3 Purpose B illustrative features

Contribution	Illustrative features
Strong	<p>Assessment areas that contribute strongly are likely to be free of existing development and include all of the following features:</p> <ul style="list-style-type: none"> • forming a substantial part of a gap between towns • the development of which would be likely to result in the loss of visual separation of towns
Moderate	<p>Assessment areas that contribute moderately are likely to be located in a gap between towns, but include one or more features that weaken their contribution to this purpose, such as (but not limited to):</p> <ul style="list-style-type: none"> • forming a small part of the gap between towns • being able to be developed without the loss of visual separation between towns. This could be (but is not limited to) due to the presence or the close proximity of structures, natural landscape elements or topography that preserve visual separation
Weak or none	<p>Assessment areas that contribute weakly are likely to include those that:</p> <ul style="list-style-type: none"> • do not form part of a gap between towns, or • form part of a gap between towns, but only a very small part of this gap, without making a contribution to visual separation

Source: Green Belt PPG (2025)

2.4.9 The study applies some of the terms in the considerations above in the following ways:

- As with purpose A, “free of existing development” is defined as meaning largely but not necessarily entirely free of development and, in particular, does not include the Green Belt exceptions in NPPF paragraph 154. The most relevant of these exceptions is buildings for agriculture and forestry.
- “Substantial part of a gap between towns” and “a small part of the gap between towns” are reviewed on a case-by-case basis, depending on local circumstances such as topography, physical connections and the size of the gap.
- “Towns merging into one another” is primarily defined as the loss of physical separation between towns. Visual separation (defined for this study as the ability to see one town from another) and perceived separation (defined as the extent to which people appreciate there to be a gap) can also be considerations, albeit more subjective ones.

2.4.10 Purpose B applies to those settlements defined as LBUs as well as those defined as towns.

2.4.11 The gaps that are relevant to this assessment are between:

- Borehamwood and Bushey
- Borehamwood and Greater London
- Borehamwood and Radlett
- Borehamwood and Potters Bar
- Bushey and Bushey, where different parts of this town are separately inset from the Green Belt
- Bushey and Greater London
- Bushey and South Oxhey

- Bushey and Watford
- Potters Bar and Greater London
- Potters Bar and Hatfield
- Radlett and London Colney
- London Colney and Hatfield

2.5 Footnote 7 assessment

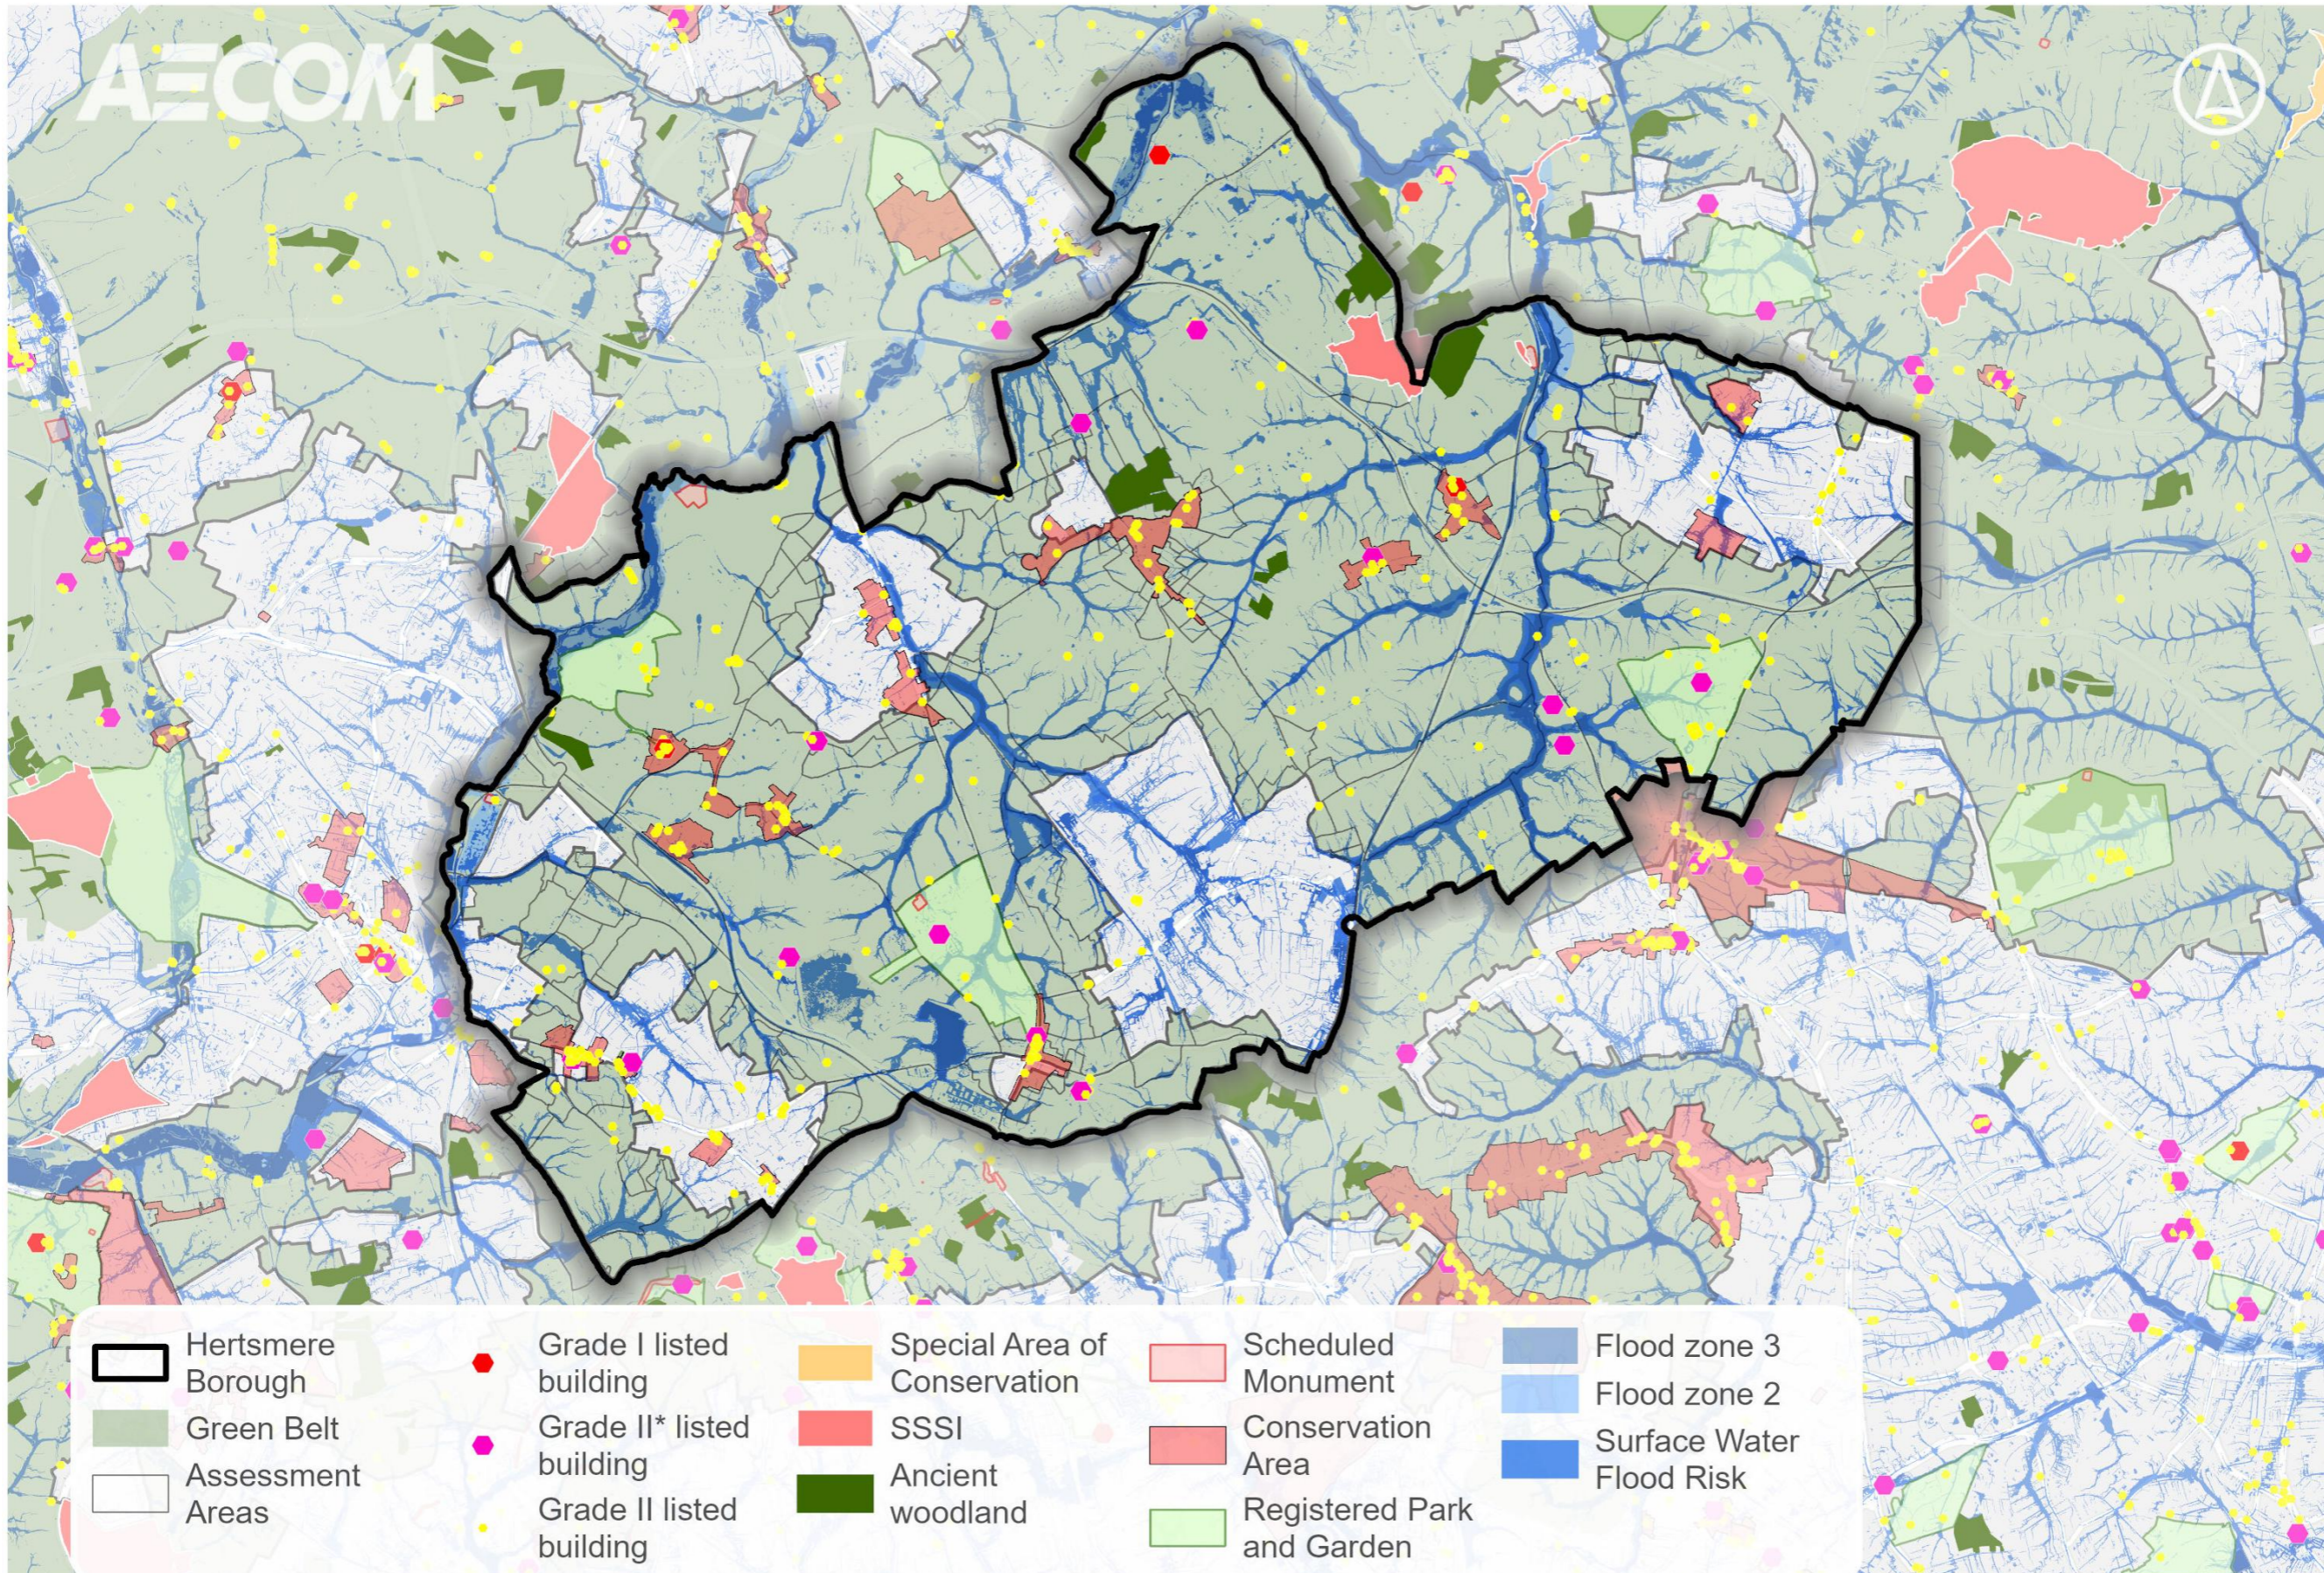

2.5.1 The study judges whether any NPPF footnote 7 areas and assets would provide a strong reason for refusing or restricting development on the assessment area using a GIS analysis that categorises under three the three headings in table 2.4. These criteria are used as a guide to inform judgements based on the specific local circumstances.

Table 2.4 Footnote 7 matrix

Footnote 7 feature	No strong reason for refusing or restricting development	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation	Potentially provides a strong reason for refusing or restricting development with little or no possibility of mitigation
Biodiversity	No protected sites	Presence of or adjacency to protected sites	Extensive or total presence of protected sites
Local Green Space	Not entirely Local Green Space	Presence of some Local Green Space	Entirely Local Green Space
Irreplaceable habitats	No irreplaceable habitats	Presence of or adjacency to irreplaceable habitats	Extensive or total presence of irreplaceable habitats
Historic environment	Not entirely covered by statutory heritage designations	Presence of or adjacency to statutory heritage designations	Entirely covered by statutory heritage designations
Flood risk	No or little flood risk as defined by a guideline up to 25% coverage of fluvial flood risk zones and areas at high risk of flooding from surface water.	Significant flood risk as defined by a guideline 26%-75% coverage of fluvial flood risk zones and areas at high risk of flooding from surface water.	More than 75% (guideline) covered by fluvial flood risk zone 3 and areas at high risk of flooding from surface water.

2.5.2 The word 'mitigation' is used in the footnote 7 assessment in a broad sense, including to describe where development could or couldn't take place in those parts of the AA away from the feature in question. This often applies to larger AAs.

2.5.3 The footnote 7 areas and assets that are included in this assessment are shown in figure 2.3.

Figure 2.3 Footnote 7 areas and assets

Biodiversity

- 2.5.4 Footnote 7 refers to habitats sites, SSSI and sites listed in paragraph 194 of the NPPF. None of the paragraph 194 sites are present in or adjacent to Hertsmere.
- 2.5.5 Habitats sites are defined in the NPPF as “*any site which would be included within the definition at regulation 8 of the Conservation of Habitats and Species Regulations 2017 for the purpose of those regulations, including candidate Special Areas of Conservation, Sites of Community Importance, Special Areas of Conservation, Special Protection Areas and any relevant Marine Sites.*”
- 2.5.6 As such, for the purpose of this Green Belt Assessment, the Biodiversity category refers to SSSIs, of which Redwell Wood and Castle Lime Works Quarry are the only ones within Hertsmere.

Local Green Space

- 2.5.7 Local Green Space (LGS) is a designation of green space which serves as a local, valuable and significant resource for a community. The only designated LGS in Hertsmere is the Spinney Woodland and connected hedge system, Shenley, designated in the Shenley Neighbourhood Plan.

Irreplaceable habitats

- 2.5.8 Irreplaceable habitat includes some of England’s most ecologically valuable terrestrial and intertidal habitat. In Hertsmere, it includes ancient woodland and ancient and veteran trees.

Historic environment

- 2.5.9 Historic environment refers to statutory heritage designations including scheduled monuments, conservation areas, registered parks and gardens, and listed buildings. All of these are present in Hertsmere.

Flood risk

- 2.5.10 Flood risk refers to fluvial flood zone 2 and 3 and areas at high risk of flooding from surface water.

2.6 Grey belt conclusions

- 2.6.1 Under the December 2024 NPPF, grey belt is identified via either the purposes assessment (section 2.4 above) or the footnote 7 assessment (section 2.5 above), or both. This identification is based on the matrix in table 2.5.

