

Appendix A: Town centre healthcheck reviews

BOREHAMWOOD

Description	Borehamwood is the largest centre within Hertsmere, and is home to the main Council Offices, Elstree Studios, a small cinema, and The Venue Leisure Centre. The centre is comprised mainly of the High Street, Shenley Road and a retail park just off the main street called Borehamwood Shopping Park. Recent improvements to the connectivity between Shenley Road and the retail park will benefit both areas. The centre is accessible by train, with the Elstree and Borehamwood Railway Station running Thameslink services to London and towns further north.
Current Status	Town Centre

Diversity of Use

Use Category	Units (%) 2025	Units (%) 2017	Units UK Avg. (%)	Floorspace (%) 2025	Floorspace (%) 2017	Floorspace UK Avg. (%)

Source: Experian, April 2025

Overall Composition

Borehamwood Town Centre is the largest of the centres within Hertsmere Borough. Borehamwood has 196 units within the town centre, reflecting a growth of eight units since 2017. In that period, the most significant changes are a reduction in the proportion of comparison units (28.2% to 19.4%), and an increase in the proportion of leisure services units (27.7% to 33.2%).

The town centre features an interesting division between Shenley Road, which is a conventional high street, and Borehamwood Shopping Park, in retail park format. While adjoining, both serve different purposes. The Shopping Park is car dominated, but the amount of parking and accessibility benefits the retail offer on Shenley Road.

The Primary Shopping Frontage runs along Shenley Road between Furzehill Road and Grosvenor Road, and throughout Borehamwood Shopping Park. Secondary

	Shopping Frontages are located at the east and western ends of the town centre including the Tesco Extra. The total retail floorspace for Borehamwood is 60,638 sq m.
Comparison & Convenience	Convenience units account for 15.3% of units within the town centre, higher than the UK average of 9.4%. In 2025, the amount of convenience floorspace is 29.6% of the total, which is significantly higher than the UK average of 15.3%. This may partly be attributed to the large Tesco Extra within the town centre, although it should be noted that this particular Tesco Extra has large portion of floorspace dedicated to comparison retail (approximately 30-40% of floorspace based on our site visit observations). According to the NEMS Household Survey, this particular Tesco Extra is the most popular location for main food shopping within the Study Area. Turning to comparison units within the town centre, the proportion of units is 19.4% of the town centre. This has reduced from 28.2% in 2017 and is now lower than the UK average of 26.0%. The proportion of comparison floorspace has subsequently also reduced from 26.6% in 2017 to 22.4% in 2025, however this a trend that is being seen across the UK as services become more prominent within town centres. As noted above, the Tesco Extra in the town centre has a larger proportion of floorspace dedicated to non-food retail. Based on site visit observations, the other supermarkets (e.g. Sainsbury's, Lidl, Aldi) have approximately 10% of non-food floorspace.
Services	Borehamwood Town Centre has a strong offer of services in all three categories in terms of proportion of units. This is evidence to Borehamwood being the largest and main centre within Hertsmere Borough. However, when focussing on floorspace, the leisure and financial and business service categories fall slightly below the UK average, indicating that services units are generally smaller. For example, leisure services account for 26.2% of floorspace within the town centre, compared with the UK average of 27.8%. Similarly, financial and business services account for 4.0% of floorspace compared with the UK average of 6.0%. The existing cinema and Pure Gym complex, not included within Experian's Goad plan boundary, represents an opportunity to improve the existing leisure offer within the town centre. Importantly, a popular Council run leisure facility is located just outside the boundary of the town centre. Of evening economy uses (restaurants, takeaways, bars, nightclubs), Borehamwood had the highest proportion (19.4%) of the centres that were surveyed.
Retailer Representation	Multiple retailer outlets represent 33.2% of total units in Borehamwood. Out of the total 60,638 sqm of retail floorspace, 36,344 sqm (59.9%) are multiple outlets. This represents a large proportion of retail compared to other town centres, reflecting Borehamwood's size and ability to accommodate multiple outlet tenants with large units in the Borehamwood Shopping Park. In terms of units, the multiple outlets represent a mix of uses, with a slight majority of comparison units (29.2%), closely followed by leisure services (27.7%). On a floorspace basis, convenience dominate multiple outlets, representing 50.2% of the space. This is likely driven by the large Tesco Extra and multiple other supermarkets in the town centre (e.g. Aldi, Lidl, M&S food hall).