Table 2.5 Grey belt conclusions matrix

Contributes strongly to Purpose A, B or D	NPPF footnote 7 constraints potentially provide a strong reason for refusing or restricting development?	Conclusion
Yes	n/a	Not grey belt
No	Yes, with no possibility of mitigation	Not grey belt
No	Yes, with possibility of mitigation	Provisional grey belt
No	No	Grey belt

- 2.6.2 Note that the conclusions relate to full assessment areas and each is assessed individually. It is possible that there would be different conclusions for smaller sites within the AAs or for combinations of AAs.

3. Assessment

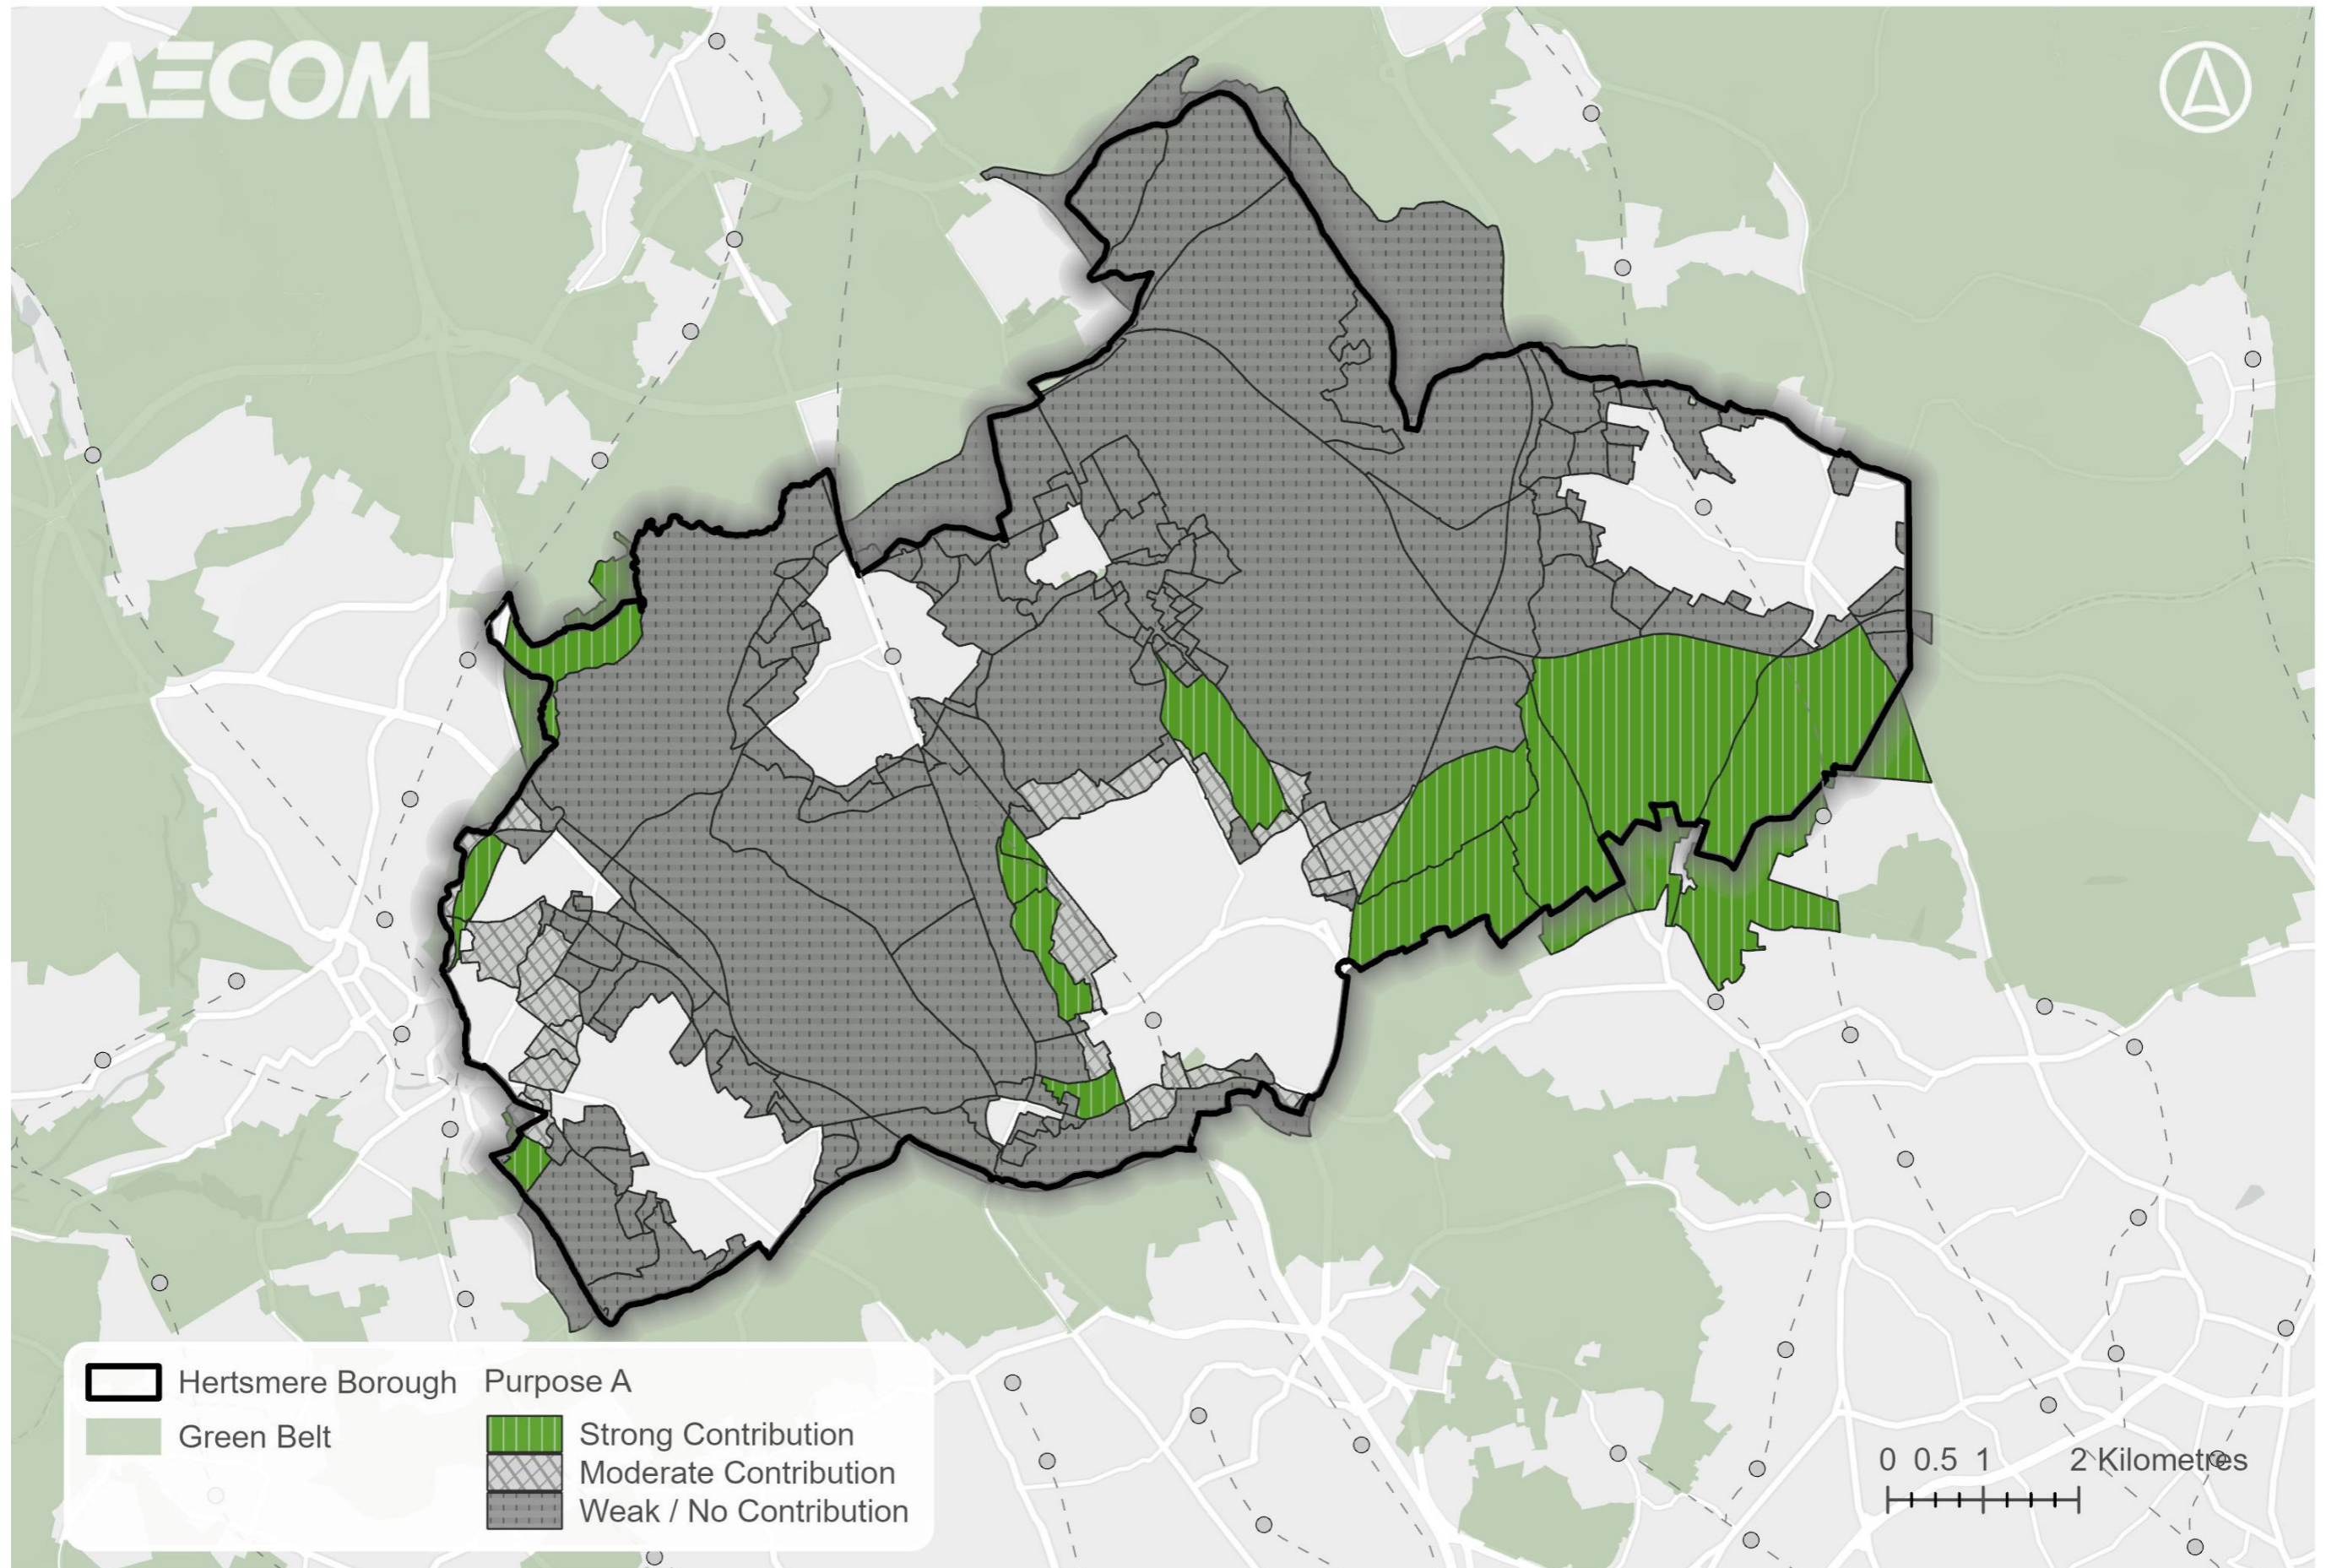

3.1 Introduction

- 3.1.1 Each of the 200 assessment areas has been assessed against the relevant Green Belt purposes and the footnote 7 assets, as described in chapter 2.
- 3.1.2 A proforma for each AA is included in Appendix A⁶. This chapter summarises the findings.

3.2 Purpose A

- 3.2.1 The purpose A assessment findings are presented in figure 3.1.

⁶ Note assessment areas BU-012, OGB-007 and OGB-025 were omitted at a late stage due to mapping amendments.

Sources: Esri, TomTom, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community Contains public sector information licensed under the Open Government License v3.0. Contains OS data © Crown copyright and database right 2025.

Figure 3.1 Purpose A assessment

3.2.2 Fourteen assessment areas were assessed as contributing strongly to purpose A, which is to check the unrestricted sprawl of large built up areas.

3.2.3 The strongly performing AAs are:

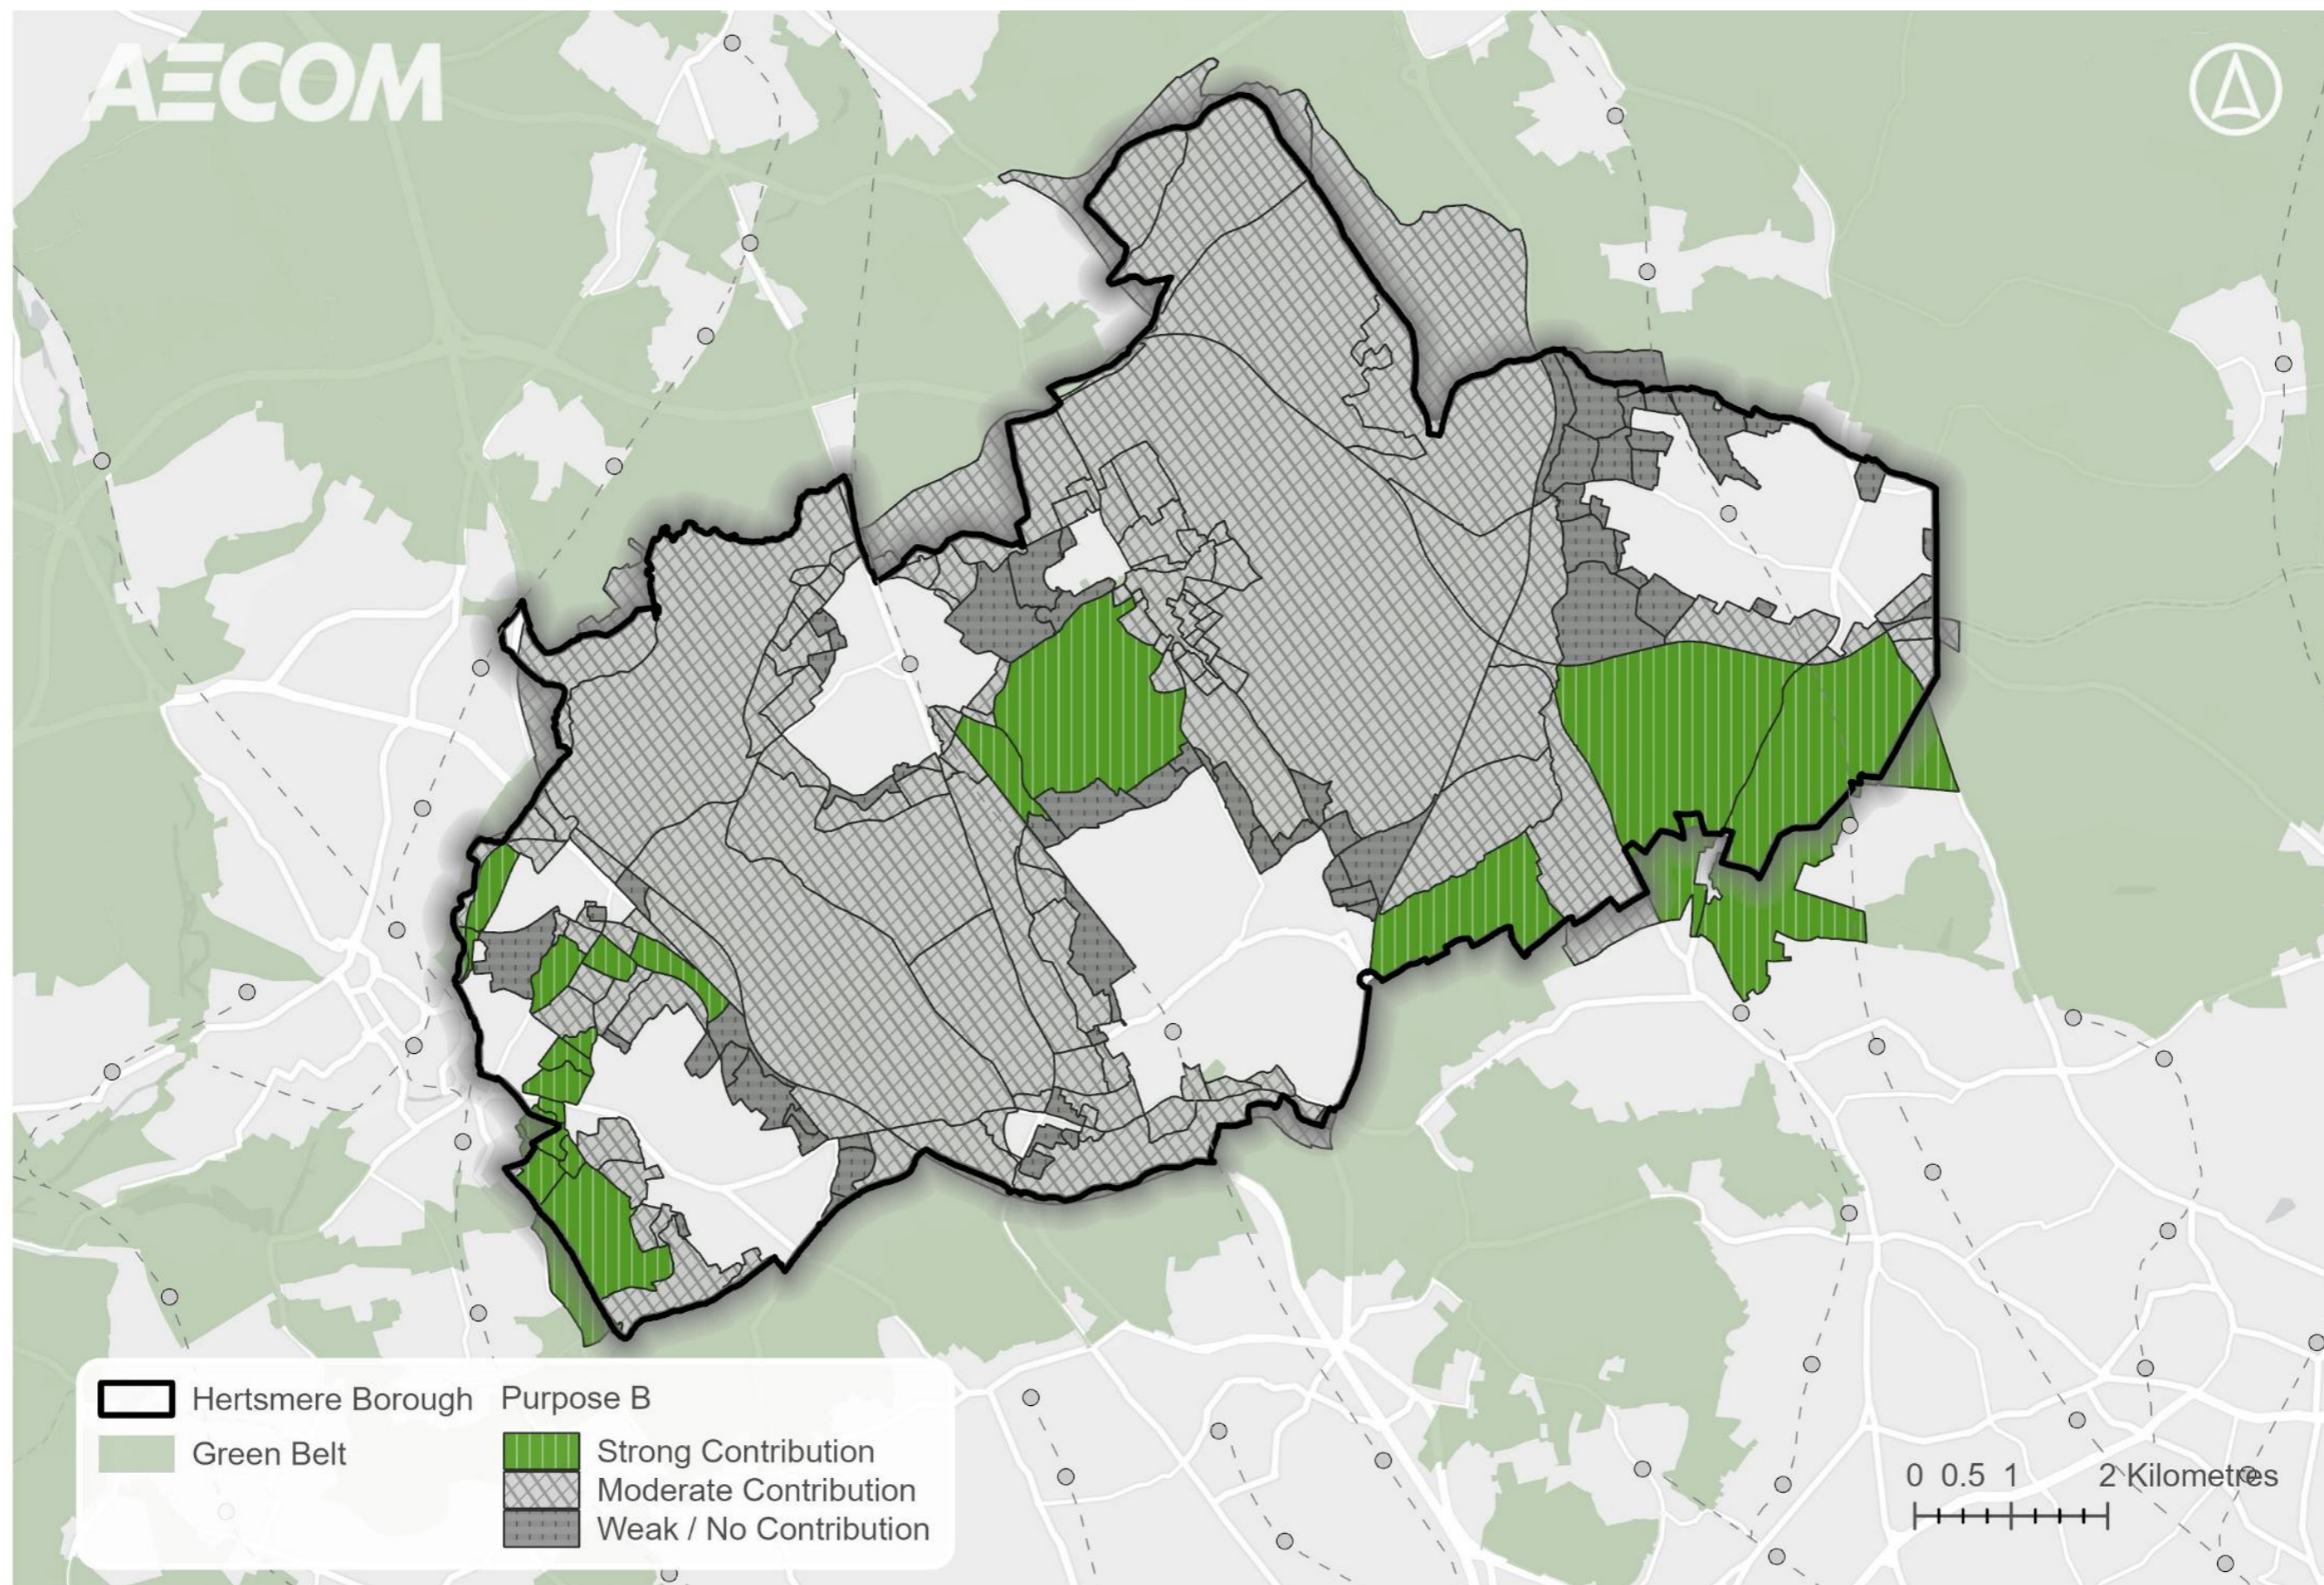

- To the north of the Greater London LBUA around High Barnet and Hadley Wood.
- To the east and west of Borehamwood, including between Borehamwood and Elstree.
- On the eastern edge Watford.

3.2.4 In all of these cases, the AAs are largely free of development, lack physical features that could restrict and contain development, and, if developed, would be developed in an incongruous pattern.

3.2.5 Full details by AA are in the proformas in Appendix A.

3.3 Purpose B

3.3.1 The purpose A assessment findings are presented in figure 3.2.

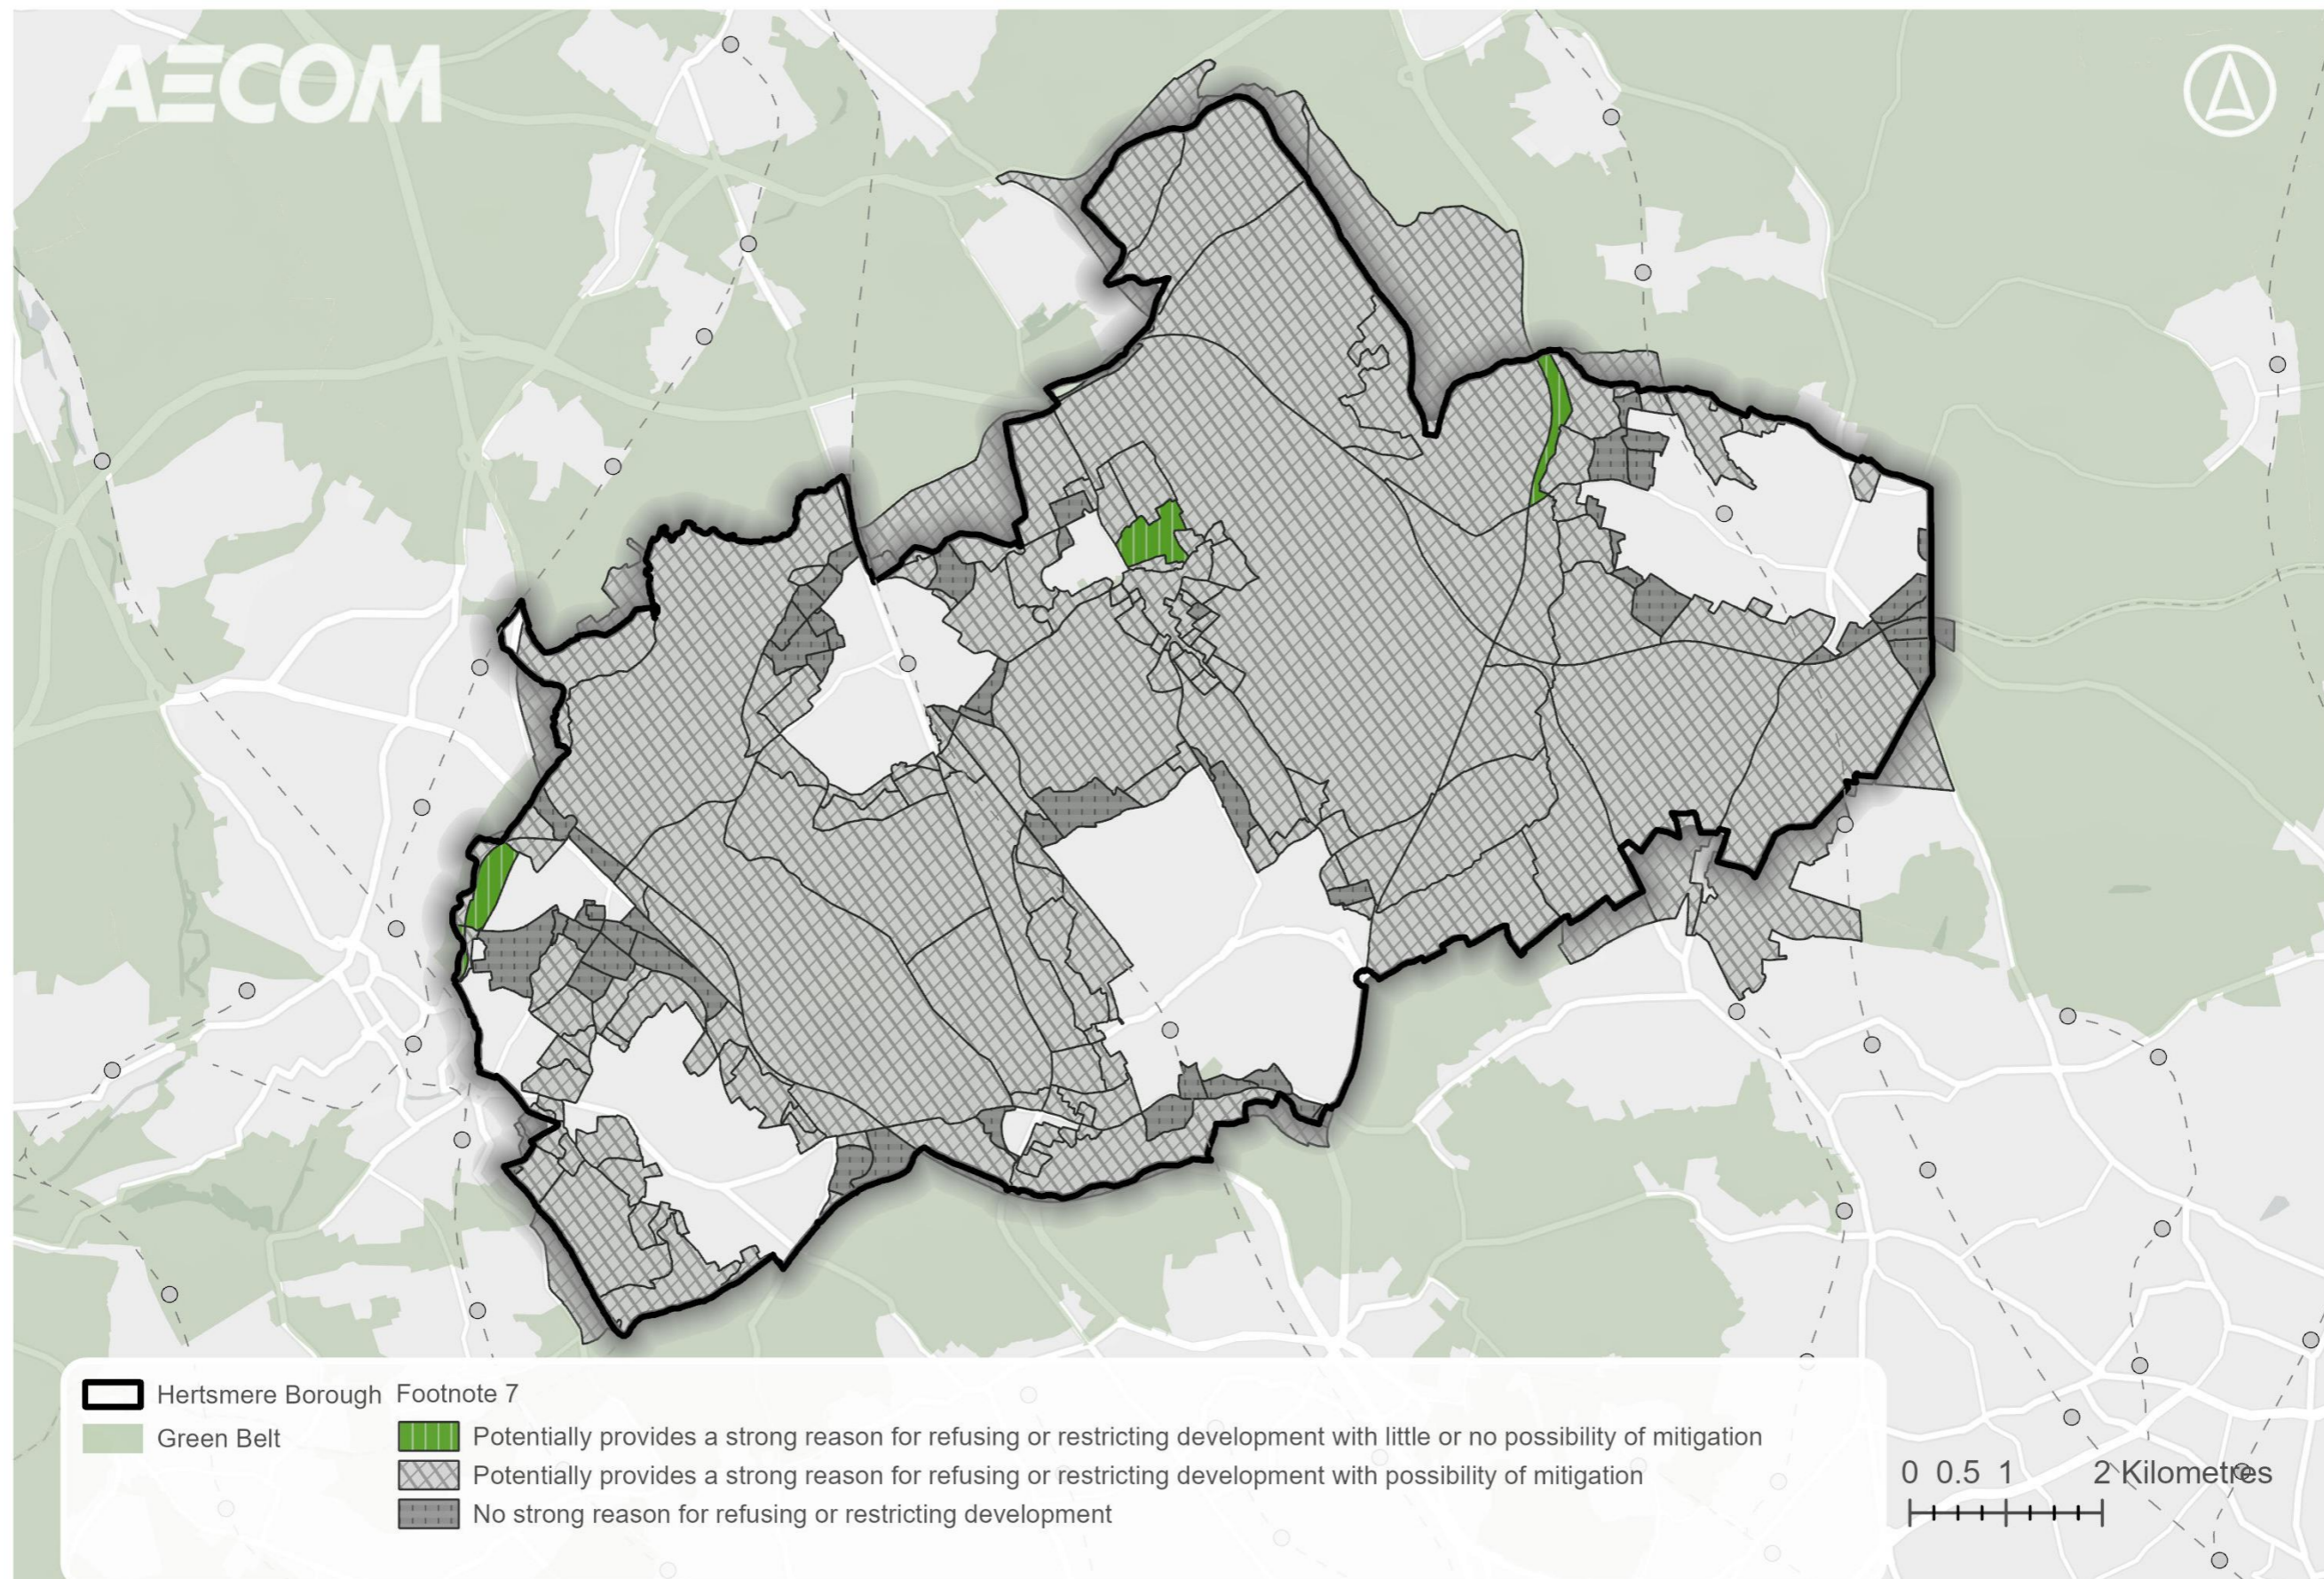

Sources: Esri, TomTom, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community Contains public sector information licensed under the Open Government License v3.0. Contains OS data © Crown copyright and database right 2025.