	The majority of the major retailers are situated in the Borehamwood Shopping Park, including the other supermarkets listed above as well as Next, Boots, Starbucks, Costa Coffee, M&S, and WHSmith. There is also a McDonald's located opposite the Tesco Extra.
Vacancies	Between 2017 and 2025, the number of vacant units within Borehamwood town centre remained at 8. Both the proportion of vacant units and vacant floorspace are well below the UK averages.
Commercial Rents	From reviewing available online sources Borehamwood has average rents of £32.83 psf, generally ranging between £25-£35 psf. Rents reach up to above £70.00 for smaller units along the prime retail frontage on Shenley Road. This has slightly increased since 2017, which saw average rents of £30.00 psf. Source: CoStar (2025)
Pedestrian Flows	In terms of pedestrians, Borehamwood was generally observed to be busy, both along Shenley Road and within both Borehamwood Shopping Park and the Tesco Extra. There appeared to be higher pedestrian flows at the western end of Shenley Road, which benefits from the through flow of footfall between the train station and the Retail Park. The Borehamwood Shopping Park is well-connected to the main strip of shops along Shenley Road via Keystone Passage, allowing for the town centre to leverage flow on footfall from the retail park. According to the NEMS Household Survey, of respondents living within the same zone as Borehamwood, 82.5% of respondents visit the centre at least once a week, with 19.7% going daily. Based on this, Borehamwood is the most visited centre out of the surveyed centres.
Accessibility	Borehamwood benefits from strong public transport links, providing access both into London and to neighbouring Hertfordshire centres. Elstree & Borehamwood Station, situated at the western edge of the town centre, is on the Thameslink line, offering frequent direct services to central London destinations including St Pancras International, Farringdon, and Blackfriars, as well as northbound connections to St Albans, Harpenden, and Luton. The town is also supported by various local bus services, such as the 107, 292, 306, and 398, providing regular links to nearby areas including Barnet, Edgware, Watford, and Stanmore. Four Council run car parks (Civic Offices, Brook Road, Clarendon Road, and Furzehill Road) are located within the town centre or on the edge of centre. These provide a total of 782 car parking spaces, and the Council charges a small fee. Overall, the quality of the Council run car parking is good, although the Furzehill Road car park would benefit from some improvements. There is also free car parking in both the Tesco car park (671 spaces) and Borehamwood Shopping Park car park (580 spaces) for up to three hours. There are also significant amounts of on-street car parking along Shenley Road, which were often mostly occupied. Despite this, more parking spaces was amongst the top eight suggestions for improvements to Borehamwood in the NEMS Household Survey, as voted by 4.3% of respondents from the Study Area. At peak times, Shenley Road was observed to become quite congested, as supported by the Survey, where 5.5% of respondents suggested less traffic congestion as a potential improvement. In relation to pedestrian mobility access, the centre offered dropped kerbs with wide and flat walkways. There were also plenty of benches along the main strip. In the NEMS Household Survey, 81.1% of respondents who visited Borehamwood at least once a year arrived by car, while 5.8% walked. This remained true for respondents who live in the same zone as Borehamwood, with 56.8% stating they access the centre by car, the highest of the surveyed centres.

Environmental Quality	Significant works have been undertaken over the past decade to improve the urban environment of Borehamwood. This includes current works along the Sheley Road strip between Clarendon Road to Keystone Passage. Overall, the centre has a high environmental quality, however parts of Shenley Road would still benefit from some façade improvement work to increase the overall attractiveness and desirability of the centre as a place to shop and visit restaurants, particularly on the western end near the train station, such as Theobald Street. This would also help to improve the perception of Borehamwood. Borehamwood Shopping Park is particularly car dominated, but improvements are being made to the public realm. Keystone Passage is an important connection between the Park and Shenley Road, which would benefit from being more inviting.
Perception of Safety	At the time of the site visits, no anti-social or dangerous behaviour was observed, and the level of pedestrian activity ensured a safe environment. CCTV equipment is present throughout the centre. Hertsmere Borough Council is part of the Hertfordshire CCTV Partnership which aims to provide reassurance across main public, residential, retail, business and school areas by providing comprehensive surveillance.
Customer Views & Behaviour	Of respondents to the NEMS Household Survey who identified that they most visit Borehamwood, 28.4% stated that what they like the most are the good cafes and restaurants, while 15.4% identified that it was a good market. When identifying what could be improved, 9.8% suggested more and/or better clothes shops and 9.4% proposed an improved nightlife. Notably, having more and/or a better range of non-food shops was one of the top eight suggested improvements, whilst this was the most liked feature of Borehamwood in the Survey back in 2018. When asked whether certain measures would influence visitors' likelihood to visit Borehamwood, 50.6% of respondents stated a greater choice of shops and services, 46.8% stated more events, and 46.1% identified it being a more pleasant and attractive place to visit. These responses indicate that the centre would benefit from greater activation.

POTTERS BAR (DARKES LANE)

Description	Potters Bar is located in the north east of the Borough and is the second largest centre within Hertsmere Borough, second to Borehamwood. The Darkes Lane Local Town Centre serves an important role within the community, providing an offer of convenience and comparison goods as well as services. The town is highly accessible, having a dedicated train station within the centre.

Current Status	Local Town Centre

Diversity of Use	Use Category	Units (%) 2025	Units UK Avg. (%)	Floorspace (%) 2025	Floorspace UK Avg. (%)
	Comparison	17.7%	26.0%	20.0%	28.7%
	Convenience	11.5%	9.4%	23.8%	15.3%
	Retail Services	26.3%	15.8%	16.2%	7.3%
	Leisure Services	28.8%	26.7%	25.1%	27.8%
	Financial & Business Services	7.8%	7.9%	9.7%	6.0%
	Vacant	7.8%	14.0%	5.2%	14.3%

Source: Experian, April 2025

Please note that the available data reflects Potters Bar as a whole, and no separate breakdown is provided for Darkes Lane or the High Street. Therefore, the analysis on diversity of uses below has been replicated for Darkes Lane and High Street. As the historical 2012/17 data was disaggregated for these specific areas, a comparison would not be on a like-for-like basis and has therefore not been undertaken on historical trends.

Overall Composition	Experian's Goad data includes 243 units within Potters Bar, as identified in 2025. The majority of the Darkes Lane town centre is included within the Primary Shopping Area and the town is anchored by a Sainsbury's which is located adjacent to the railway station. The centre is concentrated around Darkes Lane and is to some extent divided by the railway bridge that passes over. The northern section of the town is comprised of parades of shops along both sides of the road, while south of the railway line, the parades operate down to Mutton Lane. Potters Bar High Street is located approximately 1km to the east of Darkes Lane. To some extent the two centres compete with each other, although also have different roles in the broader retail context. The total retail floorspace in Potters Bar is 46,331 sqm.

Comparison & Convenience	Based on both units and floorspace, Potters Bar has a lower proportion of comparison compared to the UK averages of 26.0% and 28.7% respectively. This reflects a general trend away from comparison goods within smaller centres, and

	also that Potters Bar competes with larger centres within a stronger comparison goods offer. On the other hand, Potters Bar has a greater proportion of convenience units (11.5%) to the UK average (9.4%) as well as convenience floorspace (23.8%). This reflects the centres' convenience-based role and is largely driven by the large Sainsbury's in Darkes Lane. Based on our observations of Sainsbury's located adjacent to the station, being the primary supermarket in the centre, approximately 20% of floorspace was dedicated to non-food (or comparison goods) sales.
Services	Potters Bar generally has more services than that typically seen in town centres across the UK, representing 63.0% of their units and 51.0% of their floorspace compared to the UK averages (50.4% units and 41.1% floorspace). There is a particularly high proportion of retail services when compared with the UK average (26.3% compared with 15.8%). Potters Bar has a comparable proportion of leisure service units to the UK average of 26.7%. There is a strong presence of services that are categorised as fast food and takeaways (24 out of 70 units). When considering the evening economy, Potters Bar has 43 of the total 243 units falling within the evening economy category (restaurants, takeaways, bars, nightclubs). This equates to 17.7% of the total units within the centres.
Retailer Representation	Multiple outlets represent 18.5% of total units in Potters Bar. Out of the total 46,330 sqm of retail floorspace, 17,057 sqm (36.8%) are multiple outlets. Therefore, the large majority of retail in Potters Bar is occupied by independents. In terms of units, the multiple outlets represent a mix of uses, with a slight majority of leisure services (28.9%), driven by fast food and takeaway occupiers. On a floorspace basis, convenience dominated multiple outlets, representing 54.4% of the space. This is likely driven by the large Sainsbury's presence adjacent to the train station at Darkes Lane, which represents the only major supermarket retailer in Potters Bar. Potters Bar Darkes Lane hosts the majority of the major retailers situated in Potters Bar, including Sainsbury's, Boots, and Superdrug. These are all located on the northern end of the street. There are also some major leisure services F&B retailers located opposite the train station on the ground floor of Metropolitan House, including McDonald's, Domino's, and Subway.
Vacancies	Potters Bar has a lower than average proportion of vacancies, with just 7.8% of units compared to the UK's average of 14.0%. Alternatively, this is aligned to the average vacancy across all the town centres assessed in this report (7.6%).
Commercial Rents	From reviewing available online sources Potters Bar Darkes Lane has average rents of £27.38 psf, typically ranging between £20-£28 psf. Rents reach up to above £50.00 along the prime retail frontage within more modern builds, which is higher than Potters Bar High Street. This has reduced since 2018, which saw average rents of £37.00 psf.
Pedestrian Flows	Source: CoStar (2025) The centre was reasonably busy at the time of our site visit, with plenty of car parks and easy on-street parking located throughout the centre allowing accessibility for vehicles to pull in for short periods of time and patrons to visit local shops.

	The centre is well connected via public transport routes to nearby towns as well as London city. Potters Bar Station, located directly on Darkes Lane, provides frequent Great Northern services to London King's Cross, Finsbury Park, and Moorgate, as well as northbound connections to Hatfield, Welwyn Garden City, and Stevenage. The area is also well served by local bus routes including the 298, 313, and 398, offering access to nearby centres such as Barnet, Southgate, Enfield, and Borehamwood.
Accessibility	There are two Council run car parks servicing Potters Bar Darkes Lane offering a total 222 car parking spaces at a reasonable price. There is also the Sainsbury's car park offering 243 free car parking spaces (up to 2 hours), and the Potters Bar Station car par which is privately run and has 202 spaces at a small cost. In relation to pedestrian mobility access, the centre offered dropped kerbs with wide and flat walkways. 79.4% of respondents of the Household Survey travelled to the centre by car, with 5.8% walking.
Environmental Quality	The centre is of moderate environmental quality. It would benefit from additional landscaping and greenery along Darkes Lane. Some shopfronts would also benefit from cosmetic improvement, and the railway station has significant potential for improvements. It is noted that there were road works being undertaken during our site visit, which is assumed to improve the amenity of the road along Darkes Lane. It is noted that being an attractive environment / nice place was amongst the top eight most liked aspects of Potters Bar Darkes Lane according to the NEMS Household Survey.
Perception of Safety	At the time of the site visits no anti-social behaviour was observed. The consolidated nature and business of the centre leads to reasonable footfall and therefore limited ability to be able to commit any form of crime. CCTV cameras were in operation.
Customer Views & Behaviour	When asked what they liked most about Potters Bar Darks Lane, 34.3% of respondents who visited Potters Bar Darkes Lane the most, identified that the centre has good cafes and restaurants. 18.8% identified the centre has good pubs and bars. When asked what could be improved, 11.2% identified providing free parking as their first response. Interestingly, 10.3% identified more and/or better cafes and restaurants. Additional parking was also voted by 8.7% of respondents. When asked whether certain measures would influence visitors' likelihood to visit Potters Bar Darkes Lane, 36.7% of respondents stated a greater choice of shops and services.