Figure 3.2 Purpose B assessment

- 3.3.2 Nineteen assessment areas were assessed as contributing strongly to purpose B, which is to prevent neighbouring towns merging into one another.
- 3.3.3 The strongly performing AAs are in in three broad clusters.
- 3.3.4 The first cluster is preventing the Great London built up area merging into both Borehamwood and Potters Bar. These are very sensitive gaps of largely open countryside that have the A1 Barnet Bypass and M25 as important western and northern boundaries, but with few features to the east and south of these highways that would preserve the separation.
- 3.3.5 The second cluster is the sensitive gap between Borehamwood and Radlett, which is just a little over a mile at the narrowest point. The more granular AAs on the immediate edges of each town have no real function in preventing coalescence, but the larger AAs certainly do.
- 3.3.6 The third cluster is between Watford/South Oxhey and Bushey and between Bushey and Bushey North, which are separated by an existing Green Belt gap. This is a sensitive gap. It is very narrow – less than 300 metres – in parts and has seen significant levels of development that the NPPF defines as inappropriate in the Green Belt. The possibility of Bushey merging into the other settlements is very real and the AAs are small, meaning that around three quarters of the strongly performing AAs are in this gap.
- 3.3.7 It is important to note that all of the other gaps between towns listed in section 2.4 above are important and some of them are very sensitive. They do not, however, have strongly contributing AAs for a number of reasons, principally because the sizes of the gaps relative to the sizes of the AAs usually mean that their development could not result in the towns merging, and because topography, natural landscape elements and the presence of structures including buildings and infrastructure mean that they currently lack visual connectivity. For these reasons, the majority (116) of AAs have been assessed to perform moderately against purpose B. These areas will be returned to in chapter 4 below, which considers whether the release or development of AAs would fundamentally undermine the five Green Belt purposes (taken together) of the remaining Green Belt when considered across Hertsmere.
- 3.3.8 The gap between Bushey and Greater London (Stanmore) is especially sensitive and narrow. However, much of this gap lies outside the Hertsmere Local Plan area and this study is restricted to the assessment of the Green Belt role of land within the borough.
- 3.3.9 Full details by AA are in the proformas in Appendix A.

3.4 Footnote 7

- 3.4.1 The footnote 7 assessment findings are presented in figure 3.3.
- 3.4.2 142 assessment areas are directly or indirectly (where adjacent) impacted by the presence of footnote 7 assets. However, only four of these is judged as having a strong reason for refusing or restricting development with little or no possibility of mitigation. One of these is the Combe Wood ancient woodland and three have high levels of flood risk.
- 3.4.3 The other 138 were AAs where the footnote 7 area and assets could possibly be mitigated including because they may only be present in part of the AA or because a design solution could be implemented, such as to address the setting of a listed building.
- 3.4.4 Full details by AA are in the proformas in Appendix A.

Figure 3.3 Footnote 7 assessment

3.5 Grey belt identification

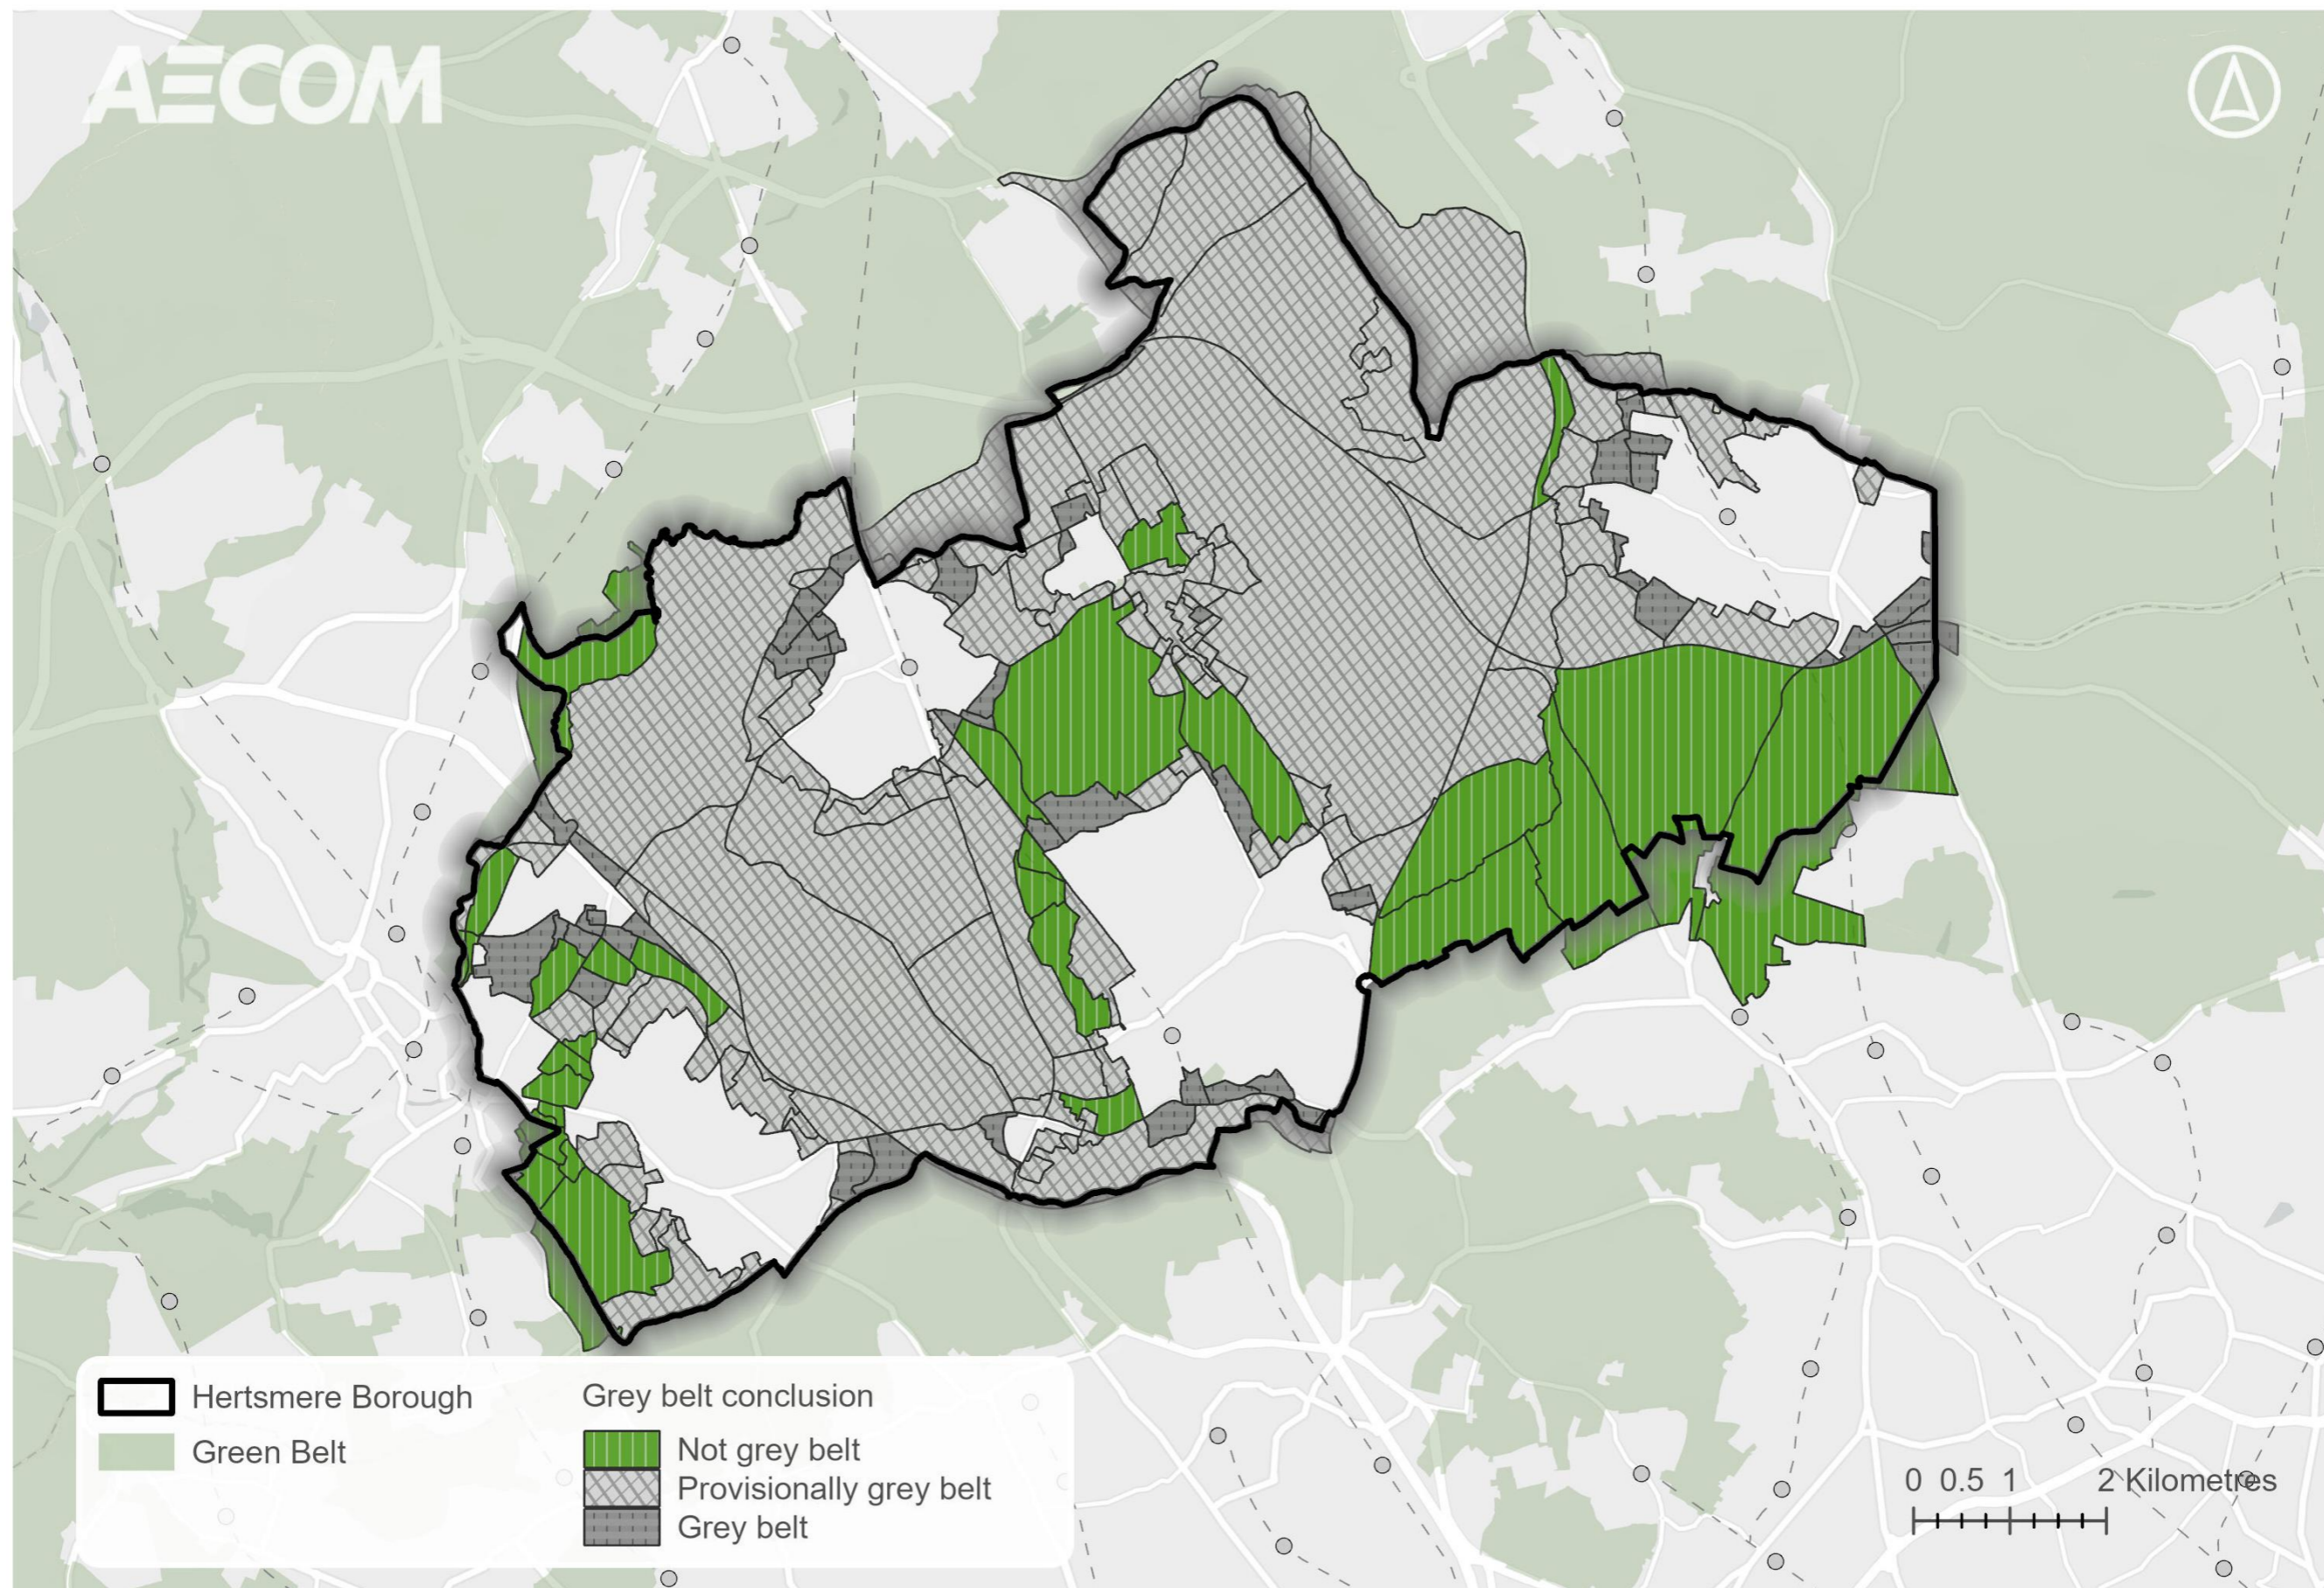

- 3.5.1 Following the government guidance, the first characteristic of land that can be identified as grey belt is that it does not contribute strongly to Green Belt purposes A, B or D. In Hertsmere, the identification of grey belt primarily relates to purposes A and B, as no settlements have been identified as historic towns for the purposes of Purpose D (see section 2.3 above).
- 3.5.2 Figure 3.4 shows **in grey** those AAs that are not making a strong contribution towards purpose A or B.

Sources: Esri, TomTom, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community Contains public sector information licensed under the Open Government License v3.0. Contains OS data © Crown copyright and database right 2025.

Figure 3.4 Highest contribution towards grey belt purposes

- 3.5.3 The other characteristic of land that can be identified as grey belt is that the application of policies in footnote 7 of the NPPF (other than Green Belt) do not provide a strong reason for refusing or restricting development. Where these cannot be mitigated, the land cannot be grey belt. As figure 3.3 above shows, this applies to one AA.
- 3.5.4 Where the application of policies in footnote 7 could possibly be mitigated, that land is identified as provisional grey belt. If development proposals come forward on this land, they will need to demonstrate why the footnote 7 assets do not provide a strong reason for refusing or restricting development for the land to be considered as grey belt for the purposes of decision making.
- 3.5.5 Figure 3.5 shows the AAs that this study has identified as grey belt (62 AAs), provisional grey belt (115 AAs) and not grey belt (23 AAs).