POTTERS BAR (HIGH STREET)

Description	Potters Bar (High Street) is located within Potters Bar in the north west part of the Borough. While in close proximity to the Potters Bar (Darkes Lane) centre, the High Street serves a separate function to Darkes Lane. The centre is long and linear, consisting predominantly of small parades of shops, often with dedicated parking areas. The High Street itself is a busy road, and pedestrians suffer to some extent from the car dominated environment.
Current Status	District Centre

Diversity of Use	Use Category	Units (%) 2025	Units UK Avg. (%)	Floorspace (%) 2025	Floorspace UK Avg. (%)

Source: Experian, April 2025					
Please note that the available data reflects Potters Bar as a whole, and no separate breakdown is provided for Darkes Lane or the High Street. Therefore, the analysis on diversity of uses below has been replicated for Darkes Lane and High Street. As the historical 2012/17 data was disaggregated for these specific areas, a comparison would not be on a like-for-like basis and has therefore not been undertaken on historical trends.					
Overall Composition	Experian's Goad data includes 243 units within Potters Bar, as identified in 2025. The district centre is primarily arranged along the High Street corridor, forming a linear parade of retail, service and food-and-beverage uses. The centre comprises a mix of independent operators that serve the local catchment. Activity is concentrated around the junctions with The Walk and Mutton Lane, where the highest density of commercial frontages is found. Further along the High Street, smaller parades continue in a more dispersed pattern, transitioning gradually into surrounding residential areas.				
	Potters Bar High Street is located approximately 1km to the east of Darkes Lane. To some extent the two centres compete with each other, although also have different roles in the broader retail context.				
	The total retail floorspace in Potters Bar is 46,331 sqm.				
Comparison & Convenience	Based on both units and floorspace, Potters Bar has a lower proportion of comparison compared to the UK averages of 26.0% and 28.7% respectively. This				

	reflects a general trend away from comparison goods within smaller centres, and also that Potters Bar competes with larger centres within a stronger comparison goods offer. On the other hand, Potters Bar has a greater proportion of convenience units (11.5%) to the UK average (9.4%) as well as convenience floorspace (23.8%). This reflects the centres' convenience-based role and is largely driven by the large Sainsbury's in Darkes Lane. Based on our observations of Sainsbury's located adjacent to the station, being the primary supermarket in the centre, approximately 20% of floorspace was dedicated to non-food (or comparison goods) sales.
Services	Potters Bar generally has more services than that typically seen in town centres across the UK, representing 63.0% of their units and 51.0% of their floorspace compared to the UK averages (50.4% units and 41.1% floorspace). There is a particularly high proportion of retail services when compared with the UK average (26.3% compared with 15.8%). Potters Bar has a comparable proportion of leisure service units to the UK average of 26.7%. There is a strong presence of services that are categorised as fast food and takeaways (24 out of 70 units). When considering the evening economy, Potters Bar has 43 of the total 243 units falling within the evening economy category (restaurants, takeaways, bars, nightclubs). This equates to 17.7% of the total units within the centres.
Retailer Representation	Multiple outlets represent 18.5% of total units in Potters Bar. Out of the total 46,330 sqm of retail floorspace, 17,057 sqm (36.8%) are multiple outlets. Therefore, the large majority of retail in Potters Bar is occupied by independents. In terms of units, the multiple outlets represent a mix of uses, with a slight majority of leisure services (28.9%), driven by fast food and takeaway occupiers. On a floorspace basis, convenience dominated multiple outlets, representing 54.4% of the space. This is likely driven by the large Sainsbury's presence adjacent to the train station at Darkes Lane, which represents the only major supermarket retailer in Potters Bar.
Vacancies	Potters Bar High Street does not host any of the multiple outlet occupiers. Potters Bar has a lower than average proportion of vacancies, with just 7.8% of units compared to the UK's average of 14.0%. Alternatively, this is aligned to the average vacancy across all the town centres assessed in this report (7.6%).
Commercial Rents	From reviewing available online sources Potters Bar High Street has average rents of £25.12 psf, ranging between £22-£29 psf. This has increased since 2018, which saw average rents of £20.00 psf. Source: CoStar (2025)
Pedestrian Flows	The centre was a reasonably car dominated environment and there was limited pedestrian activity, a result of the linear environment. Pedestrian activity was mostly restricted to individual shopping parades. This aligns with the results of the NEMS Household Survey, which found that Potters Bar High Street had the least amount of regular visits out of the surveyed centres, with 37.0% of respondents visiting it at least once a week. The Tesco Superstore situated on Mutton Lane attracted lots of pedestrian footfall, however this is not easily accessible from or well connected to High Street, restricting the town centre's ability to leverage this foot traffic.