Figure 3.5 Grey belt conclusions

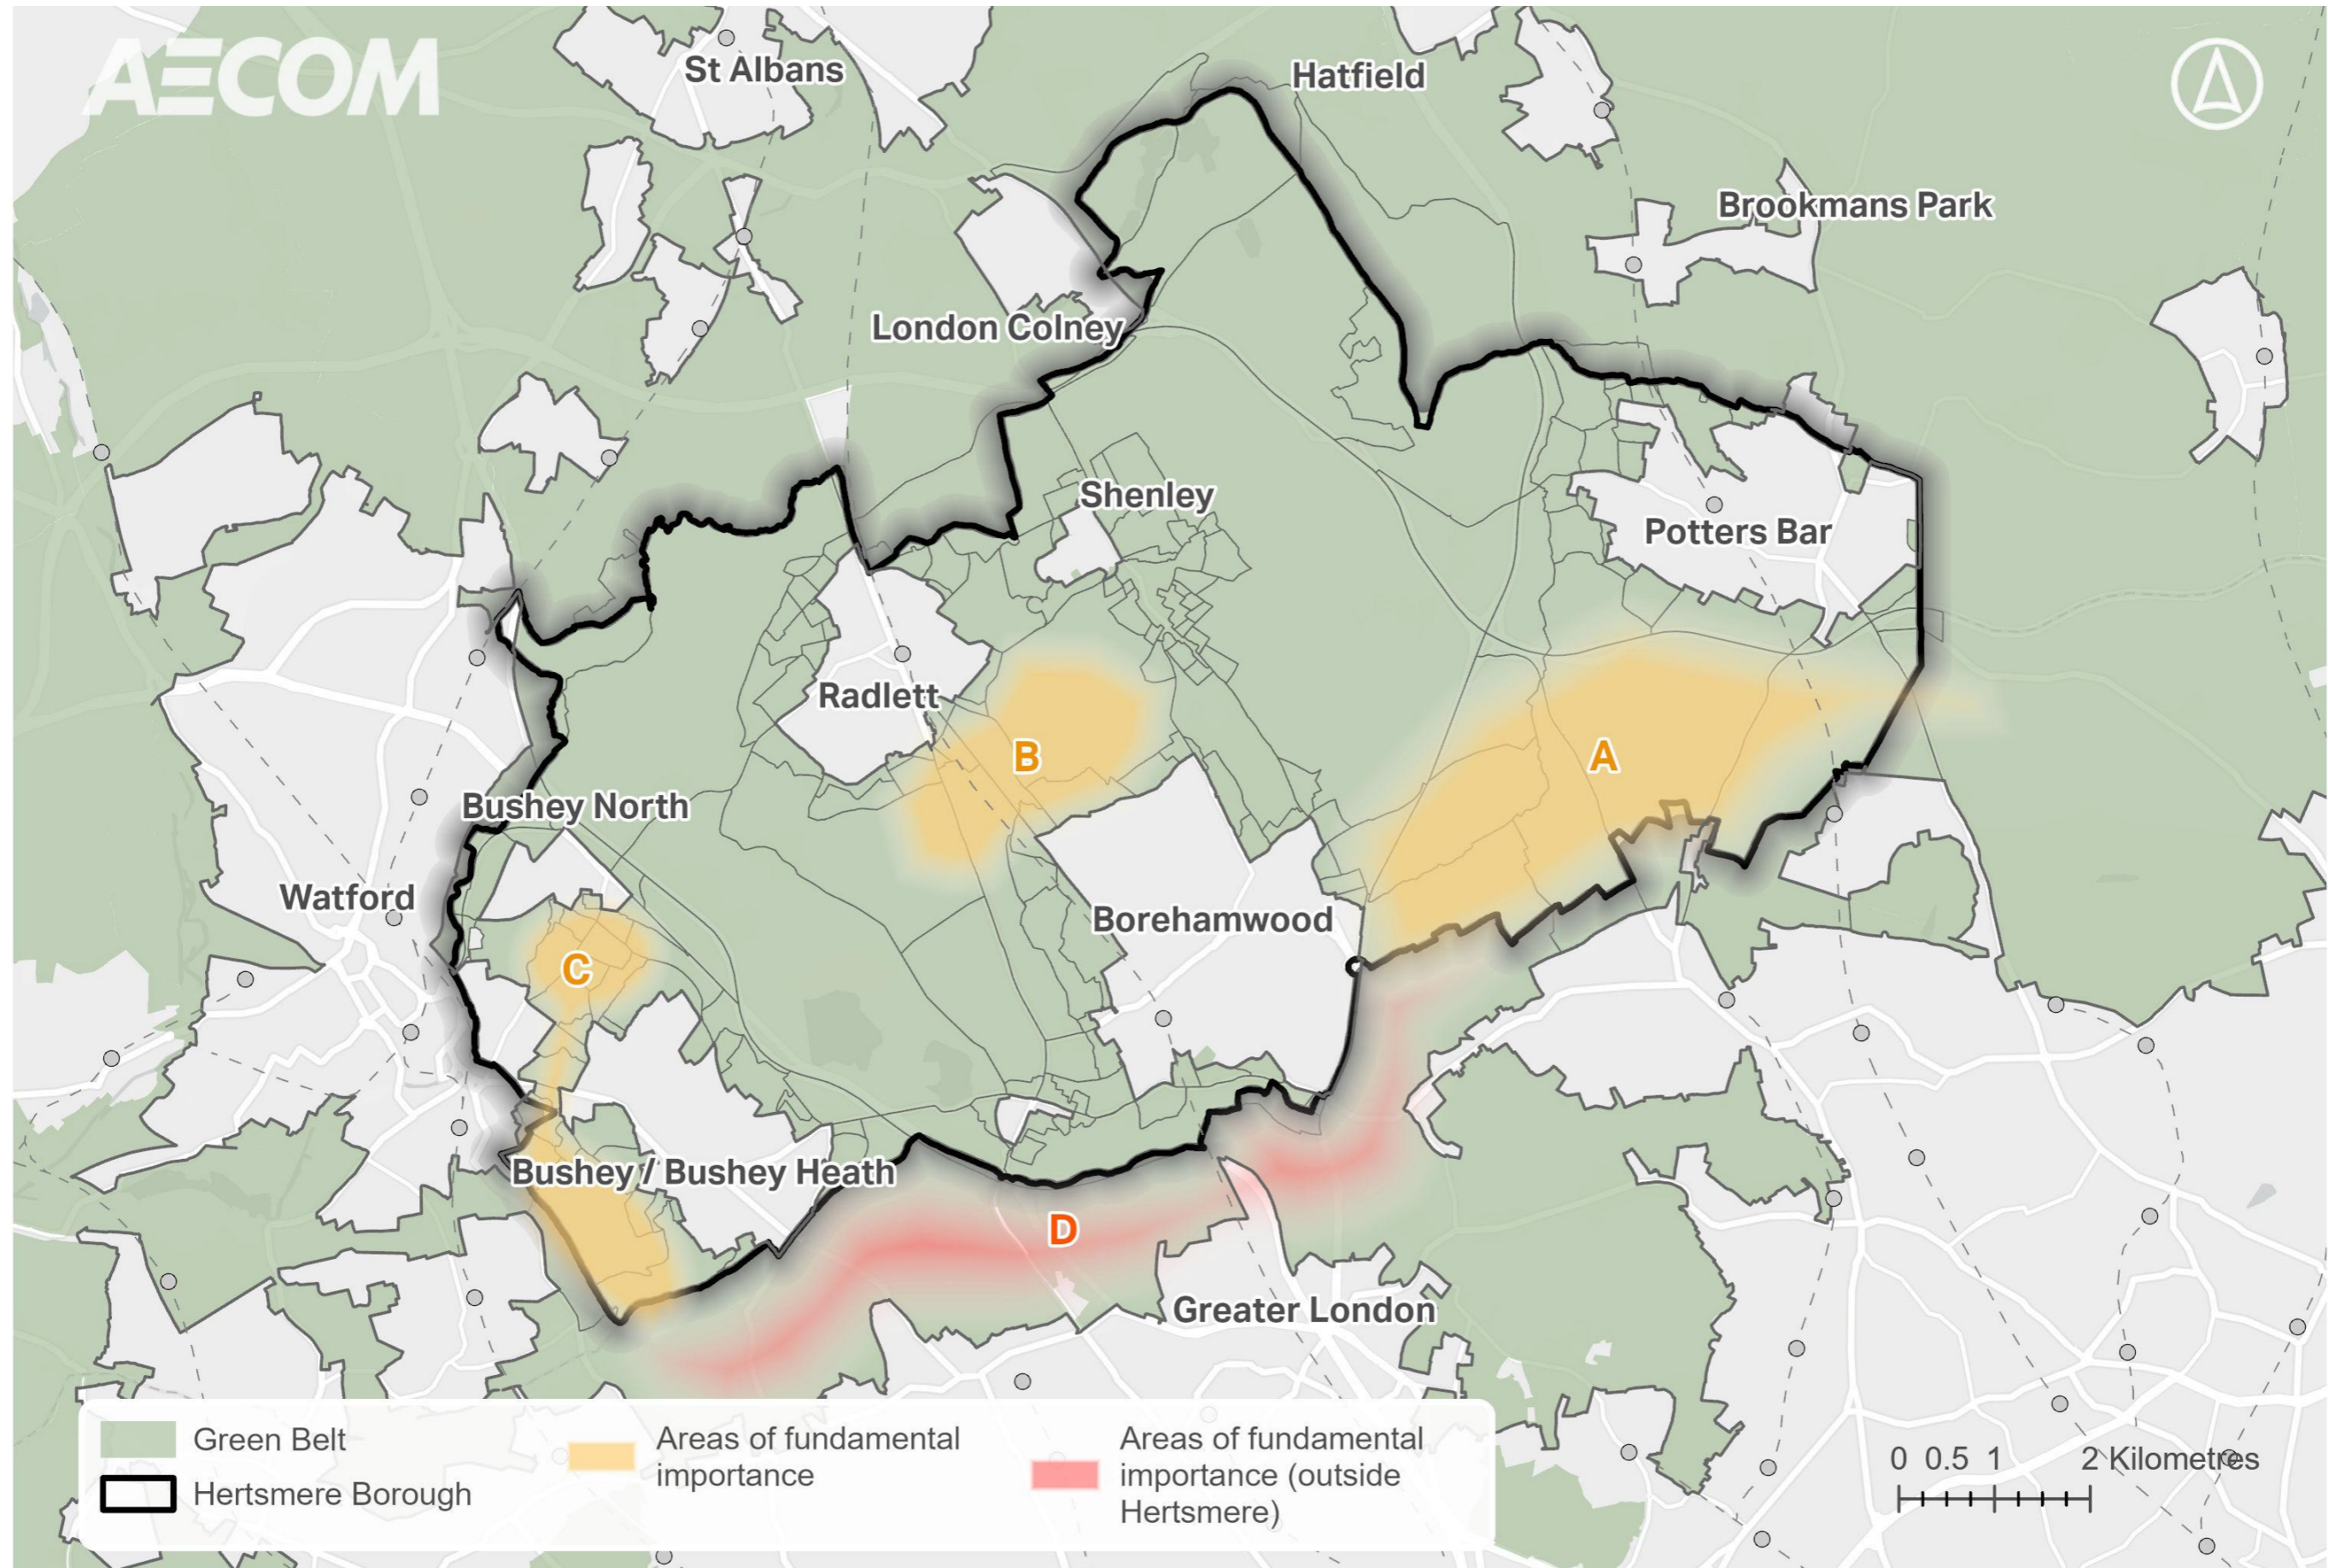

4. Fundamentally undermining the remaining Green Belt

4.1 Introduction

- 4.1.1 The final step in the Planning Practice Guidance process is to identify if the release or development of the assessment area/s would fundamentally undermine the five Green Belt purposes (taken together) of the remaining Green Belt when considered across the area of the plan.
- 4.1.2 This assessment is intended to inform future decisions by Hertsmere Borough Council in the light of NPPF paragraph 146, which states that “if [exceptional circumstances for Green Belt release have been established], authorities should review Green Belt boundaries... and propose alterations to meet [housing needs] in full, unless the review provides clear evidence that doing so would fundamentally undermine the purposes (taken together) of the remaining Green Belt, when considered across the area of the plan.”
- 4.1.3 The only elaboration in the PPG is the statement that “in reaching this judgement, authorities should consider whether, or the extent to which, the release or development of Green Belt Land would affect the ability of all the remaining Green Belt across the area of the plan from serving all five of the Green Belt purposes in a meaningful way”.
- 4.1.4 The purposes not hitherto considered in this report, because they are not relevant to the identification of grey belt, are:
- Purpose C: to assist in the safeguarding of the countryside from encroachment; and
 - Purpose E: to assist in urban regeneration, by encouraging the regeneration of derelict and other urban land.
- 4.1.5 As all parts of the Green Belt play an equal role in respect of purpose E, the new variables introduced as this stage of the assessment are:
- Safeguarding countryside that is currently open and/or free from encroachment (purpose C); and
 - Protecting countryside that is of fundamental importance to the Green Belt in Hertsmere as a whole. This may include Green Belt land that is sensitive because it is strategically important but to some extent encroached, making it vulnerable to be eroded with further development.
- 4.1.6 The areas that are identified to be fundamentally important to the Green Belt across the area of the plan as a whole are introduced below.

4.2 Fundamentally important areas of Green Belt

- 4.2.1 Whilst all Green Belt contributes to the strategic purposes of the Green Belt designation, some areas play a particularly important role in maintaining the overall integrity and function of the Green Belt across Hertsmere.
- 4.2.2 The areas below, illustrated in figure 4.1, are judged to be of fundamental importance because they contain AAs that contribute strongly to purposes A and B in the assessment presented in chapter 3 and they also contain AAs that are particularly sensitive to encroachment. As no settlements in Hertsmere are identified as historic towns for the purposes of this Green Belt Assessment, and an equal contribution to Purpose E is assumed, references to “all purposes” are taken to mean Purposes A, B and C.

Figure 4.1 Fundamentally important areas of Green Belt

Area A: between Greater London and Borehamwood/Potters Bar within Hertsmere

- 4.2.3 AAs in this area are judged above to contribute strongly to both purposes A and B, reflecting the proximity of both of the Hertsmere towns to the built up parts of Barnet and the real possibility of them being subsumed into London.
- 4.2.4 Most of this area is southeast of the A1 and south of the M25. Containing no settlements beyond the hamlet at Ganwick Corner, this part of the area is very free of encroachment and so makes a strong contribution to purpose C as well as purposes A and B.

Area B: between Borehamwood and Radlett

- 4.2.5 As noted in section 3.3 above, the gap between Borehamwood and Radlett comes close to being just one mile at the narrowest point. It contributes more strongly to purpose B than purpose A, largely because the topography to the north of Borehamwood means that it is possible to develop on that edge without losing the sense of separation.
- 4.2.6 Away from the settlement edges and some ribbon development along Theobald Street, the part of the area east of the railway line is free from encroachment by inappropriate development. The same is also largely true of the part of the area west of the railway line, with the exception of long-established educational uses. Therefore, contribution to purpose C can also be said to be strong.

Area C: between Bushey and Watford/South Oxhey, and between Bushey and Bushey North

- 4.2.7 Bushey is a town in its own right and manages to maintain separation from the settlements to the north, west and south by sometimes narrow margins. This makes the Green Belt gap in these directions sensitive. This is reflected by AAs in the area that contribute strongly to both purposes A and B.
- 4.2.8 Aided by the variable topography, parts of the area, such as around Merry Hill, are free of encroachment, although urban views are rarely far away. However, other parts of the area, such as along and around Aldenham Road, have seen notable levels of encroachment. The contribution to purpose C is, therefore, mixed across the area. The possibility of further encroachment is a factor in the sensitivity of this gap, thus contributing to this being a fundamentally important area of Green Belt.

Area D: between Greater London and Bushey/Borehamwood

- 4.2.9 This area is mostly not within the study area. As such, it is beyond the scope of this report to assess the land in it against the Green Belt purposes. However, it is identified here because, like area A, is crucial to the separation of London and the Hertsmere settlements. The GBAs in this area may confirm strong contribution to purposes A, B and, in parts, C, and may also note that there are some parts of this very sensitive gap that have been eroded.

4.3 Possible impacts on the wider Green Belt of the development of clusters of assessment areas

- 4.3.1 The focus of this section is those AAs that have been identified in chapter 3 as being grey belt or provisional grey belt. Note that for the rest of this section, the term grey belt is used as a shorthand to also incorporate provisional grey belt.
- 4.3.2 The first part of the analysis is to consider the alignment of clusters of grey belt with the fundamentally important areas of Green Belt identified in section 4.2 above. Where there is alignment, it may be judged that development would be inappropriate despite the grey belt conclusions.
- 4.3.3 Relatively small amounts of grey belt are present in areas A and B.