	The centre is well connected via public transport routes to nearby towns as well as London city. Potters Bar Station, located on Darkes Lane, provides frequent Great Northern services to London King's Cross, Finsbury Park, and Moorgate, as well as northbound connections to Hatfield, Welwyn Garden City, and Stevenage. The area is also well served by local bus routes including the 298, 313, and 398, offering access to nearby centres such as Barnet, Southgate, Enfield, and Borehamwood.
Accessibility	There is sufficient on street parking, which is generally free for one hour. In addition to on street parking at shopping parades, there are three Council run car parks servicing the centre and offering a total of 133 car parking spaces for a small charge. In addition to the Council run car parks there are also the Tesco car park (450 spaces) and a privately run car park at Oakmere House (64 spaces). In relation to pedestrian mobility access, the centre offered dropped kerbs and flat walkways. The NEMS Household Survey results identified that of those that visited Potters Bar High Street at least once a year, 79.4% travelled by car as either the driver or passenger. Only 4.5% walk, the fewest of the surveyed centres. This remained true for respondents who live in the same zone as Potters Bar High Street, with only 24.2% walking to the centre, the lowest of the surveyed centres again. These figures are further evidence to the car dominated environment.
Environmental Quality	The centre would benefit from significant urban environment improvement works, including works to shop fronts as well as general public realm improvement and providing an improved pedestrian environment. This is particularly the case for the southern end of the High Street strip. Despite this, according to the Household Survey, Potters Bar High Street having an attractive environment / being a nice place was the fourth most liked feature of the centre, as voted by 11.4% of respondents. Although cleaner streets / better maintenance was also identified within the top eight suggested improvements for Potters Bar High Street.
Perception of Safety	While no antisocial behaviour was observed, the centre did not provide a particularly inviting environment for pedestrians, being car dominated.
Customer Views & Behaviour	Similarly to Potters Bar Darkes Lane, good cafes and restaurants (32.6%), and pubs and bars (18.0%) were identified as the two most liked features of Potters Bar High Street by respondents of the NEMS Household Survey. Alternatively, for improvements to the centre, more/better leisure facilities was the top answer (12.5%), followed by a better market (10.9%). This suggests that despite leisure services holding the highest representation of retail units across Potters Bar, this is likely concentrated in other areas/centres and not within the Potters Bar high Street centre. Only 21.0% of respondents said nothing can be improved, the lowest of the surveyed centres. When asked what would influence their likelihood to visit Potters Bar High Street, 37.8% of respondents to the Household Survey identified greater choice of shops and services as having some level of influence.

	The centre has a smaller offer of comparison good units compared with the UK average (21.4% compared with 26.0%). The same is seen in floorspace, with Radlett comparison goods comprising 20.5% of area in 2025 compared to 28.7% across the UK. This representation of comparison goods retail has reduced since 2012 both in terms of units (25.3%) and floorspace (25.8%), indicating that Radlett's provision is focused more on servicing. Based on our observations of both the Tesco Express and Budgens, approximately 10% of floorspace was dedicated to non-food (or comparison goods) sales.
Services	Radlett District Centre has a particularly high proportion of retail services units (24.3%) compared with the UK average (15.8%). These have remained fairly consistent since 2012 (24.2%) and have a strong focus on health and beauty, representing 16 out of 25 retail service units (64.0%). Radlett has a slightly lower proportion of leisure services (21.4% compared with 26.7%), reducing since 2012 (22.1%). However, leisure service floorspace has increased to 30.3% from 23.7% in 2012, now surpassing the UK average of 27.8%. This suggests that the centre has introduced larger leisure service outlets. It was noted that the majority of leisure services were cafes and restaurants (combined representing 13 out of 22 leisure units), and there were found to be very few takeaways (3 units). This is an indication of the affluence of the local population in Radlett. When considering evening economy, 11.7% of units, or 12 of the total 103 units fell into the evening economy category (restaurants, takeaways, bars, nightclubs).
Retailer Representation	Multiple outlets represent 11.7% of total units in Radlett. Out of the total 12,737 sqm of retail floorspace, 1,784 sqm (14.0%) are multiple outlets. This is testimony to the centre having a high proportion of independent shops such as bakers, butchers, and delicatessens. In terms of units, the multiple outlets represent a mix of uses, with a majority of financial and business (33.3%) as well as leisure services (25.0%). On a floorspace basis, convenience dominated multiple outlets, comprising 43.2% of the space, representing the Tesco Express and Budgens. The leisure services multiple outlets largely represent takeaway food, such as Gails, Pizza Express, and Wenzel's. Financial and business services occupiers include HB Partners.
Vacancies	Radlett has a high proportion of vacant units within the district centre boundaries with 11 vacancies, or 10.7% of units. Whilst still below the UK average of 14.0%, this has increased significantly from 5.3% in 2012.
Commercial Rents	From reviewing available online sources Radlett has average rents of £38.92 psf, generally ranging between £30-£45 psf. Rents reach up to above £66.00 for smaller units along the prime retail frontage on Watling Street. This has increased slightly since 2017, which saw average rents of £34.00 psf. Source: CoStar (2025)
Pedestrian Flows	At the time of the site visits there was limited pedestrian flow throughout the centre, with most of the activity being traffic driven. The centre was observed to be particularly quiet. The most pedestrian movement occurred in the southern part of the centre. Despite this, it is noted that compared to the other surveyed centres, Radlett recorded the second highest proportion of people visiting it at least once a week (76.1%) according to the NEMS Household Survey. This suggests that the site visit occurred out of peak time.

Accessibility	The railway station at Radlett operates Thameslink services north and south, connecting to surrounding Hertfordshire towns and central London. The town is further supported by several local bus services, including routes such as the 602, 306, and 601, which connect Radlett to nearby centres including Watford, St Albans, Borehamwood, and Potters Bar.
	There is one Council run car park servicing the centre, the Newberries Car Park, and has 197 spaces. In addition, there is a privately run car park located near to the railway station which has 297 spaces. There is also a significant amount of on-street car parking along Watling Street, however there is a fee for these.
	In the NEMS Household Survey, 76.7% of respondents who identified that they visit Radlett the most, travelled to the centre by car, either as the driver or passenger. 5.1% of respondents stated that they walked, the second fewest out of the surveyed centres. Although, when this was narrowed down to respondents who live within the same zone as Radlett, 45.9% stated that they walked, the highest of the surveyed centres.
	In relation to pedestrian mobility access, the centre offered dropped kerbs with wide walkways.
Environmental Quality	Radlett was observed as having a 'village-like' atmosphere and had a high environmental quality. Some facades along Watling Street would benefit from some visual improvements. This aligns with the results of the Household Survey, where Radlett having an attractive environment / being a nice place was voted as the third most liked feature of the centre, as voted by 8.4% of respondents.
Perception of Safety	No anti-social behaviour was observed at the time of the site visits, and the centre was generally observed to be a peaceful and safe environment.
Customer Views & Behaviour	Of respondents to the NEMS Household Survey who identified that they visit Radlett the most, 25.7% of the stated that the thing they liked most about Radlett was the good cafes and restaurants. 12.1% of respondents stated that it was because Radlett was a good market.
	When identifying what could be improved, 12.9% suggested more parking and 8.4% proposed less charity shops. Notably, having more and/or better cafes and restaurants was also the third most suggested improvement. Further, the 2018 Survey found that convenient parking was Radlett's third most liked feature, suggesting this has reduced over time. 31.2% of respondents said nothing can be improved, the highest of the surveyed centres.
	For what measures would influence visitors' likelihood to visit Borehamwood, 39.7% of respondents stated a greater choice of shops and services, 37.6% stated more events, and 37.7% identified making it easier to park.

BUSHEY

Description	Bushey is located in the west of the Borough, lying between Bushey Heath and Watford. One of the smaller centres of the Study, the centre plays an important role serving the local population and offering a smaller alternative to the larger Watford. Bushey District Centre is predominantly comprised of part of the High Street.

Current Status	District Centre

Source: Experian, April 2025

Overall Composition	There are 54 units in 2025 when using Experian Goad data, which has remained unchanged since 2017. The Goad data includes a parade of shops on the northern side of High Street to the east and west of Koh-I-Noor Avenue that is not currently included within the district centre boundary. Between 2017 and 2025, the trend in Bushey has been a reduction in the proportion of convenience good and financial and business services units, and an increase in the proportion of comparison good and leisure services units. The total retail floorspace for Bushey is 5,983 sqm.

Comparison & Convenience	The centre is anchored by a SPAR as the main convenience offer. The centre has a very low proportion of convenience units, with just one of the overall 54 units, or 1.9%. Consequently, convenience floorspace is also very low, just 3.4% of the total floorspace. This is significantly below the UK averages for both units (9.4%) and floorspace (15.3%). Whilst the proportion of comparison units has increased since 2017 from 16.7% to 20.4%, the centre still has a comparatively low proportion of comparison goods

	retail compared to the UK average (26.0%). The same stands for floorspace, which is lower than the UK average (28.7%) despite also increasing from 12.3% to 16.1%. Bushey and Bushey Heath, which is located not far from Bushey, complement each other, with Bushey Heath having a stronger provision of convenience and comparison goods. Based on our observations of the SPAR convenience store, approximately 20% of floorspace was dedicated to non-food (or comparison goods) sales.
Services	The District Centre has a high proportion of services, with total service units (70.4%) being well above the UK average (50.4%). This difference is even greater on a floorspace basis, with total services accounting for 71.7% of retail space in Bushey compared to 41.1% across the UK. Financial and business services had the greatest difference from the UK average in terms of units (16.7% compared to 7.9%). However, on a floorspace basis, retail and leisure services both significantly outpaced the UK averages, representing 21.6% and 38.4% respectively, compared with the UK averages of 7.3% and 27.8% respectively. Each of the categories lack a mix of services, being dominated by one industry. For retail services, health and beauty dominate the units, representing 7 out of 12 retail service units (58.3%). Leisure services are focused on food and beverage (cafes, takeaway, restaurants), comprising 13 of the 17 leisure service units (76.5%). Similarly, the centre provides a good array of financial and business services, although still has a high proportion of real estate agents (6 of 9). When considering the evening economy, Bushey has 10 of the total 54 units falling within the evening economy category (restaurants, takeaways, bars, nightclubs). This equates to 18.5% of the total units within the centre.
Retailer Representation	Multiple retailers account for 13.0% of all units in Bushey. Of the centre's 5,983 sqm of retail floorspace, 929 sqm (15.5%) is occupied by these operators. This is broadly in line with the surveyed-centre average (12.7%), suggesting that Bushey supports a balanced retail environment where national operators are present but do not dominate, allowing independent businesses to remain a key component of the centre's character. In terms of units, the multiple outlets represent a mix of uses, however has a strong majority of leisure services (42.9%), with the remaining units being split evenly amongst the other categories. Leisure services also dominated on a floorspace basis, with 55.0% of area, followed by convenience, representing 22.0% with the SPAR store. The multiple outlets largely represent food and beverage occupiers, such as Zaza Italian Restaurant.
Vacancies	The number of vacant units in Bushey has remained stable since 2017 at four units, representing 7.4% of total stock. This is broadly in line with the surveyed-centre average of 7.6% and remains well below the UK average of 14.0%. In floorspace terms, vacancy has risen slightly from 7.0% in 2017 to 8.7% in 2025, which is marginally above the surveyed-centre average of 7.5% but continues to sit significantly below the national average of 14.3%.
Commercial Rents	From reviewing available online sources Bushey has average rents of £20.05 psf, generally ranging between £15-£23 psf. Rents reach up to above £30.00 for