- 4.3.4 The grey belt clusters in **area A** are mainly in the less sensitive parts north of the M25 and north west of the A1. Development in these parts of the area would not fundamentally undermine the remaining Green Belt. There are two AAs in this cluster that are south of the M25. The first is OGB-017, which is a very small AA immediately adjacent to the A1/M25 junction and contains the Mimms Caravan Park; it could be developed without fundamentally undermining the remaining Green Belt. The second is the adjacent OGB-016, which is not encroached by inappropriate development and could not be developed without fundamentally undermining the remaining Green Belt.
- 4.3.5 The grey belt clusters in **area B** are mainly on the edge of settlements and could be developed without fundamentally undermining the remaining Green Belt. However, judgements will need to be made about the eastern part of OGB-035 and OGB-041, either side of Watling Street, the development of which possibly could fundamentally undermine the remaining Green Belt.
- 4.3.6 There are two grey belt clusters in **area C**. The first cluster is on the western edge of Bushey, in the gap towards South Oxhey and Watford. There is some encroachment within the eastern part of this gap and it is possible that the grey belt AAs BU-019 and BU-020 could be developed without fundamentally undermining the remaining Green Belt. However, it is unlikely that the rest of the grey belt cluster in this area, BU-015 to BU-018 inclusive, could be developed without fundamentally undermining the remaining Green Belt because of the open nature of this sensitive gap.
- 4.3.7 The second grey belt cluster in area C is between Bushey North and Bushey. The gap is small and has been significant levels of encroachment that means that some of the grey belt AAs, including WA-004, WA-005, OGB-038c, BU-033 and BU-035, could be developed without fundamentally undermining the remaining Green Belt. The same cannot be said for the remainder of the grey belt cluster and there is a policy decision to be made about the future of the Green Belt between Bushey North and Bushey.
- 4.3.8 This report makes no further comment on any grey belt clusters in **area D**, which is almost entirely outside the study area.
- 4.3.9 A substantial proportion of the Green Belt outside the most strategically important areas has been identified as potentially falling within the definition of grey belt, reflecting the detailed AA-based assessment undertaken. This does not imply that such areas should be released for development, as any decisions on Green Belt release must consider the full range of planning, environmental and sustainability factors through the Local Plan process.
- 4.3.10 In this context, it is important to be clear that there is no realistic scenario whereby all of these AAs are released for development. The Local Plan that must consider locations for growth, and any decisions to allocate a site for development would account for this Green Belt Assessment and wider evidence/factors, including the requirement for development to be in sustainable locations.

Appendix A – Assessment proformas

Assessment Area BO-001a

Assessment Area

Reference	BO-001a
Settlement	Borehamwood (LBUA)

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA contains no existing development. There are no physical features in reasonable proximity that could restrict and contain development. The AA will become partially enclosed by existing development when the consented scheme (24/0451/FUL) to the northeast is completed. As such, development of the AA would not result in an incongruous pattern of development.</p>
Purpose B	<p>3a. Weak Contribution: The AA comprises a small part of the gap between Borehamwood and Radlett. The AA does not make any contribution to visual separation.</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of one Grade II listed building)
Comments on boundaries	Edge of existing development, edge of consented site, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area BO-001b

Purposes Assessment

Purpose A

3a. Weak Contribution: The AA includes a consented scheme (24/0451/FUL) for 186 units and is currently under development.

Purpose B

3a. Weak Contribution: The AA comprises a small part of the gap between Borehamwood and Radlett. The AA does not make any contribution to visual separation.

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

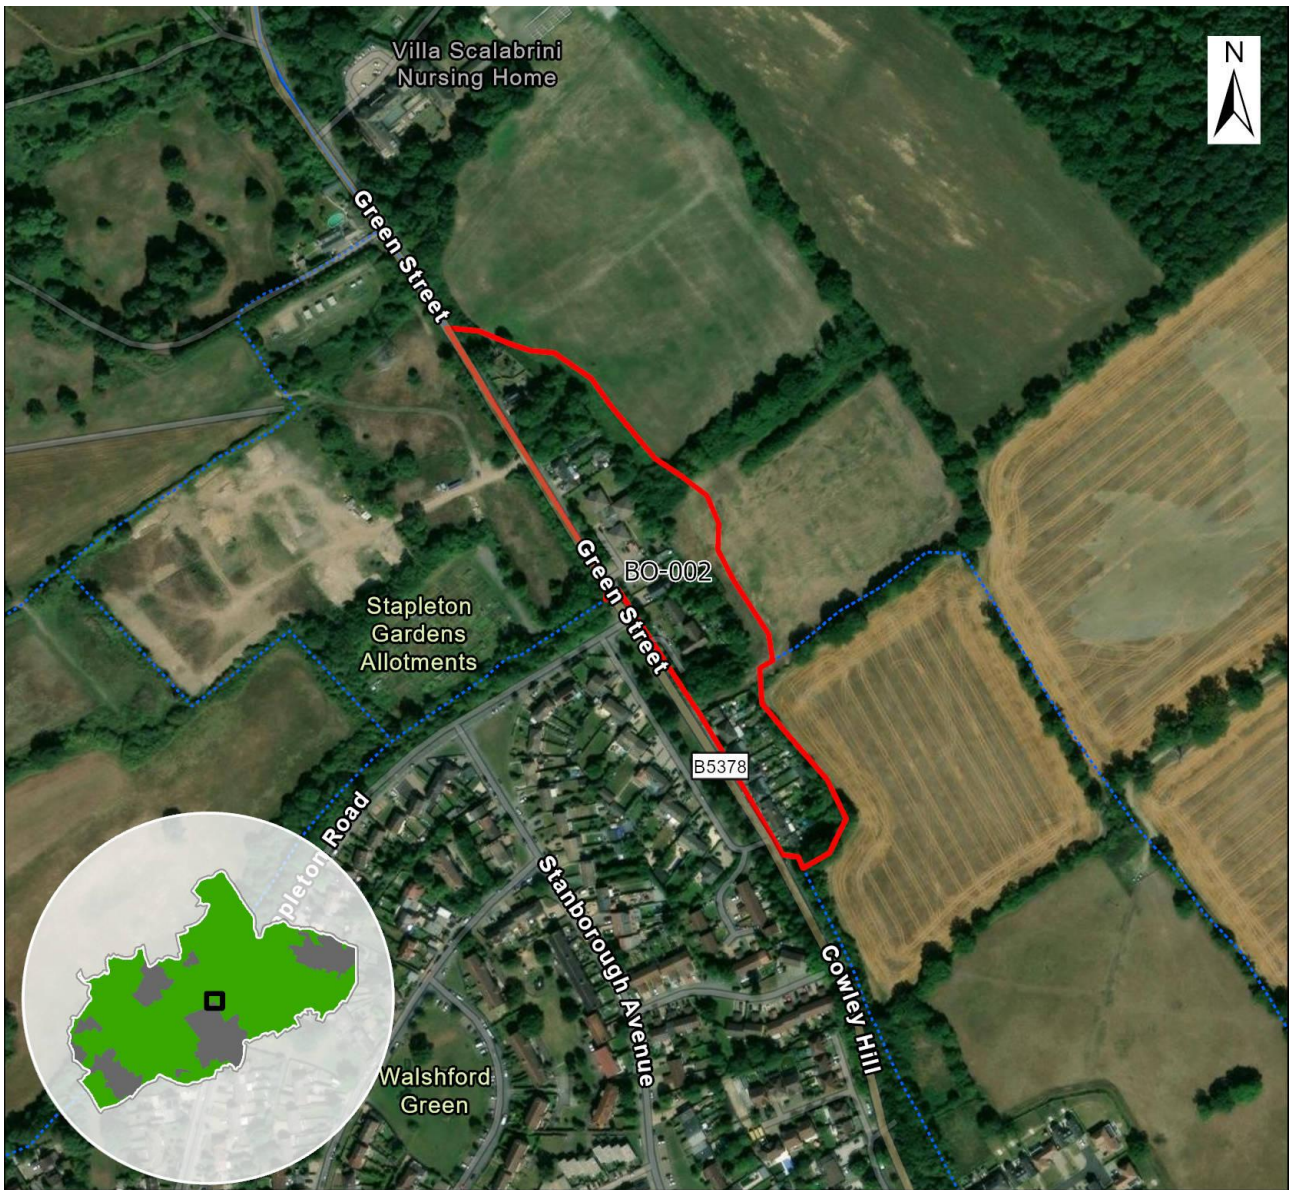

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of one Grade II listed building)
Comments on boundaries	Consented site, field boundaries, road
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area BO-002

Assessment Area

Reference	BO-002
Settlement	Borehamwood (LBUA)

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA contains significant existing development across the whole parcel and the AA is not enclosed by existing development. There are no physical features in reasonable proximity that could restrict and contain development. Existing development on the AA is already forming a small finger extending north. Development of the AA would not result in an incongruous pattern of development as it would continue an established pattern of development along the eastern edge of Borehamwood.</p>
Purpose B	<p>3b. No Contribution: The AA does not contribute towards purpose B because it does not form part of a gap between towns.</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: There is a consented scheme (23/0053/OUT) for 74 units on the western part of the AA. The AA is partially enclosed to the west by existing development, and to the east with the consented scheme (23/0937/OUT). The edge of the wood to the south, the existing development to the west and the consented scheme to the east of the AA would restrict and contain development and restrict sprawl in these directions. Development of the AA would not result in an incongruous pattern of development.</p>
Purpose B	<p>2. Moderate Contribution: The AA comprises a small part of the gap between Borehamwood and Greater London. It is free of existing development. The AA could likely be developed without the loss of visual separation due to the</p>

proximity of structures (existing development in gap directly south of AA boundary) and presence of natural landscape elements (woodland to the south).

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
------------	--

Biodiversity	No strong reason for refusing or restricting development
--------------	--

Purposes Assessment

Purpose A **2. Moderate Contribution:** The AA contains existing development along the northern boundary. The AA is partially enclosed by existing development to the north and west. The motorway to the south of the AA would restrict and contain development in this direction and prevent sprawl but there are no physical features to restrict and contain development beyond the eastern boundary. Development of the AA would result in an incongruous pattern of development but is assessed to be making a moderate contribution because it is not free of development, is partially enclosed and is subject to other urbansing influences.

Purpose B **2. Moderate Contribution:** The AA comprises a small part of the gap between Borehamwood and Greater London. It is not free of existing development. The AA

could likely be developed without the loss of visual separation due to the presence of natural landscape elements and topography, with elevated land to the south.

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Purposes Assessment

Purpose A	<p>1. Strong Contribution: The AA contains a small amount of existing development along the southern boundary with some residential development. The AA is partially enclosed by existing development to the east and south-west. There are no physical features in reasonable proximity to restrict and contain development. Development of the AA would result in an incongruous pattern of development due to the 'finger' extending west, including by coalescing with Elstree.</p>
Purpose B	<p>2. Moderate Contribution: The AA comprises a small part of the gap between Borehamwood and Bushey, with Elstree acting as a stepping stone between the two. It is not free of existing development. The AA could likely be developed without the loss of visual separation due to the undulating topography and the</p>

proximity of structures (existing development in gap directly south of AA boundary).

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk No strong reason for refusing or restricting development

Biodiversity No strong reason for refusing or restricting development

Irreplaceable habitat No strong reason for refusing or restricting development

Local Green Space No strong reason for refusing or restricting development

Historic environment Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of Elstree Village Conservation Area, ten Grade II listed buildings and one Grade II* listed building)

Comments on boundaries Edge of existing development, road, edge of wood

Grey belt conclusion Not grey belt

Reason for conclusion Strong contribution to purpose A

Assessment Area BO-019

Assessment Area

Reference	BO-019
Settlement	Borehamwood (LBUA)

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA does not contain any existing development and the AA is partially enclosed by existing development to the north and east. The wood to the south and the existing development to the east of the AA would restrict and contain development in this direction but there are no physical features to restrict and contain development beyond the western boundary. Development of the AA would not result in an incongruous pattern of development.</p>
Purpose B	<p>2. Moderate Contribution: The AA comprises a small part of the gap between Borehamwood and Bushey, with Elstree acting as a stepping stone between the two. It is free of existing development. The AA could likely be developed without the loss of visual separation due to the undulating topography, the proximity of</p>

structures (existing development in gap south of AA boundary) and presence of natural landscape elements (woodland to the south).

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of two Grade II listed buildings)
Comments on boundaries	Edge of existing development, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area BO-020

Assessment Area

Reference	BO-020
Settlement	Borehamwood (LBUA)

Purposes Assessment

Purpose A	3a. Weak Contribution: The AA contains significant existing development.
Purpose B	3a. Weak Contribution: The AA comprises a very small part of the gap between Borehamwood and Bushey, with Elstree acting as a stepping stone between the two. The AA has been developed without the loss of visual separation.
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
------------	--

Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains one Grade II listed building)
Comments on boundaries	Road, edge of existing development, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area BO-021

Assessment Area

Reference	BO-021
Settlement	Borehamwood (LBUA)

Purposes Assessment

Purpose A	<p>1. Strong Contribution: The AA contains a small amount of existing development along the western boundary with some small scale golf-related development, and the rest is a golf course. The AA is not enclosed by existing development. Watling Street to the west of the AA boundary could restrict and contain development and restrict sprawl in this direction but there are no other physical features in reasonable proximity to restrict and contain development. Development of the AA would result in an incongruous pattern of development due to the 'finger' extending north given the gap that would remain between the site and the existing settlement.</p>
Purpose B	<p>2. Moderate Contribution: The AA comprises a small part of the gap between Borehamwood and Bushey. The AA could likely be developed without the loss of visual separation due to the undulating topography, the presence of structures</p>

(M1 and A41 and associated screening within the gap) and the presence of natural landscape elements (woodland to the west).

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
------------	--

Biodiversity	No strong reason for refusing or restricting development
--------------	--

Irreplaceable habitat	No strong reason for refusing or restricting development
-----------------------	--

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA is adjacent to Bushey and comprises a small part of the gap to Greater London. It is not free of development. The AA could likely be developed without the loss of visual separation due to the undulating topography and the presence of natural landscape elements (extensive vegetation on site boundary, and woodland to the south) that would preserve visual separation.
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of one Grade II listed building)
Comments on boundaries	Edge of existing development
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA is adjacent to Bushey and comprises a substantial part of the gap to South Oxhey. The AA comprises a golf course and is largely free of existing development. The AA contains a consented scheme (24/1434/FUL) for 15 units at the Hartsbourne Country Club. The majority of the AA could likely be developed without the loss of visual separation due to the undulating topography and the presence of natural landscape elements (screening from trees and woodland to the west).

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of one Grade II listed building)
Comments on boundaries	Extent of golf course
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Settlement Bushey (Town)

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA does not contain any existing development and is partially enclosed by existing development to the west and east. Existing development to the west and east would restrict development and prevent sprawl in these directions, but there is no physical boundary in reasonable proximity to contain development and restrict sprawl to the south. Development of the AA would not result in an incongruous pattern of development. However, the gap between Bushey and Watford is extremely sensitive.</p>
Purpose B	<p>1. Strong Contribution: The AA comprises a substantial part of the sensitive gap between Bushey and Watford and if developed would result in coalescence between the towns.</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Purposes Assessment

Purpose A	<p>1. Strong Contribution: The AA contains no existing development (small amount of agricultural development in north). The AA is not enclosed by existing development. Existing development to the east and the road to the north and west would restrict and contain development in these directions and prevent sprawl. Development of the AA would result in an incongruous pattern of development by creating an extended finger of development connecting Watford and Bushey North.</p>
Purpose B	<p>1. Strong Contribution: The AA comprises a substantial part of the gap between Bushey and Watford and if developed would result in coalescence between the towns.</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	Potentially provides a strong reason for refusing or restricting development with little or no possibility of mitigation
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains Scheduled Monument [Moated site at Bushey Hall Farm] and one Grade II listed building)
Comments on boundaries	Roads
Grey belt conclusion	Not grey belt
Reason for conclusion	Strong contribution to purposes A and B

Purposes Assessment

Purpose A	<p>3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.</p>
Purpose B	<p>2. Moderate Contribution: The AA comprises a small part of the gap between Bushey and Borehamwood, with Elstree acting as a stepping stone between the two. It is not free of development. The AA contains a consented scheme (23/1123/FUL) for 107 units. The AA could likely be developed without the loss of visual separation due to the proximity of structures (existing development within the gap to the east) and the presence of natural landscape elements (woodland to the east) which would mitigate the sense of reduced visual separation.</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains Elstree Village Conservation Area, three Grade II listed buildings, one Grade II* listed building and within setting of Aldenham House Park and Garden)
Comments on boundaries	Edge of existing development
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A

3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.

Purpose B

2. Moderate Contribution: The AA comprises a small part of the gap between Potters Bar and Greater London, as well as Potters Bar and Borehamwood. The AA could likely be developed without the loss of visual separation due to the proximity of structures (Barnet Bypass, M25 and associated screening).