	boutique modern units along the prime retail frontage on High Street. This has increased slightly since 2017, which saw average rents of £18.00 psf. <i>We note that this is based on historical data, with the most recent transaction in 2022 due to limited leasing activity in the town centre.</i> Source: CoStar (2025)
Pedestrian Flows	At the time of the site visits there was a reasonable flow of pedestrians throughout the centre, with some local restaurants and the Red Lion Pub driving most of the activity. According to the NEMS Household Survey, 52.3% of respondents visit Bushey town centre at least once a week, with only 6.3% visiting it daily. This was the second lowest of the surveyed centres.
Accessibility	Bushey does have a railway station with services by London Overground and Northwestern Railway, however this is located approximately 0.9 miles west of the town centre. The primary transportation is buses, with several services, including routes such as the 602, 306, and 823, connecting Bushey to nearby centres including Watford, Borehamwood, and Elstree. The main car park servicing the district centre is the Kemp Place Council car park, which has a capacity of 120 spaces and charges a small fee. At the time of the site visits this car park appeared to be particularly busy. Some on street car parking is also available throughout the centre, however this is much more limited compared to the other surveyed centres. In the Household Survey, 73.4% of respondents who visit the town centre at least once a year access it by car, either as a driver or passenger. 9.7% of visitors walk, which was the second highest of the surveyed centres, indicating its accessibility for local residents. In relation to pedestrian mobility access, the centre offered dropped kerbs with flat walkways, however these were fairly narrow.
Environmental Quality	Bushey provides a pleasant environment for the local community. The environmental quality is of a good standard particularly in areas at the western edge of the centre where there is a church and public green. Parts of the eastern section of High Street would benefit from façade improvements. It is noted that being an attractive environment / nice place was amongst the top eight most liked aspects of Bushey according to the NEMS Household Survey.
Perception of Safety	No anti-social behaviour was observed within Bushey at the time of the site visits, and perception of safety was good.
Customer Views & Behaviour	Of respondents to the NEMS Household Survey who identified that they visited Bushey at least once a year, 32.7% stated that what they like most about the centre are the good cafes and restaurants, 14.9% identified it as a good market, and 11.0% stated they like the good pubs and bars. This speaks to the strong offering of food and beverage units in the centre discussed above. When asked that they believe could be improved in the centre, 12.1% suggested more parking followed by 9.5% wanting free parking. This may be influencing how the centre is accessed by walking more than other centres. When asked whether certain measures would influence visitors' likelihood to visit Bushey, 39.8% of respondents stated a greater choice of shops and services followed by 36.7% suggesting more events.

BUSHEY HEATH

Description	Bushey Heath is one of two district centres located in the Bushey area of Hertsmere Borough Council, the other being Bushey (High Street), which lies to the south west of Bushey Heath. Bushey Heath consists of a short strip of shops along High Road which provide everyday services and facilities serving the local population. The centre consists of 49 units, making it the smallest in the Study Area.

Current Status	District Centre

	Use Category	Units (%) 2025	Units (%) 2017	Units UK Avg. (%)	Floorspace (%) 2025	Floorspace (%) 2017	Floorspace UK Avg. (%)

	Vacant	8.2%	0.0%	14.0%	6.7%	0.0%	14.3%

Source: Experian, April 2025

Overall Composition	Using Experian's Goad data, Bushey Heath has 49 units, which has grown slightly from 45 in 2017. The Primary Shopping Frontages in Bushey Heath are centred around the main parades in the High Road. Since 2017 there has been a shift towards more retail service units within the district centre (20.0% to 28.6%), and a reduction in all of the other categories. The district centre suffers from its close proximity to Watford, however also serves an important, more local role, as a smaller centre for dropping into for a top up shop or similar. The total retail floorspace for Bushey Heath is 6,262 sqm.

Comparison & Convenience	Bushey Heath has been identified to have a significantly higher proportion of convenience units (14.3%) when compared with the UK average (9.4%). The centre has several small scale convenience units serving the local population. However, this has reduced from 20.0% in 2017, reflecting a shift to more retail services.

	In addition, there has also been a decline in comparison units since 2017, from 28.9% to 24.5%. While the 2025 figure is slightly below the UK average for the proportion of units (26.0%), the amount of comparison floorspace (39.5%) is above the UK average (28.7%). This shows that despite the centre's location near to Watford, it holds its own in terms of comparison shopping provision with large units. Based on our observations of both the Morrisons and Budgens, approximately 20% of floorspace was dedicated to non-food (or comparison goods) sales.
Services	Bushey Heath was identified to have a lower than average offer of leisure services units both in terms of proportion of units and floorspace. Leisure was identified to account for 13.8% of floorspace in the centre compared with the UK average of 27.8%. This reflects a reduction in the number of units, with only 16.3% of units now being leisure services compared to 20.0% previously. The centre competes with the nearby centre of Bushey, which has a particularly strong leisure offer. All of the leisure service units relate to the food and beverage industry. Financial and business services have also reduced from 11.1% in 2017 to 8.2% in 2025. Whilst this is slightly above the UK average for units (7.9%), it is lower than average on a floorspace basis (4.9% compared to 6.0% average). This indicates that the financial and business service units tend to be smaller in size. The majority of financial and business services units were real estate agents, which is common in smaller centres. Retail services were the only category to increase in proportion since 2017, growing to 28.6% from 20.0%. This significantly surpasses the UK averages, both in terms of proportion of units (15.8%) and overall floorspace (16.0% compared to 7.3% average). Health and beauty represented the majority of the units (8 of 14 retail services units). In terms of evening economy provision, Bushey Heath was identified to have 6 units of the total 49 within the evening economy category (restaurants, takeaways, bar and nightclubs), which equates to 12.2% of total units.
Retailer Representation	Multiple outlets represent 14.3% of total units in Bushey Heath. Out of the total 6,262 sqm of retail floorspace, 929 sqm (14.8%) are multiple outlets. This is testimony to the centre having a high proportion of independent shops. In terms of units, the multiple outlets represent an even mix of uses, however there are no financial and business. On a floorspace basis, convenience dominated multiple outlets, representing 50.0% of the space, followed by comparison goods (26.0%). The largest multiple outlet occupier is a Honda car dealership.
Vacancies	Bushey Heath has experienced a notable rise in vacancies, increasing to 8.2% of units after being fully occupied in 2017. Although this rate is slightly higher than the surveyed-centre average of 7.6%, it remains well below the UK average of 14.0%. Despite the recent increase, the vacancy level is still considered reasonable, particularly given that full occupancy in a town centre is uncommon.
Commercial Rents	From reviewing available online sources Bushey Heath has average rents of £26.20 psf, generally ranging between £22-£29 psf. Rents reach up to £37.00 for modern smaller units along the prime retail frontage on High Road. <i>We note that this is based on historical data, with the most recent transaction in 2023 due to limited leasing activity in the town centre.</i>
	Source: CoStar (2025)

Pedestrian Flows	The centre was reasonably busy at the time of the site visits, with pedestrians mainly identified at the Primary Shopping Frontage areas of the district centre. The NEMS Household Survey found that 54.8% of respondents in the study area access the Bushey Heath centre at least once a week, with only 7.8% visiting it daily.
Accessibility	While the area does not have its own railway station, nearby Bushey Railway Station provides London Northwestern Railway and London Overground services to central London, Watford, and other destinations along the West Coast Main Line. The town is also served by several local bus routes, including the 306, 602, and 823, which connect to nearby centres such as Watford, Borehamwood, and Elstree.
	There are two car parks in operation within Bushey Heath in addition to plenty of on-street car parking. These car parks include The Rutts car park and High Road St Peters car park just outside the town centre boundary, both of which are council car parks and cater for approximately 100 car parking spaces in total.
	When asked how they usually travel to Bushey Heath, 72.5% of respondents to the Household Survey who identified that they visit Bushey Heath at least once a year, travelled to the centre by car. 9.9% walked, however for respondents living within the same zone as Bushey Heath, 38.2% walked. This has decreased slightly from 44.0% in 2018. In relation to pedestrian mobility access, the centre offered dropped kerbs with wide walkways, however the path was relatively uneven.
Environmental Quality	The urban environment is of a reasonable quality. Some shop fronts would benefit from façade improvements to upgrade the urban space. Street trees and additional street furniture might also further benefit the urban environment. It is noted that being an attractive environment / nice place was amongst the top eight most liked aspects of Bushey Heath according to the NEMS Household Survey.
Perception of Safety	At the time of the site visit, no anti-social behaviour was observed. The small scale and pedestrian crossing allow safe pedestrian movement.
Customer Views & Behaviour	When asked what they liked most about Bushey Heath, 21.6% of respondents to the NEMS Household Survey identified good cafes and restaurants, while 14.2% stated it's a good market.
	When asked what could be improved about the centre, 8.4% identified more parking while 8.1% suggested more/better cafes and restaurants. Interestingly, 7.8% also suggested having a better market. 26.7% of respondents said they wouldn't change anything, the second highest of the surveyed centres. When asked what would influence their likelihood to visit Bushey Heath, 36.1% of respondents to the Household Survey identified more events as having some level of influence, with 35.8% suggesting a greater choice of shops and services.