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

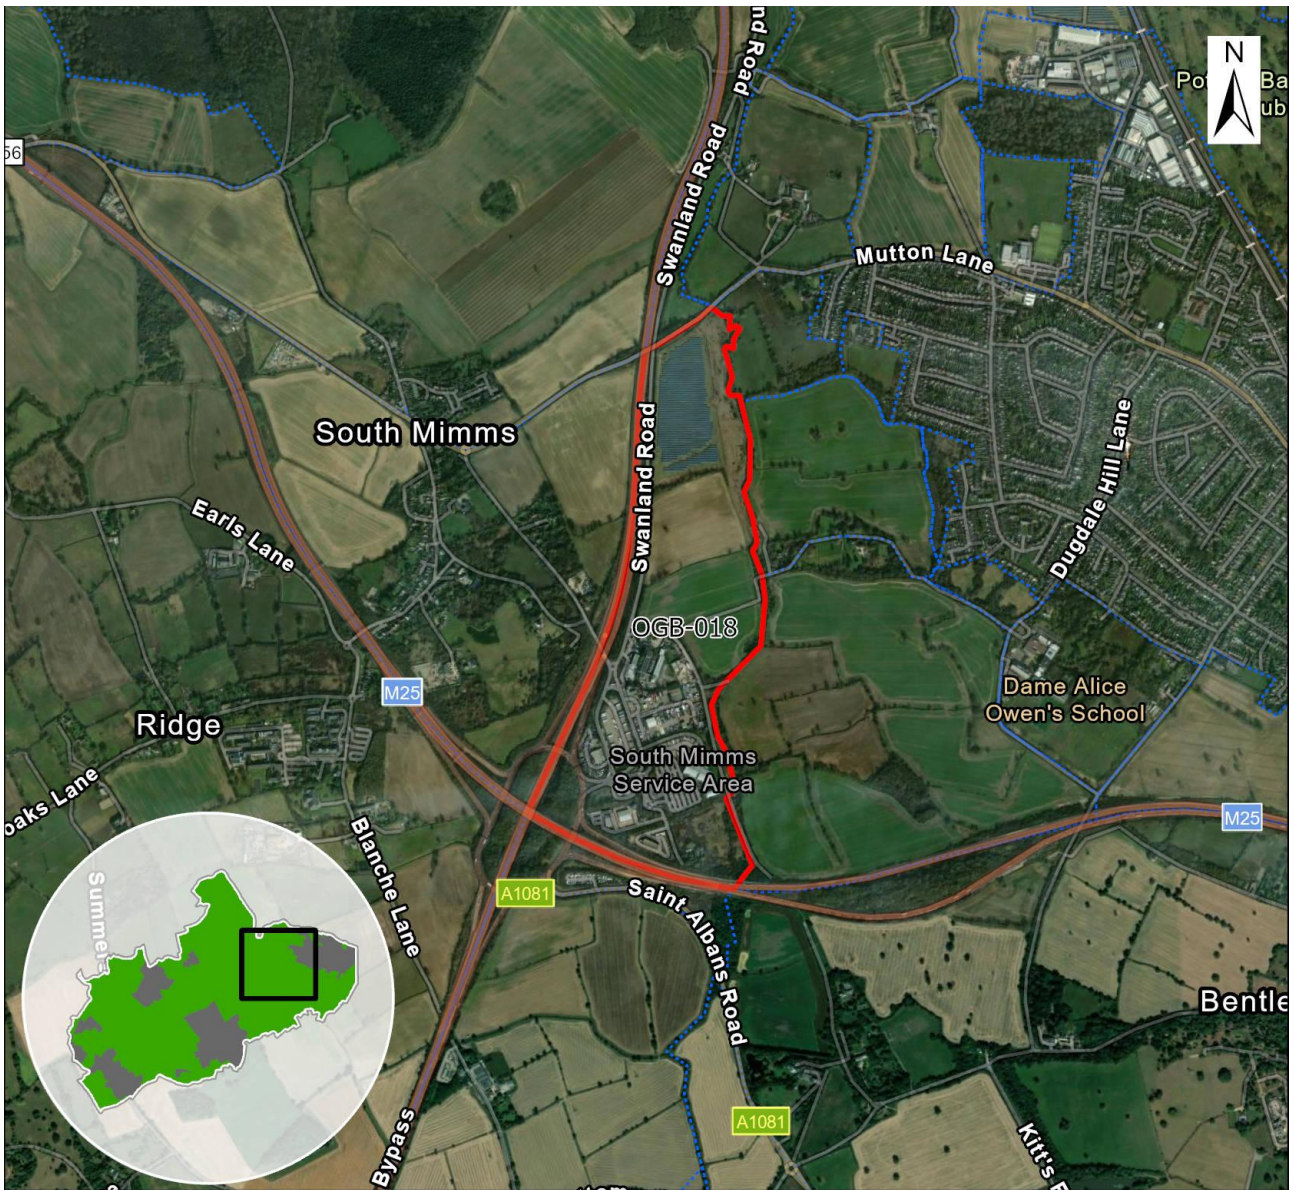

Footnote 7 Assets/Constraints

Flood risk	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of one Grade II listed building)
Comments on boundaries	M25, A1, brook
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a small part of the gap between Potters Bar and Greater London, as well as Potters Bar and Borehamwood. It is not free of development. There are some consented schemes (22/2159/FUL and 23/1625/FUL) for 48 and 49 units respectively on the southwestern previously developed part of the AA. The AA could likely be developed without the loss of visual separation due to the presence of structures (A1, M25 and associated screening as well as existing development within the gap to the west of the AA).

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of South Mimms Conservation Area and two Grade II listed buildings)
Comments on boundaries	M25, A1, brook
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a substantial part of the gap between Potters Bar and Borehamwood, and London Colney and Borehamwood. There is a consented scheme (22/1097/FUL) for 82 units in the north of the AA. The AA could likely be developed without the loss of visual separation due to topography and the proximity of structures (M25, A1 and associated screening).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

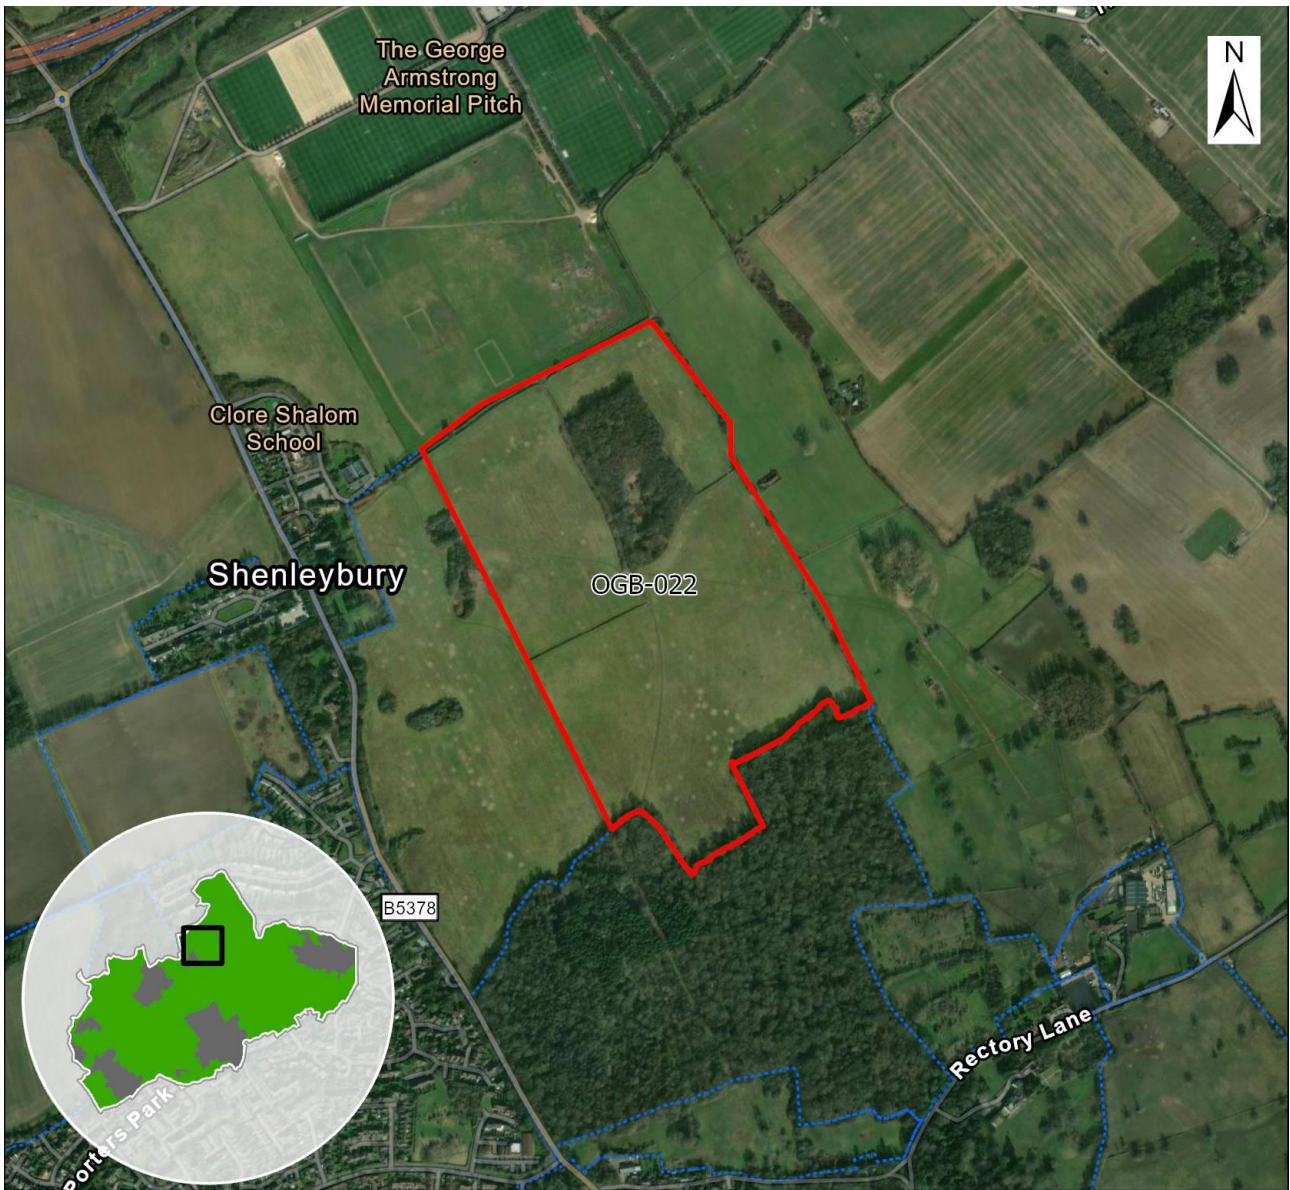

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (ancient woodland)
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains Ridge Conservation Area, twenty-seven Grade II listed buildings and three Grade II* listed buildings)
Comments on boundaries	M25, roads, edge of existing development
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a relatively small part of the gap between Bushey and Borehamwood, as well as part of the gap between Borehamwood and Radlett. The AA contains a consented scheme (23/0635/FUL) for 52 units. The AA could likely be developed without the loss of visual separation due to the presence of structures (existing development within the gap to the west, M1 and A41 and associated screening).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains three Grade II listed buildings)
Comments on boundaries	Roads, railway, river, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a relatively substantial part of the gap between Borehamwood and Greater London. The AA could likely be developed without the loss of visual separation due to the proximity of structures (M1 and associated screening) and the presence of natural landscape elements (woodland to the south).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

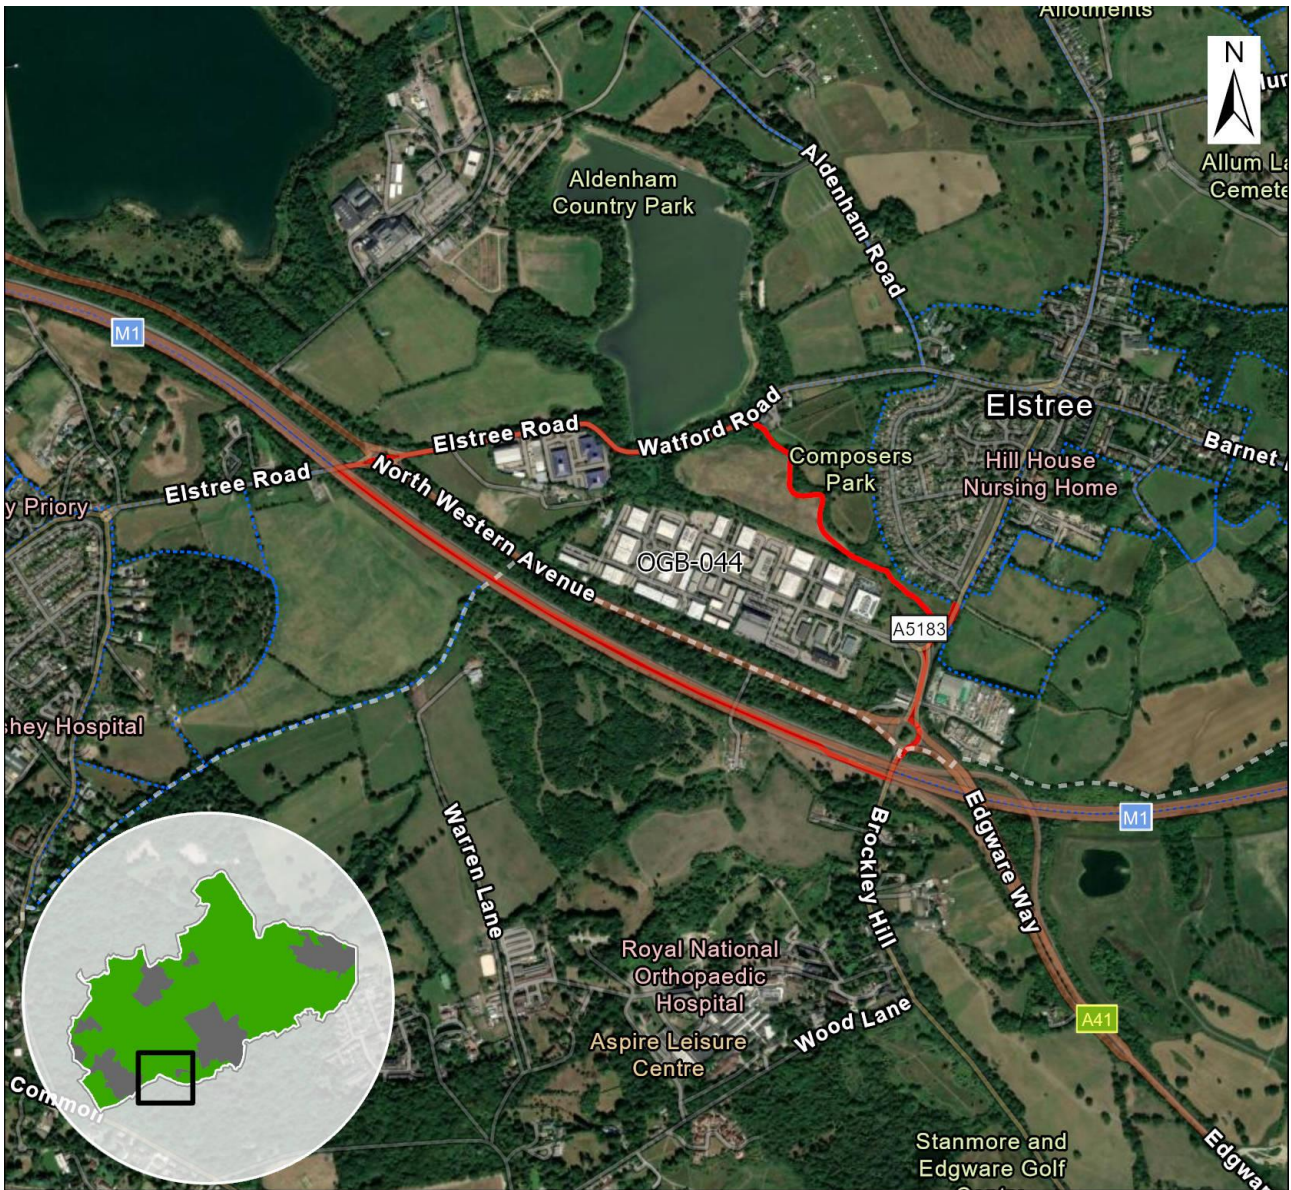

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains five Grade II listed buildings and one Grade II* listed building)
Comments on boundaries	M1, roads, edge of existing development, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a relatively substantial part of the gap between Bushey and Borehamwood. The AA is already in large part developed and there are several consented schemes on the AA (22/1127/FUL, 23/0547/FUL and 22/2147/OUT) for 39, 65 and 150 units respectively. The AA does not contribute to the loss of visual separation due to the existing development in the AA and proximity of structures (M1 and associated screening).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	No strong reason for refusing or restricting development

Purposes Assessment

Purpose A

3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.

Purpose B

1. Strong Contribution: The AA comprises a substantial part of the gap between Bushey and Watford and if developed would result in coalescence between the towns.

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (ancient woodland)
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains one Grade II listed building)
Comments on boundaries	Edge of golf course, roads, field boundaries
Grey belt conclusion	Not grey belt
Reason for conclusion	Strong contribution to purpose B

Assessment Area RA-002

Assessment Area

Reference	RA-002
Settlement	Radlett (Town)

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a small part of the gap between Radlett and London Colney. The AA could likely be developed without the loss of visual separation due to the proximity of structures (existing development within the gap, M25 and associated screening) and presence of natural landscape elements (woodland to the north).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of two Grade II listed buildings)
Comments on boundaries	Edge of development, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	3b. No Contribution: The AA does not contribute towards purpose B because it does not form part of a gap between towns.
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
------------	--

Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of Shenley Village Conservation Area and one Grade II listed building)
Comments on boundaries	Extent of golf course
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area RA-006

Assessment Area

Reference	RA-006
Settlement	Radlett (Town)

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a relatively small part of the gap between Radlett and Borehamwood. There is a scheme consented by appeal (24/1211/OUT). The AA could likely be developed without the loss of visual separation due to the presence of natural landscape elements (woodland to the south).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	No strong reason for refusing or restricting development
Comments on boundaries	Edge of wood
Grey belt conclusion	Grey belt
Reason for conclusion	No strong contribution to Purposes A, B or D and no Footnote 7 constraints.

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a relatively substantial part of the gap between Radlett and Borehamwood. The AA could likely be developed without the loss of visual separation due to the undulating topography, proximity of structures (railway line and associated screening) and presence of natural landscape elements (woodland to the south).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of Radlett South Conservation Area and one Grade II listed building)
Comments on boundaries	Railway, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area RA-011

Assessment Area

Settlement	Radlett (Town)

Purposes Assessment

Purpose A	3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.
Purpose B	2. Moderate Contribution: The AA comprises a part of the gap between Radlett and Borehamwood. It is not free of development. The AA could likely be developed without the loss of visual separation due to the undulating topography, proximity of structures (railway line and associated screening) and presence of natural landscape elements (woodland to the south).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains Radlett South Conservation Area and within setting of one Grade II listed building)
Comments on boundaries	Roads, edge of existing development
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Purposes Assessment

Purpose A

3b. No Contribution: The AA does not contribute towards purpose A because it is not adjacent or near to a large built up area.

Purpose B

2. Moderate Contribution: The AA comprises a small part of the gap between Borehamwood and London Colney. The AA could likely be developed without the loss of visual separation due to the presence of structures (M25 and associated screening) and presence of natural landscape elements (woodland in the gap).

Purpose D

3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of Shenley Village Conservation Area and two Grade II listed buildings)
Comments on boundaries	Road, edge of conservation area, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area WA-001

Assessment Area

Reference	WA-001
Settlement	Watford (LBUA)

Purposes Assessment

Purpose A	<p>1. Strong Contribution: The AA contains a small amount of existing development in the north with some small scale residential development. The AA is not enclosed by existing development. The railway to the west and the wood to the north of the AA would restrict and contain development in these directions and prevent sprawl but there are no physical features to restrict and contain development beyond the eastern and southern boundary and development would result in an incongruous pattern of development, breaching the M1.</p>
Purpose B	<p>2. Moderate Contribution: The AA comprises a part of the gap between Radlett and Watford. The AA could likely be developed without the loss of visual separation due to the proximity of structures (M1 and associated screening) and</p>

	presence of natural landscape elements (River Colne corridor and woodland to the east).
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

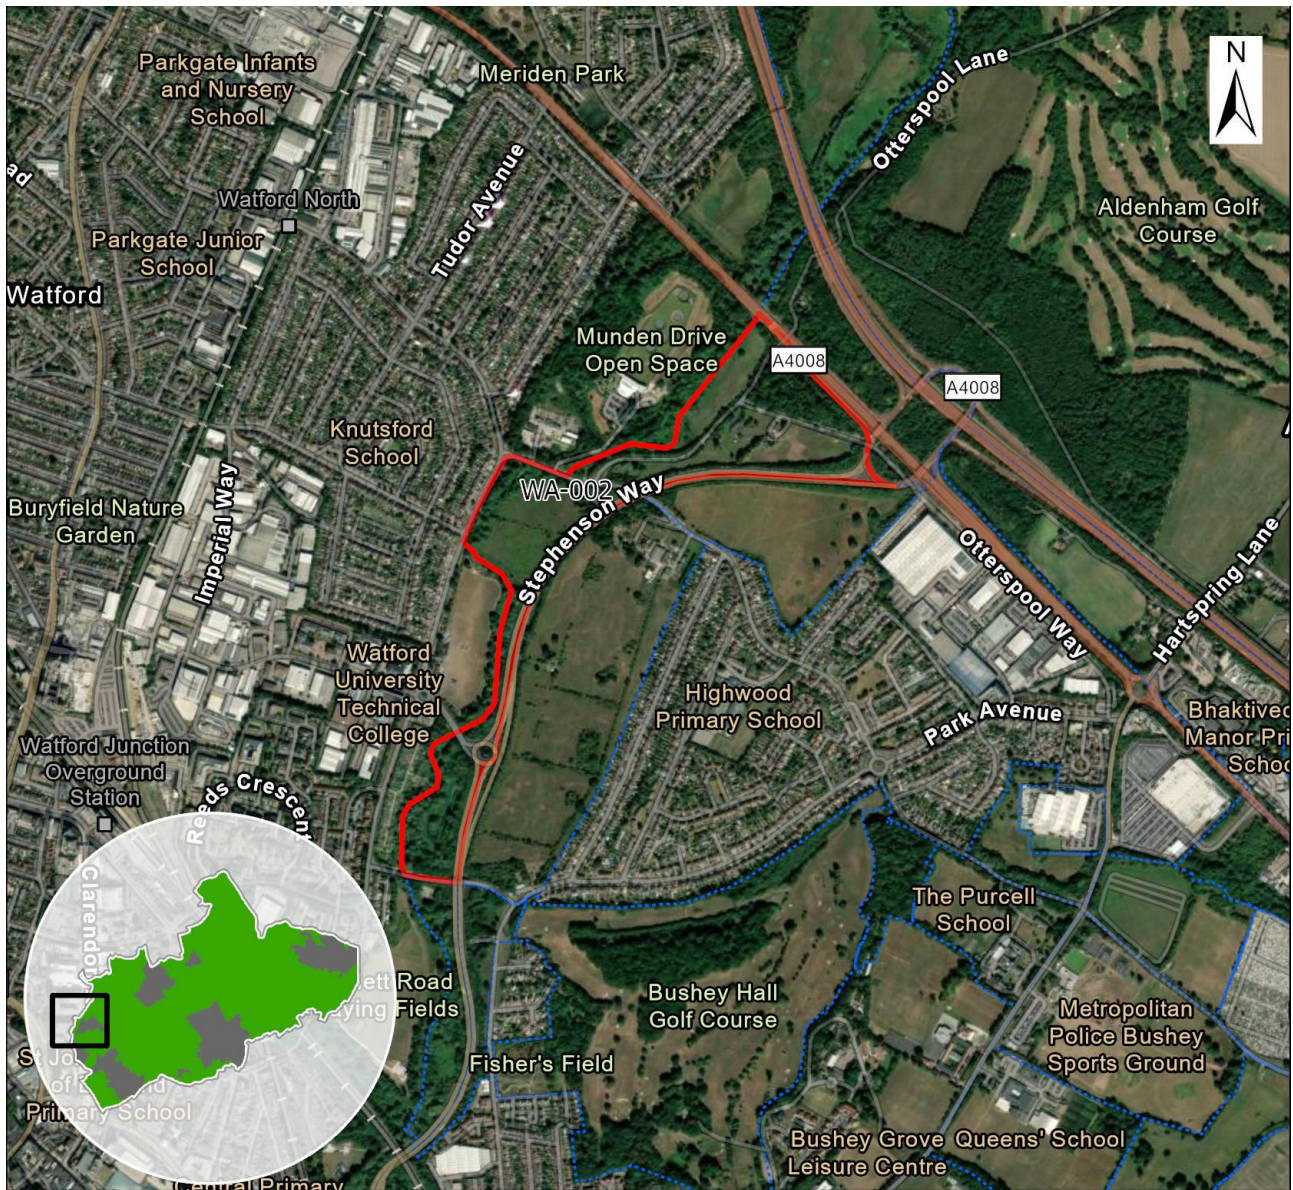

Footnote 7 Assets/Constraints

Flood risk	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation
Biodiversity	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (adjacent to Bricket Wood SSSI)
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains three Grade II listed buildings and within setting of Wall Hall Registered Park and Garden)
Comments on boundaries	M1, river
Grey belt conclusion	Not grey belt
Reason for conclusion	Strong contribution to purpose A

Assessment Area WA-002

Assessment Area

Reference	WA-002
Settlement	Watford (LBUA)

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA does not contain any existing development and the AA is partially enclosed by existing development to the west. Existing development to the west and the road to the east and north would restrict and contain development and prevent sprawl. Development of the AA would result in an incongruous pattern of development.</p>
Purpose B	<p>2. Moderate Contribution: The AA comprises a large part of the gap between Bushey and Watford. The AA could likely be developed without the loss of visual separation due to the proximity of structures (Stephenson Way) and presence of natural landscape elements (green screening along Stephenson Way, woodland to northwest and River Colne corridor).</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA contains a small amount of development in the north. The AA is not enclosed by existing development. The road to the east and south would restrict and contain development in these directions and prevent sprawl, but there are no physical features to restrict and contain development beyond the western boundary. Development of the AA would not result in an incongruous pattern of development.</p>
Purpose B	<p>1. Strong Contribution: The AA comprises a large part of the gap between Bushey and Watford. If the AA was developed it would be highly likely to result in the loss of visual separation between the towns.</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	Potentially provides a strong reason for refusing or restricting development with little or no possibility of mitigation
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of two Grade II listed buildings)
Comments on boundaries	Roads
Grey belt conclusion	Not grey belt
Reason for conclusion	Strong contribution to purpose B

Assessment Area **WA-004**

Assessment Area

Reference	WA-004
Settlement	Watford (LBUA)

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA contains some development throughout the parcel. The AA is partially enclosed by existing development to the north and a consented scheme to the west (24/1022/OUT). There are no physical features in reasonable proximity that could restrict and contain development. Development of the AA would not result in an incongruous pattern of development because of the amount of existing development.</p>
Purpose B	<p>1. Strong Contribution: The AA comprises a large part of the gap between Bushey and Watford. However, it has various types of development, including housing, schools and Bushey Grove Leisure Centre.</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (within setting of two Grade II listed buildings)
Comments on boundaries	Roads, edge of existing development, field boundaries
Grey belt conclusion	Not grey belt
Reason for conclusion	Strong contribution to purpose B

Assessment Area WA-005

Assessment Area

Reference	WA-005
Settlement	Watford (LBUA)

Purposes Assessment

Purpose A	<p>2. Moderate Contribution: The AA contains some development in the south. The AA is partially enclosed to the west and south-west. Existing development to the west and south-west would restrict development and prevent sprawl in these directions but there is no physical boundary in reasonable proximity to contain development and restrict sprawl to the north and east. Development of the AA would not result in an incongruous pattern of development due to the existing development that has urbanised the AA.</p>
Purpose B	<p>2. Moderate Contribution: The AA contains existing development and comprises part of the gap between Bushey and Watford. The AA could likely be developed without the loss of visual separation due to the existing development within the AA and proximity of structures (existing development within the gap to the north).</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

Footnote 7 Assets/Constraints

Flood risk	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains two Grade II listed buildings)
Comments on boundaries	Edge of existing development, field boundaries
Grey belt conclusion	Provisionally grey belt
Reason for conclusion	Presence of a Footnote 7 constraint with possibility of mitigation

Assessment Area **WA-006**

Assessment Area

Purposes Assessment

Purpose A	<p>3a. Weak Contribution: The AA contains significant existing development and the AA is largely enclosed to the north and west. The existing development to the north and west would restrict and contain development in this direction and prevent sprawl, but there are no physical features to restrict and contain development to the south and south-east. Existing development on the AA is not forming an incongruous pattern of development.</p>
Purpose B	<p>2. Moderate Contribution: The AA is adjacent to Watford and previously formed a small part of the gap to Bushey. If the AA was developed it would not result in reduction in separation between towns due to existing development within the AA, topography and natural landscape features (extensive vegetation and woodland to the south).</p>

Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.
-----------	---

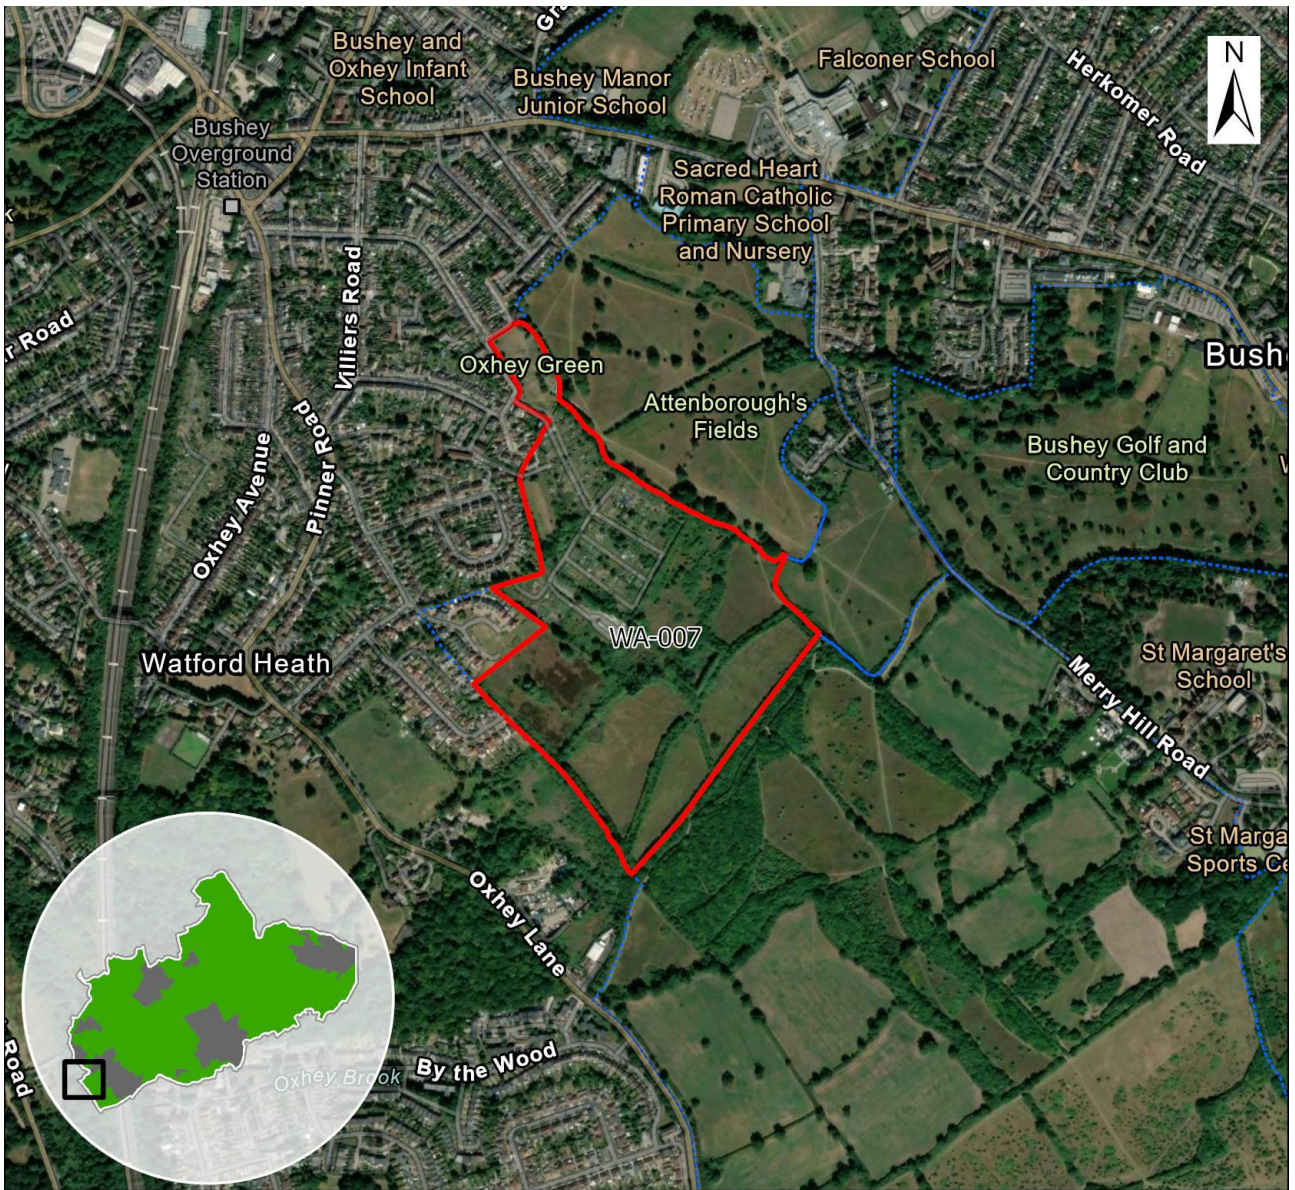

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	No strong reason for refusing or restricting development
Comments on boundaries	Edge of existing development
Grey belt conclusion	Grey belt
Reason for conclusion	No strong contribution to Purposes A, B or D and no Footnote 7 constraints.

Assessment Area WA-007

Assessment Area

Reference	WA-007
Settlement	Watford (LBUA)

Purposes Assessment

1. Strong Contribution: The AA is free of inappropriate development. The AA is not enclosed by existing development. Existing development to the north-west would restrict development and prevent sprawl in this direction but there are no physical features within reasonable proximity to contain development and restrict sprawl to the south and east. Development of the AA would result in an incongruous pattern of development due to the irregular shape of the AA emerging from the settlement edge.

Purpose A

Purpose B	1. Strong Contribution: The AA is adjacent to Watford and comprises a substantial part of the gap to Bushey. If the AA was developed it would be highly likely to result in the loss of visual separation between the towns.
Purpose D	3b. No Contribution: The AA does not contribute towards purpose D because it is not in the setting of a historic town.

Footnote 7 Assets/Constraints

Flood risk	No strong reason for refusing or restricting development
Biodiversity	No strong reason for refusing or restricting development
Irreplaceable habitat	No strong reason for refusing or restricting development
Local Green Space	No strong reason for refusing or restricting development
Historic environment	Potentially provides a strong reason for refusing or restricting development with possibility of mitigation (contains Oxhey Conservation Area and within setting of two Grade II listed buildings)
Comments on boundaries	Field boundaries
Grey belt conclusion	Not grey belt
Reason for conclusion	Strong contribution to purposes A and B
